

Mercury's advanced encryptor receives certification from National Security Agency

July 7, 2022

Powerful, miniature data-at-rest encryptor weighing less than a pound can be easily integrated into existing avionics systems, safeguarding sensitive data

ANDOVER, Mass., July 07, 2022 (GLOBE NEWSWIRE) -- Mercury Systems, Inc. (NASDAQ: MRCY, www.mrcy.com), a leader in trusted, secure mission-critical technologies for aerospace and defense, announced today that its Jansson Data-At-Rest (JDAR) encryptor has been certified by the National Security Agency (NSA) to protect stored data classified secret and below.

Fully certified as an NSA Type-1 cryptographic module and developed in collaboration with the Department of Defense, the encryptor offers an innovative approach to the growing need for data-at-rest protection in an ultra-low size, weight, and power form factor while providing high throughput, ruggedization and anti-tamper protection.

Why it Matters:

Sensitive data is vulnerable when deployed at the edge and must be protected from local or remote attacks. The JDAR module protects data-at-rest and can be easily integrated into many of Mercury's existing avionics, unmanned and unattended sensors, surveillance, communication, and wearable systems, ensuring sensitive data cannot be compromised.

"Weighing less than a pound and the size of a smartphone, our advanced miniature NSA Type-1 JDAR encryptor is the smallest in the industry and provides the flexibility and performance needed so today's critical missions can address emerging threats," said Mark Bruington, vice president, Mercury Mission Systems. "The innovative, purpose-built design makes it more cost-effective and easier than ever before for our A&D customers to entrust their most mission-critical avionics challenges to Mercury."

Mercury envisions, creates, and delivers innovative technology solutions purpose-built to meet its customers' most pressing high-tech needs. For more information, visit mrcy.com or contact Mercury at (866) 627-6951 or info@mrcy.com.

Mercury Systems – Innovation That Matters®

Mercury Systems is a global commercial technology company serving the aerospace and defense industry. Headquartered in Andover, Mass., the company delivers trusted, secure open architecture processing solutions powering a broad range of mission-critical applications in the most challenging and demanding environments. Inspired by its purpose of delivering Innovation that Matters, By and For People Who Matter, Mercury helps make the world a safer, more secure place for all. Forward-Looking Safe Harbor Statement

This press release contains certain forward-looking statements, as that term is defined in the Private Securities Litigation Reform Act of 1995, including those relating to the products and services described herein and to fiscal 2022 business performance and beyond and the Company's plans for growth, cost savings and improvement in profitability and cash flow. You can identify these statements by the use of the words "may," "will," "could," "should," "would," "plans," "expects," "anticipates," "continue," "estimate," "project," "intend," "likely," "forecast," "probable," "potential," and similar expressions. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected or anticipated. Such risks and uncertainties include, but are not limited to, continued funding of defense programs, the timing and amounts of such funding, general economic and business conditions, including unforeseen weakness in the Company's markets, effects of epidemics and pandemics such as COVID, effects of any U.S. Federal government shutdown or extended continuing resolution, effects of continued geopolitical unrest and regional conflicts, competition, inflation, changes in technology and methods of marketing, delays in completing engineering and manufacturing programs, changes in customer order patterns, changes in product mix, continued success in technological advances and delivering technological innovations, changes in, or in the U.S. Government's interpretation of, federal export control or procurement rules and regulations, changes in, or in the interpretation or enforcement of environmental rules and regulations, market acceptance of the Company's products, shortages in or delays in receiving components, production delays or unanticipated expenses due to performance quality issues with outsourced components, inability to fully realize the expected benefits from acquisitions, restructurings and value creation initiatives such as 1MPACT, or delays in realizing such benefits, challenges in integrating acquired businesses and achieving anticipated synergies, effects of shareholder activism, increases in interest rates, changes to industrial security and cyber-security regulations and requirements, changes in tax rates or tax regulations, changes to interest rate swaps or other cash flow hedging arrangements, changes to generally accepted accounting principles, difficulties in retaining key employees and customers, unanticipated costs under fixed-price service and system integration engagements, and various other factors beyond our control. These risks and uncertainties also include such additional risk factors as are discussed in the Company's filings with the U.S. Securities and Exchange Commission, including its Annual Report on Form 10-K for the fiscal year ended July 2, 2021. The Company cautions readers not to place undue reliance upon any such forward-looking statements, which speak only as of the date made. The Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made.
