# Cautionary Notice About Forward-Looking Statements

This annual report contains certain forward-looking statements, as that term is defined in the Private Securities Litigation Reform Act of 1995, including those relating to the Company's focus on enhanced execution of the Company's strategic plan. You can identify these statements by the words "may," "will," "could," "should," "would," "plans," "expects," "anticipates," "continue," "estimate," "project," "intend," "likely," "forecast," "probable," "potential," and similar expressions. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected or anticipated. Such risks and uncertainties include, but are not limited to, continued funding of defense programs, the timing and amounts of such funding, general economic and business conditions, including unforeseen weakness in the Company's markets, effects of any U.S. federal government shutdown or extended continuing resolution, effects of geopolitical unrest and regional conflicts, competition, changes in technology and methods of marketing, delays in or cost increases related to completing development, engineering and manufacturing programs, changes in customer order patterns, changes in product mix, continued success in technological advances and delivering technological innovations, changes in, or in the U.S. government's interpretation of, federal export control or procurement rules and regulations, changes in, or in the interpretation or enforcement of, environmental rules and regulations, market acceptance of the Company's products, shortages in or delays in receiving components, supply chain delays or volatility for critical components, production delays or unanticipated expenses including due to quality issues or manufacturing execution issues, capacity underutilization, increases in scrap or inventory write-offs, failure to achieve or maintain manufacturing quality certifications, such as AS9100, the impact of supply chain disruption, inflation and labor shortages, among other things, on program execution and the resulting effect on customer satisfaction, inability to fully realize the expected benefits from acquisitions, restructurings, and operational efficiency initiatives or delays in realizing such benefits, challenges in integrating acquired businesses and achieving anticipated synergies, effects of shareholder activism, increases in interest rates, changes to industrial security and cyber-security regulations and requirements and impacts from any cyber or insider threat events, changes in tax rates or tax regulations, changes to interest rate swaps or other cash flow hedging arrangements, changes to generally accepted accounting principles, difficulties in retaining key employees and customers, litigation, including the dispute arising with the former CEO over his resignation, unanticipated costs under fixed-price service and system integration engagements, and various other factors beyond our control. These risks and uncertainties also include such additional risk factors as are discussed in the Company's filings with the U.S. Securities and Exchange Commission, including its Annual Report on Form 10-K for the fiscal year ended June 28, 2024 and subsequent Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. The Company cautions readers not to place undue reliance upon any such forward-looking statements, which speak only as of the date made. The Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made.

# Letter from the CEO

# Dear Mercury Shareholders,

As expected, fiscal year 2024 was a transition year, and one in which we made considerable progress in addressing what we believe to be transient challenges in the business. We exited the year with positive momentum, delivering fourthquarter financial results in line with or ahead of our expectations. Mercury at its core is strong, with a unique position in the aerospace and defense industry and a vision to be the leader in mission-critical processing at the edge. We fulfill our purpose, Innovation that matters®, by aligning our investments with our customers' priorities, critical

franchises, and strong demand for secure products and solutions that support applications including sensors and effectors, electronic warfare, avionics, and C4I. In addition to positioning the company for its next phase of growth, the Mercury Processing Platform has an outsized impact on the security of our nation, our allies, and the men and women who serve in uniform.

# **Enhanced Focus on Execution**

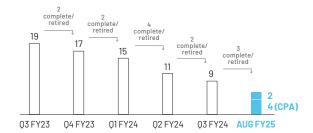

We continue to take actions along four priorities that are central to unlocking the intrinsic value of the business: delivering predictable results; building a thriving organic growth engine; expanding margins; and driving Improved free cash flow generation.

# Delivering predictable results

Over the course of 2024 we made progress to address what we believe to be transitory challenges that have obscured the underlying performance of the business. There were two factors that weighed on our results over the last year. First, we successfully won a number of development programs that led to a temporary shift in our program mix from 20% development programs in 2021 to 40% in 2023. Development programs typically generate 1,000 basis points lower gross margin than our production programs. We knew this mix shift would be temporary in nature and a positive leading indicator of future profitable growth, as these development programs are typically a precursor to higher-margin, long-term production contracts.

Second, because our program management systems and processes had not matured at the same pace as the growth of our business over the last several years, a small number of challenged programs had an outsized and temporary impact on our performance as we worked through solutions to resolve and move them into production. We began 2024 with 17 of these "challenged" programs. As of year-end fiscal 2024, we successfully retired risk on 11 of these programs. For the remaining six, two are nearing completion and represent ordinary course risk going forward. The other four are associated with our unique "common processing architecture" technology, where we have successfully executed a return to initial pilot production and are on a deliberate path to ramp up toward full-rate production in the first half of fiscal 2025.

Challenged programs - quarterly view: largely resolved

# Building a thriving growth engine

Our second priority is building a growth engine to bid and win new contracts at an appropriate level given our scale after years of primarily inorganic growth. In 2022 and 2023, our book-to-bill averaged slightly over 1.0, which is not adequate to meet our growth aspirations. In 2024, we focused on driving a higher book-to-bill, which will help meet our long-term growth objectives and above-average market growth rates.

Bookings in our fourth quarter of 2024 were \$284 million, resulting in a 1.14 book-to-bill, demonstrating an improving trend in this key indicator of growth. Our year-end backlog was \$1.3 billion, up 16% over 2023. Equally important, approximately 80% of our firm-fixed-price bookings in FY24 were production in nature, which is a good leading indicator of the mix shift in the business. Several examples of key 2024 wins include: a production agreement with Blue Halo to support the U.S. Space Force's Satellite Communication Augmentation Resource (SCAR) program; a new three-year production contract with Raytheon to deliver high-performance signal processing

1

# LETTER TO THE SHAREHOLDERS (CONT.)

subsystems for the U.S. Army's Lower Tier Air and Missile Defense Sensor (LTAMDS) program; a contract with L3Harris to provide solid-state data recorders for the U.S. Space Development Agency's Tranche 2 Tracking Layer satellite constellation; and a large production order for processing solutions to be integrated on a key U.S. Air Force program of record. These wins are important, not only because of their value and impact on our growth trajectory, but because they reflect our customers' continued trust in Mercury to support their most critical franchise programs.

# Margin expansion through targeted improvements to both our operating expense and gross margin

In 2024 we delivered margins well beneath our targets. These shortfalls were primarily driven by the previously discussed impacts that we believe are transitory and negative operating leverage from relatively low production volume, largely tied to development program delays. Looking forward, to achieve our adjusted EBITDA margin targets, we are focused on the following levers: executing on our development programs and minimizing cost growth impacts; getting back toward a more historical 20/80 mix of development to production programs; driving organic growth to generate positive operating leverage; and achieving cost efficiencies.

We implemented a series of cost reduction actions during 2024 as we realigned our organization structure, resulting in significant cost savings. These actions included streamlining our organizational structure to a single operating unit with Roger Wells as COO; organizing our U.S.-based business units into two Product business units and an Integrated Processing Solutions business unit; centralizing our engineering, operations, and mission assurance functions; standing up an Advanced Concepts group that is focused on advanced technologies, innovation, and strategic growth pursuits; and reducing SG&A headcount and discretionary spend and removing redundancies.

With this significant effort behind us, we enter 2025 with a streamlined cost structure, an integrated organizational construct, and a strong leadership team that is poised to build on our momentum and drive improved performance toward our targeted business profile. The headcount savings, combined with other non-headcount savings, including discretionary and third-party spend primarily within operating expenses and cost of revenues, are expected to yield annualized cost savings that a portion of which will be reinvested in the business and support improved profitability and operating leverage for our 2025 fiscal year.

We continue to take actions along four priorities that are central to unlocking the intrinsic value of the business: delivering predictable results; building a thriving organic growth engine; expanding margins; and driving Improved free cash flow generation.

# Driving improved free cash flow conversion and near-term cash release

In 2024, we significantly reduced net working capital by \$93.4 million from 2023 after years of expansion. Of particular note, unbilled receivables declined year over year by \$79 million or 21%, driven by second-, third-, and fourth-quarter billings, which were the three highest billings quarters on overtime revenue contracts in the company's history. This record level of billings reflects our relentless focus on progressing our programs to deliver for our customers, invoice, and collect cash, leading to a record free cash flow performance in our fourth quarter and positive free cash flow for the year for the first time since 2021.

We expect the operational process rigor we've implemented in FY24 will lead to continued reduction in working capital and improved free cash flow performance going forward.

# **Looking Forward**

We made significant progress in all of these priority areas culminating in our fiscal 2024 fourth-quarter results. With this progress, we are entering our 2025 fiscal year with what we believe to be a clearer path to delivering predictable organic growth, expanding margins, and improving free cash flow. We will continue to enhance our management systems and processes in order to deliver for our customers, meet our financial commitments, and drive long-term shareholder value.

In closing, I would like to thank our customers for their collaborative partnership and enduring trust, and our Mercury team for their dedication and commitment to delivering mission-critical processing at the edge. The performance, alignment, and mindset of our teams will enable us to realize our potential and deliver the results we know we are capable of for all our stakeholders.

Bill Ballhaus

Chairman of the Board, President and Chief Executive Officer

### PART I

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Actual results could differ materially from those set forth in the forward-looking statements. The reader may find discussions containing such forward-looking statements in the material set forth under "Management's Discussion and Analysis of Financial Conditions and Results of Operations" as well as elsewhere in this Annual Report on Form 10-K. Certain factors that might cause such a difference are discussed in this annual report on Form 10-K, including in the section entitled "Risk Factors."

When used in this report, the terms "Mercury," "we," "our," "us," and "the Company" refer to Mercury Systems, Inc. and its consolidated subsidiaries, except where the context otherwise requires or as otherwise indicated.

All references to fiscal 2024 are to the 52-week period from July 1, 2023 to June 28, 2024. All references to fiscal 2023 are to the 52-week period from July 2, 2022 to June 30, 2023. All references to fiscal 2022 are to the 52-week period from July 3, 2021 to July 1, 2022. There have been no reclassifications of prior comparable periods due to this change.

### ITEM 1. BUSINESS

# **Our Company**

Mercury Systems is a technology company that delivers mission-critical processing power to the edge - where signals and data are collected - to solve the most pressing aerospace and defense challenges. Mercury's products and solutions are deployed in more than 300 programs and across 35 countries. The Company is headquartered in Andover, Massachusetts, and has over 20 locations worldwide.

The Mercury Processing Platform is the unique advantage we provide to our customers. It comprises the innovative technologies we've developed and acquired for more than 40 years that bring integrated, mission-critical processing capabilities to the edge. Our processing platform spans the full breadth of signal processing—from radio frequency ("RF") front end to the human-machine interface—to rapidly convert meaningful data, gathered in the most remote and hostile environments, into critical decisions. It allows us to offer standard products and custom solutions from silicon to system scale, including components, modules, subsystems, and systems and it embodies the customer-centric approach we take to delivering capabilities that are mission-ready, trusted and secure, software-defined, and open and modular.

As a leading manufacturer of essential components, products, modules and subsystems, we sell to all of the top defense prime contractors, the U.S. government and original equipment manufacturers ("OEM") commercial aerospace companies. Our mission-critical products and solutions are deployed by our customers for a variety of applications including sensor and radar processing, electronic warfare, avionics, weapons, and command, control, communications, and intelligence ("C4I"). Mercury has built a trusted, robust portfolio of proven capabilities, leveraging the most advanced commercial silicon technologies and purpose-built to exceed the performance needs of our defense and commercial customers. Customers add their own applications and algorithms to our specialized, secure and innovative products and pre-integrated solutions. This allows them to complete their full system by integrating with their platform, the sensor technology and, increasingly, the processing from Mercury.

Our deep, long-standing relationships with leading high-tech and other commercial companies, coupled with our targeted research and development ("R&D") investments and industry-leading trusted and secure design and manufacturing capabilities, are the foundational tenets of this highly successful model. We are leading the development and adaptation of commercial technology for aerospace and defense solutions. From chip-scale to system scale and from data, including RF to digital to decision, we make mission-critical technologies safe, secure, affordable and relevant for our customers.

Our capabilities, technology, people and R&D investment strategy combine to differentiate Mercury in our industry. We maintain our technological edge by investing in critical capabilities and intellectual property ("IP" or "building blocks") in processing, leveraging open standards and open architectures to adapt quickly those building blocks into solutions for highly data-intensive applications, including emerging needs in areas such as artificial intelligence ("AI").

Our consolidated revenues, net loss, diluted loss per share, adjusted loss per share, and adjusted EBITDA for fiscal 2024 were \$835.3 million, \$(137.6) million, \$(2.38), \$(0.69) and \$9.4 million, respectively. Our consolidated revenues, net loss, diluted loss per share, adjusted earnings per share, and adjusted EBITDA for fiscal 2023 were \$973.9 million, \$(28.3) million, \$(0.50), \$1.00 and \$132.3 million, respectively. See the Non-GAAP Financial Measures section of this annual report for a reconciliation of our acquired revenues, adjusted EPS and adjusted EBITDA to the most directly comparable GAAP measures.

### **Our Business Strategy**

Mercury's business strategy is based on a differentiated market position: we make trusted, secure, mission critical technologies profoundly more accessible to the aerospace and defense industry. The Mercury Processing Platform serves customers with cutting-edge commercial technology innovations, purpose built and mission-ready for aerospace and defense applications. We have two models within the business: a product model and a solutions model, which have different approaches for innovation and go-to-market. In our product businesses, we invest in internal R&D to develop new capabilities that can be leveraged by multiple customers and support a wide variety of mission areas and applications. In our solutions business, we engage with customers to develop capabilities that meet exacting mission requirements and retire risk in a development phase before entering a production phase that can last many years and include numerous technological evolutions. Our businesses are complementary and synergistic, as they are organized within a single integrated operating unit, leverage common human and capital resources, and share IP to accelerate innovation across our offerings.

Our structure is now aligned and optimized to execute against these different business models. In 2024, we reorganized to streamline and simplify operations, consolidating two divisions into a single integrated structure that unified all lines of business and matrixed business functions under a Chief Operating Officer. Our U.S.-based businesses are aligned into two product-oriented business units – Signal Technologies and Processing Technologies –and a third business unit focused on more comprehensive solutions – Integrated Processing Solutions. A fourth business unit is dedicated to bringing our advanced edge processing capabilities to the international market, with facilities in the U.K., Spain, and Switzerland. Our Engineering, Operations, Mission Assurance, and Advanced Concepts functions are also centralized under our Chief Operating Officer, driving innovation, execution, and growth across of all our businesses.

We are focused on delivering industry-leading organic growth, adjusted EBITDA margins, and cash flow through the execution of our strategy to innovate and advance our processing platform, expand our content across A&D platforms, and deliver uncompromising performance for all of our stakeholders. Our ability to continue to improve our performance and deliver results demands we all align around the few actions that unlock the intrinsic value in our business. As such, our focus is on four areas that unlock our capacity to create value and reinvest for growth:

- 1. Delivering Predictable Results Continuous improvement in the performance of our programs, transition our development programs into production and mature our management systems and processes.
- 2. Building a Thriving Organic Growth Engine Create a growth engine that is consistently bidding and winning new contracts to drive industry leading organic growth.
- 3. *Expanding Margins* Drive comprehensive cost management efforts corporate-wide including improvement in gross margins across all programs, facilitating clearer accountability and streamlining our structure and processes.
  - 4. Driving Cash Release Enhance our cash flow conversion, including improvements in delivery and collection.

### **Our Solutions and Products**

Since 2015, we have acquired and fully or partially integrated 15 businesses, which have added substantial capabilities to our technology portfolio including: Lewis Innovative Technologies Inc., a carve-out acquisition from Microsemi Corporation, The Athena Group, Inc., Delta Microwave LLC, Syntonic Microwave LLC, Pentek Technologies, LLC and Pentek Systems, Inc., Atlanta Micro, Inc., CES Creative Electronic Systems, S.A., Richland Technologies, LLC, GECO Avionics LLC, American Panel Corporation, Physical Optics Corporation, Avalex Technologies LLC, Themis Computer and Germane Systems LC.

We believe we have built the most trusted, proven, contemporary portfolio of solutions and sub-systems that are purposebuilt to meet or exceed our customers' most pressing high-tech needs. The Mercury Processing Platform now has an end-to-end suite of mission-critical processing technologies, comprising:

*Signal:* Microwave and mixed-signal technology for analog and digital signal processing, including frequency conversion, signal conditioning/routing, digitization, and low-latency FPGA processing.

*Compute:* State-of-the-art digital data processing to ensure decision advantage, ranging from general purpose to tailored coprocessors, with high-performance CPU and GPU architectures.

Data Management: Data and video recording, storage, and encryption to mitigate cyber vulnerability; connectivity and communications control to securely and efficiently share mission data.

Display: Products and technologies that integrate the human and machine to speed decision-making for mission execution.

Secure: Security engineering to ensure systemwide integrity and protect Critical Program Information, IP and sensitive data-including securing boot, key management, attack countermeasures, and memory management.

We deliver technology at the intersection of the high-tech and defense industries, underpinned by key differentiators that set us apart in the market: Mission-Ready; Trusted and Secure; Software-Defined; and Open and Modular.

- *Mission-Ready:* Fit for purpose to meet the demanding needs of our customers' missions. Advanced thermal management and rugged packaging technology ensures optimal performance and reliable operation in the most challenging environments on earth and beyond. We deliver extended reliability and dependability through thermal management, component selection, environmental protection and testing.
- *Trusted and Secure*: A trusted supply chain, with products designed and manufactured onshore. Advanced cryptography, secure boot and physical protection technologies like our BuiltSECURE technology can mitigate reverse engineering, deliver cyber resiliency and safeguard confidential data and IP against adversarial threats, even when a system has been compromised. We also design safety-certifiable BuiltSAFE processing systems up to the highest design assurance levels.
- Software-Defined: Software enabled hardware for future proofing, rapid scaling, ease of maintenance and affordability. Flexible hardware architectures that are reconfigurable and upgradeable with software to extend the life of our systems and the platforms they are deployed on. Our model-based systems engineering ("MBSE") design approach aims to significantly decrease the time and cost involved in developing and deploying military and aerospace platforms.
- Open and Modular: "Plug and play", upgradeable and scalable. A modular, open, systems architecture ("MOSA") approach to system design maximizes technology reuse to dramatically reduce development time and cost. This open systems approach mitigates obsolescence risk while emphasizing commonality, interoperability and sustainability across platforms and domains.

The Mercury Processing Platform is designed to meet the full range of requirements in compute-intensive, signal processing, image processing and command and control applications. To maintain a competitive advantage, we seek to leverage technology investments across multiple product lines and product solutions. Examples of hardware products include small, custom microelectronics, embedded sensor processing subsystems, RF and microwave components, modules and subsystems, rugged servers and avionics mission computers.

Our products are typically compute-intensive and require extremely high bandwidth and high throughput. These systems often must also meet significant size, weight and power ("SWaP") constraints for use in aircraft, unmanned aerial vehicles ("UAVs"), ships and other platforms and be ruggedized for use in harsh environments. They are primarily used in both commercial aerospace applications, such as communications and ground radar air traffic control, as well as advanced defense and intelligence applications, including space-time adaptive processing, synthetic aperture radar, airborne early warning, command, control, communication and information systems, mission planning, image intelligence and signal intelligence systems. Our products transform the massive streams of digital data created in these applications into usable information in real time. The systems can scale from a few processors to thousands of processors.

We group our products into the following categories:

- Components. Components represent the basic building blocks of an electronic system. They generally perform a single function such as switching, storing or converting electronic signals. Some examples include power amplifiers and limiters, switches, oscillators, filters, equalizers, digital and analog converters, chips, MMICs (monolithic microwave integrated circuits) and memory and storage devices.
- Modules and Subassemblies. Modules and sub-assemblies combine multiple components to serve a range of complex functions, including processing, networking and graphics display. Typically delivered as computer boards or other packaging, modules and sub-assemblies are usually designed using open standards to provide interoperability when integrated in a subsystem. Examples of modules and sub-assemblies include embedded processing boards, switched fabrics and boards for high-speed input/output, digital receivers, graphics and video, along with multi-chip modules. Additional examples include integrated radio frequency and microwave multi-function assemblies and radio frequency tuners and transceivers.
- Integrated Solutions. Integrated solutions bring components, modules and/or sub-assemblies into one system, enabled with software. Subsystems are typically, but not always, integrated within an open standards-based chassis and often feature interconnect technologies to enable communication between disparate systems. Spares and replacement modules and sub-assemblies are provided for use with subsystems sold by us. Our subsystems are deployed in sensor processing, aviation and mission computing and C4I applications.

By providing pre-integrated subsystems to our customers, we enable them to rapidly and cost-effectively port and adapt their applications to changing threats. This approach also saves our customers valuable time and expense, as their initial costs to integrate modules and components typically far exceed the costs of the individual product procurement. This benefit continues over time because we are continually investing R&D into our products. This allows us to provide our customers the latest technologies in our pre-integrated subsystems faster than they can typically do it themselves. We believe this is a better business and technology model to operate within, as it continues to provide value and benefits to us and our customers over time.

We engage with global tech leaders to align technology roadmaps and deliver cutting-edge computing in scalable, field-deployable form factors that are fully configurable to each unique workload. We use the latest Intel® server-class processing

products, AMD Field Programmable Gate Arrays ("FPGA"), as well as NVIDIA GPU products in our embedded high-performance processing technologies. While this multi-computing and embedded processing technology is one of our core capabilities, the SWaP constraints inherent in high-performance embedded processing applications create unique challenges. For example, to deal with the heat build-up involved in fanless compact rugged subsystems, we introduced a key technology called Air Flow-By<sup>TM</sup> that enables previously unattainable levels of processing power within a small footprint by effectively removing heat so server-class processors can perform at maximum designed power limits. In environments where air is limited, such as high-altitude operations, our Liquid-Flow-By<sup>TM</sup> technology allows maximum server-class processor performance. These innovative cooling techniques allow full performance server-class processing in rugged environments enabling new and advanced modes of operation that enhance the multi-intelligence, situational awareness and electronic warfare capabilities in military platforms.

Embedded systems security has become a requirement for new and emerging military programs and our security solutions are a critical differentiator from our traditional competition. These security solutions, combined with our next-generation secure Intel® server-class product line, together with increasingly frequent mandates from the government to secure electronic systems for domestic and foreign military sales, position us well to capitalize on U.S. Department of Defense ("DoD") program protection security requirements. Finally, our built-in security framework creates higher product differentiation, and drives greater program velocity, while lowering risk.

# Open Standards Support

Mercury has a long history of driving modular open systems architectures and has remained committed to creating, advancing and adopting open standards for all our products, from our smallest components and connectors to our largest, high-performance, integrated multi-computer systems. With forty years of technology leadership within the high-performance embedded computing industry, we have pioneered or contributed to the development of many of the defense industry's current and emerging open standards, including standards such as RACEway, RapidIO, VXS, VPX, REDI and notably OpenVPX. These open standards allow system integrators to benefit from the interoperability of modules produced by multiple vendors. We also continue to be influential in the industry-standards organizations associated with our market segments. As a member of the VMEbus International Trade Association ("VITA"), the Sensor Open Systems Architecture ("SOSA") initiative, the Future Airborne Capability Environment ("FACE") consortium and the Vehicular Integration for C4ISR/EW Interoperability ("VICTORY") consortium, among other standards bodies, Mercury is helping to guide the aerospace and defense industry toward greater openness and vendor interoperability, consistent with the DoD's focus on using MOSA in major programs.

Our software is based on open standards and includes heterogeneous processor support with extensive highly-optimized math libraries, multi-computing switch fabric support, net-centric and system management enabling services, extended operating system services, board support packages and development tools. This software platform delivers on the performance required for highly tuned real-time operation with the flexibility of open standards that are an essential ingredient of technology insertion and software life-cycle support.

As the U.S. government mandates more outsourcing and open standards, a major shift is occurring within the defense prime contractor community towards procurement of integrated subsystems that enable quick application-level porting through standards-based methodologies. We believe that our core expertise in this area is well aligned to capitalize on this trend. By leveraging our open architecture and high-performance modular product set, we provide defense prime contractors with rapid deployment and quick reaction capabilities through our professional services and systems integration offerings. This results in less risk for the defense prime contractors, shortened development cycles, quicker solution deployment and reduced life-cycle costs.

### Commitment to Deliver Uncompromised

For Mercury, this means ensuring our products and solutions have not been and cannot be tampered with, and that what we deliver to our customers is not compromised at any point during the development lifecycle, from procurement to manufacturing. Our holistic approach to deliver uncompromised includes:

- vigorously mitigating potential insider threats;
- proactively protecting our IT infrastructure with strong cybersecurity defenses;
- effectively managing and assessing our suppliers' controls; and
- judiciously controlling design information through the entire development process.

We are investing in digital transformation, insider trust, cybersecurity, supply chain management and trusted microelectronics, all integral to our commitment to being a leader in delivering uncompromised solutions to our customers.

### **Market Opportunity**

Mercury serves a large and growing global defense technology market with strong tailwinds from the current defense super-cycle and secular growth targets. We are focused on the Tier 2 and Tier 3 defense technology market, which continues to grow while the total U.S. defense spending is expected to flatten over the next five years.

The primary demand drivers for our unique capabilities include: an increased commitment to defense spending by U.S. allies in light of the dynamic threat environment in Europe and Asia; ongoing modernization of legacy defense platforms to maintain relevance in the current near-peer threat environment; increasing electronification of next-generation defense systems, where electronics are driving capability enhancements on next-gen programs; outsourcing and delayering from the government and prime customers seeking to access innovation from smaller players like Mercury; and a focus on open systems, which allow customers to upgrade capabilities more rapidly and efficiently and better leverage advances in commercial technology such as AI-powered processing.

The market can be segmented into verticals aligned with mission capabilities, and a value chain that consists of prime integrators that contract directly with the government and deliver large scale platforms. Supporting the primes is a multi-tiered supplier base that delivers components and modules through standalone subsystems and integrated subsystems. Mercury spans several levels of this supply chain, typically working directly with the government or primes in our program business, while selling our products into third- and fourth-tier suppliers. Because of the broad demand for high-performance processing at the edge across defense missions, we operate in a number of the larger, faster growing parts of the market, from C4I to sensor processing, and spanning all operational domains—air, land, sea, space, and cyber.

The breadth and depth of our Processing Platform enables us to play vertically from components, or chip-scale, all the way to integrated processing solutions, in all of these markets. This ability to grow horizontally and vertically within this broad market provides a number of vectors for growth, evidenced by our recent significant design wins and bookings in our record backlog. We are well positioned on a number of significant and enduring defense programs, with a diverse portfolio of contracts with blue-chip customers, a large installed base, and the sole source for many unique capabilities. In some cases, we are a directed source to the primes by the U.S. government, reflecting the differentiation of our processing platform.

Our market opportunity is defined by the growing demand for domestically designed, sourced and manufactured electronics for critical aerospace, defense and intelligence applications. Our primary market positioning is centered on making commercially available technologies profoundly more accessible to the aerospace and defense sector, specifically as it relates to C4I systems, sensors and EW; and commercial markets, which include aerospace communications and other computing applications. We believe we are well-positioned in growing sustainable market segments of the aerospace and defense sector that rely on advanced technologies to improve warfighter capability and provide enhanced force protection capabilities. The acquisitions of the carve-out business from Microsemi Corporation, Delta Microwave LLC, Syntonic Microwave LLC, Pentek Technologies LLC, and Atlanta Micro, Inc., further improved our ability to compete successfully in these market segments by allowing us to offer an even more comprehensive set of closely related capabilities. The CES Creative Electronic Systems, S.A., Richland Technologies, LLC, GECO Avionics LLC, American Panel Corporation, Physical Optics Corporation, and Avalex Technologies LLC acquisitions provided us new capabilities that substantially expanded our addressable market into defense platform management, mission computing and commercial aerospace markets that are aligned to our existing market focus. The additions of Themis and Germane provided us with new capabilities and positioned us with a significant footprint within the rugged server business. Our organic investments as well as the acquisitions of LIT, the Microsemi Carve-Out Business and Athena added to our portfolio of embedded security products that can be leveraged across our business. Finally, our CES addition, due to its location in Geneva, Switzerland is helping to open more opportunities in international markets.

We believe there are a number of evolving trends that are reshaping our target markets and accordingly provide us with attractive growth opportunities. These trends include:

• The aerospace and defense electronics market is expected to grow in 2024 and beyond. According to Renaissance Strategic Advisors ("RSA"), as of May 2024, the global aerospace and defense electronics market is estimated to be \$154 billion in 2024, growing to \$197 billion by 2029. Within this global market, RSA estimates that the total Tier 2 defense electronics market, which Mercury participates in, was approximately \$50 billion in 2024, and will grow to \$66 billion in 2029. The aerospace and defense electronics marketplace consists of two primary subsegments: (i) C4I and (ii) sensor and effector mission systems. C4I encompasses platform and mission management, which include avionics and vetronics, C2I, which includes command and control and intelligence, and dedicated communications processing. Sensor and effector mission systems are primarily different types of sensor modalities such as EW, radar, EO/IR and acoustics as well as weapons systems such as missiles and munitions. Within the global Tier 2 C4I market in which we participate, RSA estimated the market for 2024 to be \$7.8 billion for platform and mission management, \$10.1 billion for C2I and \$10.6 billion for dedicated communications. RSA estimates the compound annual growth rate ("CAGR") from 2024-2029 for these markets to be 5.5% for platform and mission management, 5.5% for C2I and 6.1% for dedicated communications. Within the global Tier 2 sensor and effector mission systems market in which we participate, RSA estimated the market for 2024 to be \$6.2 billion for EW, \$7.0 billion for radar, \$2.8 billion for EO/IR,

- \$1.4 billion for acoustics and \$4.1 billion for weapons systems. RSA estimates the 2024-2029 CAGR for these markets to be 6.0% for EW, 5.5% for radar, 5.4% for EO/IR, 7.0% for acoustics and 6.6% for weapons systems. Within the context of the overall U.S. defense budget and spending for defense electronics specifically, we believe the C4ISR, EW, guided missiles and precision munitions and ballistic missile defense market segments have a high priority for future DoD spending. We continue to build on our strengths in the design and development of performance optimized electronic subsystems for these markets, and often team with multiple defense prime contractors as they bid for projects, thereby increasing our chance of a successful outcome. We expect to return to our above industry-average growth.
- The rapidly expanding demand for tactical ISR is leading to significant growth in sensor data being generated, leading to even greater demand for the capability of our products to securely store and process data onboard platforms. An increase in the prevalence and resolution of ISR is generating significant growth in the associated data that needs to be stored and turned into information for the warfighter in a timely manner. In addition, several factors are driving the defense and intelligence industries to demand greater capability to collect, store and process data onboard the aircraft, UAVs, ships and other vehicles, which we refer to collectively as platforms. These factors include the limited communications bandwidth of existing platforms, the need for platforms that can operate more autonomously and possibly in denied communications environments, the need for platforms with increased persistence to enable them to remain in or fly above the battlefield for extended periods and the need for greater onboard processing capabilities. In addition, the advent of sophisticated AI algorithms is beginning to revolutionize the ability of sensor processing systems to intelligently and efficiently process and act upon these large data sets. Standard computing architectures and computing platforms currently do not offer the level of performance needed to optimize existing AI algorithms, creating an additional opportunity for advanced processing capabilities onboard the platform.
- Russia's invasion of Ukraine, rising tensions in the Asia-Pacific and continued threats from rogue states and violent extremists are contributing to the most challenging global threat environment since the Cold War. This will likely result in a sea change in defense spending domestically and internationally. Our advisors estimate that U.S. growth, combined with increases in NATO defense budgets, could drive up to \$1.5 trillion of additional spending over the next decade. We believe that this could lead to higher bookings for Mercury in the electronic systems associated with missiles, munitions and missile defense systems, unmanned systems, fixed wing and rotorcraft, ground vehicles and EW.
- A greater percentage of the value associated with future defense platforms will be driven by electronic systems content, and upgrades to existing platforms will focus on sensors, signal processing, sensor algorithms, multi-intelligence fusion and exploitation and computing and communications capability all areas where Mercury participates. These trends remain favorable in our view and the demand environment is improving due to urgent needs for warfighting capability at a more rapid pace than traditional defense prime contractors can easily react to, as demonstrated by our strong bookings and design wins, in fiscal 2024. We believe that our addressable market continues to increase, driven in large part by our strategic move into mission systems and potential to deliver innovative processing solutions at chip scale, and that primes will increasingly seek out our high-performance, cost-effective open architecture products.
- Defense procurement reform is causing the defense prime contractors to outsource more work to commercial companies and we believe that prime contractor outsourcing is our largest secular growth opportunity. RSA estimates that in 2023 the U.S. defense Tier 2 embedded computing and RF market addressable by suppliers such as Mercury was approximately \$25 billion. RSA estimates that the U.S. defense prime contractors currently outsource only a small percentage of their work. The U.S. government is intensely focused on making systems more affordable and shortening their development time. In addition, the U.S. government is challenging defense prime contractors to leverage commercial technology wherever possible. This trend, along with a scarcity of technical and engineering talent in the market, is causing defense prime contractors to outsource to companies like Mercury, which we believe is our largest secular growth opportunity. As a merchant supplier of commercial technologies to the defense industry, we believe our products and subsystem solutions are often more affordable than solutions with the same functionality developed by a defense prime contractor. In addition, we believe our size, scale and stability in addition to the investments we have made in our domestic manufacturing capabilities and infrastructure, make us a more reliable and attractive outsourcing partner for our customers relative to smaller sub-scale providers. These factors are providing incentives for defense prime contractors to outsource more work to subcontractors with significant expertise and costeffective technology capabilities and solutions, and we have transformed our business model over the last several years to address these long-term outsourcing trends and other needs.
- DoD security and program protection requirements are creating new opportunities for domestic sourcing and our advanced secure processing capabilities. The U.S. government is focused on ensuring that the U.S. military protects its defense electronic systems and the information held within them from nefarious activities such as tampering, reverse engineering and other forms of advanced attacks, including cyber. The requirement to add security comes at a

time when the commercial technology world continues to offshore more of the design, development, manufacturing and support of such capabilities, making it more difficult to protect against embedded vulnerabilities, tampering, reverse engineering and other undesired activities. The DoD has a mandate to ensure both the provenance and integrity of the technology and its associated supply chain. These factors have created a unique opportunity for us to expand beyond sensor processing into the provision of technologies ranging from advanced secure processing subsystems to miniaturized custom microelectronics devices and capabilities for other onboard critical computing applications designed, developed, manufactured and supported in the U.S.A. In addition, advanced systems sold to foreign military buyers also require protection so that the technologies, techniques and data associated with them do not proliferate, which further enhances our market opportunity.

- Mercury is well-positioned to help address the need for DoD to access the latest commercial silicon, combined with the desire to ensure a trusted domestic supply of silicon technologies. In May 2023, DoD's National Defense Science and Technology Strategy listed microelectronics among its critical technology areas for investment. DoD's FY23 budget requested \$3.3 billion to fund microelectronics research and development initiatives, a historically large increase in funding. DoD's FY24 budget requested \$2.6 billion to fund microelectronic initiatives, and the FY25 President's Budget request includes \$2.5 billion to fund microelectronics initiatives. Along with Congress' passage of the Creating Helpful Incentives to Produce Semiconductors ("CHIPS") act in August 2022, DoD's investments in microelectronics further amplify the U.S. government's commitment to reinforcing the U.S. semiconductor supply chain. We believe Mercury is the leading provider of commercially developed silicon purpose-built for the specific requirements of aerospace and defense customers. This capability began with our 2016 acquisition of the Microsemi Carve-Out Business, which included capabilities in trusted and secure microelectronics. Since the acquisition, we have made additional investments in security and advanced packaging, most notably our announced \$15 million capital investment in fiscal year 2020 to expand our trusted custom microelectronics business in Phoenix, Arizona, to bring cutting-edge commercial silicon to the DoD. This initiative is specifically intended to bridge DoD technologies from monolithic ASIC designs, which are purpose-built for DoD but are deployed on legacy silicon designs, to heterogeneous "chiplet" architectures, which leverage best-of-breed silicon from commercial providers and packages the silicon for defense-specific applications, including the ability to embed security into the device itself.
- We have invested in advanced, domestic design and manufacturing capabilities. We have prioritized investments to build our internal capabilities and capacity for defense electronics design and manufacturing in the U.S. These investments include the consolidation of a number of sub-scale microelectronics manufacturing facilities into our modern advanced microelectronics centers ("AMCs") as well as the establishment of our operations facility in Phoenix, Arizona. In addition to the consolidation of facilities into scalable engineering and manufacturing centers of excellence, we have made the necessary investments to outfit these facilities with modern, scalable and redundant tools and equipment to promote quality, efficiency, throughput and redundancy. In addition we invested in our information technology ("IT") infrastructure and business systems to meet Defense Federal Acquisition Regulation Supplement ("DFARS") requirements for cybersecurity. These investments taken together are intended to demonstrate our commitment to meeting DoD expectations for a trusted and secure defense industrial base. Our AMCs in Hudson, New Hampshire, West Caldwell, New Jersey, Oxnard, California, Huntsville, Alabama, Phoenix, Arizona and Torrance, California are strategically located near key customers and are purpose-built for the design, build and test of RF components and subsystems in support of a variety of key customer programs. Our Phoenix facility is built around scalable, repeatable, secure, affordable and predictable manufacturing. Phoenix is a IPC1791 certified secure trusted site, certified to AS9100 quality standards and it utilizes Lean Six Sigma methodologies throughout manufacturing. The facility is designed for efficient manufacturing, enabling our customers to access the best proven technology and high performing, secure processing solutions. This allows for the most repeatable product performance, while optimizing affordability and production responsiveness.
- Long-Standing Industry Relationships. We have established long-standing relationships with defense prime contractors, the U.S. government and other key organizations in the defense industry over our 30 years in the defense electronics industry. Our top customers include Airbus, BAE Systems, Boeing, General Atomics, General Dynamics, L3Harris Technologies, Leonardo, Lockheed Martin Corporation, Northrop Grumman Corporation, RTX Corporation (formerly known as Raytheon Technologies) and the U.S. Navy. Over this period, we have become recognized for our ability to develop new technologies and meet stringent program requirements. We believe we are well-positioned to maintain these high-level customer engagements and enhance them through the additional relationships that our recently acquired businesses have with many of the same customers.
- Operational Execution Experience. The members of our leadership team possess extensive expertise within the aerospace, defense, and technology industries. Their collective history of building management systems and processes has consistently proven to successfully scale and grow a business to enhance overall returns. They also bring experience in effectively implementing operational transformations that deliver strong results and drive long-term value creation. Our leadership team is focused on operational execution, including setting clear priorities, developing

the appropriate processes and systems, and delivering results. We are focused on four priorities to unlock capacity to create value and reinvest for growth. They include: delivering predictable results, building a thriving growth engine, expanding margins, and driving cash release. Our ability to make progress in each of these areas is predicated upon having the highest performing team in our industry, which is the thrust of several significant workforce development initiatives. We are confident that we have assembled the necessary expertise to continue to grow and scale our business.

• Proven M&A Integration Capability. We have developed the internal processes and capability to integrate acquired businesses to deliver value through revenue and cost synergies. Overseen by our operations organization, we leverage our common cultures and values as well as common processes, business systems, tools, channels and manufacturing infrastructure to accelerate growth and improve profitability in our acquired businesses.

# Competition

We operate in a highly competitive marketplace characterized by rapidly changing technology, frequent product performance improvements, increasing speed of deployment to align with warfighters' needs and evolving industry standards and requirements coming from our customers or the DoD. Competition typically occurs at the design stage of a prospective customer's product, where the customer evaluates alternative technologies and design approaches. We work with defense prime contractors as well as directly with the DoD. We help drive subsystem development and deployment in both classified and unclassified environments.

The principal competitive factors in our market are price/performance value proposition, available new products at the time of design win engagement, services and systems integration capability, effective marketing and sales efforts and reputation in the market. Our competitive strengths include rapid, innovative engineering in both hardware and software products, subsystem design expertise, advanced packaging capability to deliver the most optimized SWaP solution possible, our ability to respond rapidly to varied customer requirements and a track record of successfully supporting many high profile programs in the defense market. There are competitors in the different market segments and application types in which we participate. Some of these competitors are larger and have greater resources than us. Some of these competitors compete against us at purely a component or board-level, others at a subsystem level. We also compete with in-house design teams at our customers. The DoD as well as the defense prime contractors are pushing for more outsourcing of subsystem designs to mitigate risk and to enable concurrent design of the platform which ultimately leads to faster time to deployment. We have aligned our strategy to capitalize on that trend and are leveraging our longstanding subsystem expertise to provide this value to our customers.

### **Research and Product Development**

Our R&D efforts are focused on developing new products and subsystems as well as enhancing existing hardware and software products in mission, signal and image processing. Our R&D goal is to fully exploit and maintain our technological lead in the high-performance, real-time sensor processing industry and in mission computing, microelectronics, platform management and other safety-critical applications. Total expenditures for research and development amounted to \$101.3 million, \$108.8 million and \$107.2 million in fiscal years 2024, 2023 and 2022, respectively. As of June 28, 2024, we had 790 employees, including hardware and software architects and design engineers, primarily engaged in engineering, research, and product development activities. These individuals, in conjunction with our sales team, also devote a portion of their time to assisting customers in utilizing our products, developing new uses for these products and anticipating customer requirements for new products.

# Manufacturing

The majority of our products and solutions are produced in AS9100 quality system-certified facilities. The current scope of delivered hardware products includes commercial and industrial class printed circuit board assemblies (modules), complex chassis subsystems, rugged display system and servers and RF and microwave components and subsystems.

Our Phoenix, Arizona facility manufactures our custom microelectronics products in an AS9100 quality system-certified facility. Our Phoenix facility is also an IPC1791 certified and DMEA certified trusted manufacturing facility, primarily focused on advanced secure system-on-chip design, assembly, packaging and test. Our Cypress, California, West Lafayette, Indiana, and Huntsville, Alabama facilities are AS9100 quality systems-certified facilities as well. Our Fremont, California and Alpharetta, Georgia facilities are ISO 9001:2015 quality systems-certified. Our Hudson, New Hampshire and Chantilly, Virginia locations are IPC1791 and AS9100 quality systems-certified facility. Our Andover, Massachusetts and Hudson, New Hampshire facilities design and assemble our processing products and are AS9100 quality systems-certified facilities. Our Andover, Massachusetts facility is also a DMEA-certified trusted design facility and is primarily focused on advanced security features for the processing product line. Our Geneva, Switzerland facility, the headquarters of our international operations, provides electronic design and manufacturing, maintenance and support services and is AS9100 and EASA Part 145 quality systems-certified. Our Silchester, England facility provides engineering, development and integration services and is AS9100 quality systems-certified.

We rely on both vertical integration and subcontracting to contract manufacturers to meet our manufacturing needs. Our Phoenix and Geneva facilities have the manufacturing capabilities to complete the assembly and testing for certain of our embedded multi-computing products. We subcontract as needed a portion of the assembly and testing for our other embedded multi-computing products to contract manufacturers in the U.S. to build to our specifications. Our printed circuit board assemblies and chassis subsystems' manufacturing operations also consist of materials planning and procurement, final assembly and test and logistics (inventory and traffic management). Our vertically integrated subsystem product solutions rely on strong relationships with strategic suppliers to ensure on-time delivery and high quality products. We manage supplier performance and capability through quality audits and stringent source, incoming and/or first article inspection processes. We have a comprehensive quality and process control plan for each of our products, which include a supply chain management program and the use of automated inspection and test equipment to assure the quality and reliability of our products. We perform most post sales service obligations (both warranty and other lifecycle support) in-house through a dedicated service and repair operation. We periodically review our contract manufacturing capabilities to ensure we are optimized for the right mix of quality, affordability, performance and on-time delivery.

Our advanced microelectronics center in Phoenix, Arizona is built around scalable, repeatable, secure, affordable and predictable manufacturing. The high mix, low volume and high complexity/density nature of our products require speed and seamless interaction with all internal functions (as opposed to with an external contract manufacturer) which is a key value proposition of the Phoenix operations facility. Phoenix is also designed for efficient showcasing to customers who at any point wish to access the best proven technology and high performing, secure electronics and processing manufacturing solutions within a broader product company such as Mercury. Proximity and interaction with our internal engineering organization is a significant benefit. This allows for the most repeatable product performance, while optimizing affordability and production responsiveness. The Phoenix AMC also provides manufacturing and assembly for SWaP-optimized multi-chip modules and system-in-package devices. We combine surface-mount, flip chip, die attach, wire bond and rugged 3D packaging on the same devices to provide a swap-optimized solution for our customers.

The Hudson, New Hampshire, West Caldwell, New Jersey and Oxnard, California facilities are specifically aimed at providing scalable manufacturing within our critical businesses. We leverage best practices in design, development, manufacturing and materials handling at these production and subsystems integration facilities. These facilities include the design, build and test of both RF and microwave components and subsystems in support of a variety of key customer programs. Our Alpharetta, Georgia facility offers active matrix liquid crystal display systems which enhances the highly sophisticated human/ machine interface. Our facility in Torrance, California is an AS9100 and AS9110C facility that offers Avionics Safety-Certifiable subsystems. Our facility in Upper Saddle River, New Jersey is ISO 9001:2015 certified and offers digital signal processing products. Our facility in Gulf Breeze, Florida is AS9100 certified and offers rugged avionics and electronics. Our facility in Norcross, Georgia is AS9100 certified and offers RF and microwave products.

Although we generally use standard parts and components for our products, certain components, including custom designed Application-Specific Integrated Circuits ("ASICs"), static random access memory, FPGAs, microprocessors and other third party chassis peripherals (single board computers, power supplies, blowers, etc.), are currently available only from a single source or from limited sources.

We also design, develop and manufacture digital radio frequency memory units for a variety of modern electronic warfare applications, as well as radar environment simulation and test systems for defense and intelligence applications. We develop high performance signals intelligence payloads and EO/IR technologies for small UAV platforms as well as powerful onboard UAV processor systems for real-time wide area motion imagery.

# **Intellectual Property and Proprietary Rights**

We hold a broad collection of intellectual property rights to protect our proprietary technology and our brand. This includes patents, designs, copyrights, trademarks and trade secrets in the U.S. and various foreign countries. Although we believe the ownership of such intellectual property rights is an important factor in differentiating our business and that our success depends in part on such ownership, we rely primarily on the innovation skills and technical expertise of our employees.

We regularly file patent and trademark applications and continuations to protect innovations arising from our research and development. We also rely on a combination of trade secret, copyright and trademark laws, as well as contractual agreements, to safeguard our proprietary rights in technology and products. In seeking to limit access to sensitive information to the greatest practical extent, we routinely enter into confidentiality and assignment of invention agreements with each of our employees and consultants and nondisclosure agreements with our customers and vendors.

We have licensed in the past, and expect that we may license in the future, certain of our rights to other parties. Some of our products are designed to include intellectual property owned by third parties. It may be necessary in the future to seek or renew licenses to various aspects of our products, processes and services.

Over time, we have accumulated a meaningful portfolio of issued and registered intellectual property rights. No single intellectual property right is solely responsible for protecting our products, processes and services. We believe the duration of our intellectual property rights is adequate relative to the expected lives of our products, processes and services.

### Backlog

As of June 28, 2024, we had a backlog of orders aggregating approximately \$1.3 billion, of which \$758.9 million is expected to be recognized as revenue within the next twelve months. As of June 30, 2023, backlog was approximately \$1.1 billion. Our backlog is comprised of accepted purchase orders for which a majority are fully funded. Orders included in backlog may be cancelled or rescheduled by customers, although the customer may incur cancellation penalties depending on the timing of the cancellation. A variety of conditions, both specific to the individual customer and generally affecting the customer's industry, may cause customers to cancel, reduce or delay orders that were previously made or anticipated. We cannot assure the timely replacement of canceled, delayed or reduced orders.

# **Employees**

At June 28, 2024, we employed a total of 2,364 people excluding contractors, including 790 in research and development, 126 in sales and marketing, 1,160 in manufacturing and customer support and 288 in general and administrative functions. We have 137 employees located outside of the United States and 2,227 located in the United States. We also use contractors on an as-needed basis.

# **Human Capital**

At Mercury, our people are at the center of everything we do in driving Innovation That Matters® by and for People Who Matter. We recognize that Mercury will succeed only if our employees are engaged, given an opportunity to develop and provided with a safe workplace that values diverse perspectives from a population that represents our communities. Our Board of Directors provides oversight of our people practices, including regularly reviewing workforce metrics such as those described below. Additional data related to these metrics can be found on our website at www.mrcy.com under the Company – Environmental, Social and Governance tab (our "Website").

- Employee Overview: As of June 28, 2024, we had 2,364 employees around the globe. Our primary operations are in the U.S. with 2,227 employees and we operate offices in 11 states. Outside the U.S., we had 137 employees, and operate from locations in Canada, Spain, Switzerland, and the United Kingdom. No employees are covered by any collective bargaining or similar agreements.
- Culture and Employee Engagement: We believe our workplace culture drives engagement that turns ideas into action, delivering trusted and secure solutions at the speed of innovation. We regularly seek employee input through engagement surveys, the results of which drive meaningful and timely action, as appropriate, from our leadership team and people leaders across the Company. Participation in our most recent employee engagement survey in October 2023 remained strong at 75%. Our investment in our employees extends to our workplaces. For fiscal 2024, we invested over \$34.3 million to upgrade our locations to world-class facilities. We also encourage employees to give back to our communities. Mercury sponsors and participates in a number of philanthropic events in our communities, such as Run to Home Base, an annual event that funds clinical care and support for veterans and their families who are impacted by the invisible wounds of war.
- Training and Development: Life-long learning is encouraged at Mercury through our offering of LinkedIn Learning, tuition reimbursement and other employee development opportunities. We are deeply invested in building the next generation of engineers and scientists with our internship and co-op programs. We offer a two-year engineering rotational program to recent graduates in electrical, firmware, software, RF and systems engineering disciplines. During the program, employees gain insight and experience rotating through multiple business units and engineering disciplines and upon program completion are matched with a position. We also have formal programs to further develop our leaders, at various levels: leadership cohorts, mentor programs, team excellence discussions, training programs for new managers and regular engagement with our executive leadership team.
- Pay and Benefits: We seek competitiveness and fairness in total compensation with reference to external pay data and internal equity. We also offer a variety of well-being programs to support our employees and their families with healthy living. These programs include paid time off, paid parental leave, health insurance coverage, voluntary benefits (including pet insurance and caregiver support), company contributions to retirement savings and employee assistance and work-life programs. In addition, we offer employees less traditional benefits to support employee well-being such as access to fitness and meditation apps, as well as an online platform through which employees participate in healthy living challenges and earn financial rewards.
- Environmental, Health and Safety: On our Website, we disclose environmental stewardship, quality and safety information, including OSHA injury data. We received an Environment, Social, and Governance ("ESG") score

of AAA on the Morgan Stanley Capital International ("MSCI") ESG Rating scale during 2024, placing us in the top 5% of their ratings group for aerospace and defense.

• Diversity, Equity & Inclusion: Our Website discloses detailed workplace data surrounding our gender composition, racial/ethnic representation and turnover data. As of June 28, 2024, women and racially/ethnically diverse employees represented 30% and 44%, respectively, of our workforce. Development of a broad talent pipeline is a business imperative at Mercury and critical to our ability to drive innovation and improve long-term results. We have established relationships with job networks and educational institutions to proactively attract a diverse pool of talent. Our employees are afforded opportunities to cultivate diversity, equity, and inclusion both within Mercury and our industry. For example, we sponsor, and our leaders participate in, the annual Simmons Leadership Conference which has the goal of preparing the next generation of female leaders and furthering equality in the workplace. We also regularly conduct pay equity assessments and makes adjustments to pay levels for employees in protected classes, as appropriate, as a result of such assessments.

### **Customers**

L3Harris comprised 12% of our revenues in fiscal 2024, and accounted for less than 10% of our revenues in fiscal 2023 and 2022. RTX Corporation comprised 10%, 14%, and 14% of our revenues in each of the fiscal years 2024, 2023 and 2022, respectively. Lockheed Martin comprised 11%, 13%, and 10% of our revenues in each of the fiscal years 2024, 2023 and 2022, respectively. The United States Navy accounted for less than 10% of our revenues in fiscal 2024 and 2023, and comprised 14% of our revenues in fiscal year 2022. Northrop Grumman accounted for less than 10% of our revenues in fiscal 2024, 11% in fiscal 2023, and less than 10% in fiscal year 2022. While sales to each of these customers may comprise 10% or more of our annual revenue, the sales to these customers are spread across multiple programs and platforms. For the fiscal years ended 2024, 2023 and 2022, we had no single program that represented 10% or more of our revenues.

# **Corporate Headquarters and Incorporation**

Our corporate headquarters is located in Andover, Massachusetts. Mercury Systems, Inc. was incorporated in Massachusetts in 1981.

# Financial Information about Geographic Scope

Information about revenue we receive within and outside the U.S. can be found in Note P - Operating Segment, Geographic Information and Significant Customers - to the accompanying Consolidated Financial Statements included elsewhere in this Annual Report on Form 10-K.

# WEBSITE

We maintain a website at www.mrcy.com. We make available on our website, free of charge, our annual report on Form 10-K, quarterly reports on Form 10-Q, and current reports on Form 8-K, including exhibits and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as amended, as soon as reasonably practicable after such reports are electronically filed with, or furnished to, the Securities and Exchange Commission ("SEC"). Our code of business conduct and ethics is also available on our website. We intend to disclose any future amendments to, or waivers from, our code of business conduct and ethics within four business days of the waiver or amendment through a website posting or by filing a current report on Form 8-K with the SEC. Information contained on our website does not constitute part of this report. Our reports filed with, or furnished to, the SEC are also available on the SEC's website at www.sec.gov.

Investors and others should note that we announce material financial information using our website (www.mrcy.com), SEC filings, press releases, public conference calls, webcasts, and social media, including X (formerly Twitter) (X.com/mrcy) and LinkedIn (www.linkedin.com/company/mercury-systems). Therefore, we encourage investors and others interested in Mercury to review the information we post on the social media and other communication channels listed on our website.

# ITEM 1A. RISK FACTORS:

# Risks Related to Business Operations and Our Industry

We depend heavily on defense electronics programs that incorporate our products and services, which may be only partially funded and are subject to potential termination and reductions and delays in government spending.

Sales of our products and services, primarily as a subcontractor or team member with defense prime contractors, and in some cases directly, to the U.S. government and its agencies, as well as foreign governments and agencies, accounted for approximately 95%, 98% and 97% of our total net revenues in fiscal years 2024, 2023, and 2022, respectively. Our products and services are incorporated into many different domestic and international defense programs. Over the lifetime of a defense program, the award of many different individual contracts and subcontracts may impact our products' requirements. The

funding of U.S. government programs is subject to Congressional appropriations. Although multiple-year contracts may be planned in connection with major procurements, Congress generally appropriates funds on a fiscal year basis even though a program may continue for many years. Consequently, programs are often only partially funded initially, and additional funds are committed only as Congress makes further appropriations and prime contracts receive such funding. The reduction or delay in funding or termination of a government program in which we are involved could result in a loss of or delay in receiving anticipated future revenues attributable to that program and contracts or orders received. The U.S. government could reduce or terminate a prime contract under which we are a subcontractor or team member irrespective of the quality of our products or services. The termination of a program or the reduction in or failure to commit additional funds to a program in which we are involved could negatively impact our revenues and have a material adverse effect on our financial condition and results of operations. The U.S. defense budget frequently operates under a continuing budget resolution, which increases revenue uncertainty and volatility, and 2024 being a Presidential election year increases the likelihood of operating under a continuing budget resolution. For fiscal 2025 and beyond, the potential for gridlock in Congress, a continuing budget resolution, budget sequestration, a U.S. government shutdown, or the crowding out of defense funding due to historically high budget deficits or changes in national spending priorities toward non-defense budget items could adversely impact our revenues and increase uncertainty in our business and financial planning.

## Economic conditions could adversely affect our business, results of operations, and financial condition.

World economic conditions and financial markets have, at times, experienced turmoil which could have material adverse impacts on our financial condition or our ability to achieve targeted results of operations due to:

- reduced and delayed demand for our products;
- increased risk of order cancellations or delays;
- downward pressure on the prices of our products;
- · greater difficulty in collecting accounts receivable; and
- risks to our liquidity, including the possibility that we might not have access to our cash and short-term investments or to our line of credit when needed.

Further, the funding of the defense programs that incorporate our products and services is subject to the overall U.S. government budget and appropriation decisions and processes, which are driven by numerous factors beyond our control, including geo-political, macroeconomic, public health and political conditions. We are unable to predict the likely duration and severity of adverse economic conditions in the United States and other countries, but the longer the duration or the greater the severity, the greater the risks we face in operating our business. The near-term potential for recessionary economic conditions and possible stagflation (persistent high inflation and stagnant economic demand) presents increased risks to our business.

# Price inflation for labor and materials could adversely affect our business, results of operations and financial condition.

We have experienced considerable price inflation in our costs for labor and materials during recent years, which adversely affected our business, results of operations and financial condition. We may not be able to pass through inflationary cost increases under our existing firm fixed price contracts and we may only be able to recoup a portion of our increased costs under our reimbursement-type contracts. Our ability to raise prices to reflect increased costs may be limited by competitive conditions in the market for our products and services. We continue to work to mitigate such pressures on our business operations as they develop.

# The loss of one or more of our largest customers, programs, or applications could adversely affect our results of operations.

We are dependent on a small number of customers for a large portion of our revenues. A significant decrease in the sales to or loss of any of our major customers would have a material adverse effect on our business and results of operations. In fiscal 2024, L3Harris accounted for 12% of our total net revenues, Lockheed Martin accounted for 11% of our total net revenues, and RTX Corporation accounted for 10% of our total net revenues. In fiscal 2023, RTX Corporation accounted for 11% of our total net revenues, Lockheed Martin accounted for 13% of our total net revenues, and Northrop Grumman accounted for 11% of our total net revenues. In fiscal 2022, RTX Corporation accounted for 14% of our total net revenues, the U.S. Navy accounted for 14% of our total net revenues, and Lockheed Martin accounted for 10% of our total net revenues. Customers in the defense market generally purchase our products in connection with government programs that have a limited duration, leading to fluctuating sales to any particular customer in this market from year to year. In addition, our revenues are largely dependent upon the ability of customers to develop and sell products that incorporate our products. No assurance can be given that our customers will not experience financial, technical or other difficulties that could adversely affect their operations and, in turn, our results of operations. Additionally, on a limited number of programs the customer has co-manufacturing rights which could lead to a shift of production on such a program away from us which in turn could lead to lower revenues.

Going forward, we believe the F-35, Filthy Buzzard, F/A-18, LTAMDS, THAAD, AMCS and Aegis programs could be a large portion of our future revenues in the coming years, and the loss or cancellation of these programs could adversely affect our future results. Further, new programs may yield lower margins than legacy programs, which could result in an overall reduction in gross margins.

If we are unable to respond adequately to our competition or to changing technology, we may lose existing customers and fail to win future business opportunities. The emergence of commodity-type products as acceptable substitutes for certain of our products may cause customers to delay purchases or seek alternative solutions.

The markets for our products are highly competitive and are characterized by rapidly changing technology, frequent product performance improvements, and evolving industry standards. Competitors may be able to offer more attractive pricing, develop products with performance features that are superior to our products, or offer higher quality or superior on time delivery, resulting in reduced demand for our products. Recently, our on-time delivery has suffered due in part to operational challenges. We may be unable to keep pace with competitors' marketing and the lack of visibility in the marketplace may negatively impact design wins, bookings, and revenues. Customers may also decide to reduce costs and accept the least costly technically acceptable alternative to our products or services. In addition, customers may decide to insource products that they have outsourced to us. Due to the rapidly changing nature of technology, we may not become aware in advance of the emergence of new competitors into our markets. The emergence of new competitors in our markets could result in the loss of existing customers or programs and may have a negative impact on our ability to win future business. Perceptions of Mercury as a high-cost provider or for late deliveries could cause us to lose existing customers or programs or fail to win new business. Further, our lack of strong engagements with important government-funded laboratories (e.g. DARPA, MIT Lincoln Labs, MITRE) may inhibit our ability to become subsystem solution design partners with our defense prime customers.

Our products are often designed for operating under physical constraints such as limited space, weight, and electrical power. Furthermore, these products are often designed to be "rugged," that is, to withstand enhanced environmental stress such as extended temperature range, shock, vibration, and exposure to sand or salt spray. Historically these requirements have often precluded the use of less expensive, readily available commodity-type systems typically found in more benign non-military settings. With continued microprocessor evolution, low-end systems could become adequate to meet the requirements of an increased number of the lesser-demanding applications within our target markets. Commercial server manufacturers and other low-end single-board computer, or new competitors, may attempt to penetrate the high-performance market for aerospace and defense electronics systems. Factors that may increase the acceptability of commodity-type products in some aerospace and defense platforms include improvements in the physical properties and durability of such alternative products, combined with the relaxation of physical and ruggedness requirements by the military due to either a reevaluation of those requirements or the installation of products in a more highly environmentally isolated setting. These developments could negatively impact our revenues and have a material adverse effect on our business and operating results.

# Competition from existing or new companies could cause us to experience downward pressure on prices, fewer customer orders, reduced margins, the inability to take advantage of new business opportunities and the loss of market share.

We compete in highly competitive industries, and our customers generally extend the competitive pressures they face throughout their respective supply chains. Additionally, our markets are facing increasing industry consolidation, resulting in larger competitors who have more market share putting more downward pressure on prices and offering a more robust portfolio of products and services. We are subject to competition based upon product design, performance, pricing, quality, on time delivery, and support services. Our product performance, engineering expertise, and product quality have been important factors in our growth. While we try to maintain competitive pricing on those products that are directly comparable to products manufactured by others, in many instances our products will conform to more exacting specifications and carry a higher price than analogous products. Many of our customers and potential customers have the capacity to design and internally manufacture products that are similar to our products. We face competition from research and product development groups and the manufacturing operations of current and potential customers, who continually evaluate the benefits of internal research, product development, and manufacturing versus outsourcing. Our defense prime contractor customers could decide to pursue one or more of our product development areas as a core competency and insource that technology development and production rather than purchase that capability from us as a supplier. This competition could result in fewer customer orders and a loss of market share.

# We may be unable to obtain critical components from suppliers, which could disrupt or delay our ability to deliver products to our customers.

Several components used in our products are currently obtained from sole-source suppliers. We are dependent on a limited number of key vendors for certain critical components such as FPGAs, ASICS, processors, memory products and specialty glass. Generally, suppliers may terminate their contracts with us without cause upon 30 days' notice and may cease offering their products upon 180 days' notice. If any of our sole-source suppliers limits or reduces the sale of these components, we may be unable to fulfill customer orders in a timely manner or at all. These sole-source and other suppliers are each subject

to quality and performance issues, materials shortages, excess demand, reduction in capacity, and other factors that may disrupt the flow of goods to us or to our customers, which would adversely affect our business and customer relationships. There can be no assurance that these suppliers will continue to meet our requirements. If supply arrangements are interrupted, we may not be able to find another supplier on a timely or satisfactory basis. We may incur significant set-up costs and delays in manufacturing should it become necessary to replace any key vendors due to work stoppages, shipping delays, financial difficulties, natural or manmade disasters or other factors. Carrying increased levels of inventory also increases our potential risk of future inventory obsolescence.

In addition, given the current political environment in the United States and Europe, the imposition of tariffs on the import of components from other countries, including China, could directly or, because of their effect on the prices of other components or suppliers themselves, indirectly raise the same risks described above.

# We may not be able to effectively manage our relationships with contract manufacturers.

We may not be able to effectively manage our relationship with contract manufacturers, and the contract manufacturers may not meet future requirements for timely delivery. We rely on contract manufacturers to build hardware sub-assemblies for certain of our products in accordance with our specifications. During the normal course of business, we may provide demand forecasts to contract manufacturers several months prior to scheduled delivery of our products to customers. If we overestimate requirements, the contract manufacturers may assess cancellation penalties or we may be left with excess inventory, which may negatively impact our earnings. If we underestimate requirements, the contract manufacturers may have inadequate inventory, which could interrupt manufacturing of our products and result in delays in shipment to customers and revenue recognition. Contract manufacturers also build products for other companies, and they may not have sufficient quantities of inventory available or sufficient internal resources to fill our orders on a timely basis or at all.

# We are exposed to risks associated with international operations and markets.

We market and sell products in international markets and have sales offices and manufacturing and/or engineering facilities and subsidiaries in Switzerland, Spain, the United Kingdom and Canada. Revenues from international operations accounted for 5%, 5%, and 4%, of our total net revenues in fiscal 2024, 2023, and 2022, respectively. We also ship directly from our U.S. operations to international customers. There are inherent risks in transacting business internationally, including:

- changes in applicable laws and regulatory requirements;
- export and import restrictions, including export controls relating to technology and sanctioned parties;
- tariffs and other trade barriers;
- less favorable intellectual property laws;
- difficulties in staffing and managing foreign operations;
- longer payment cycles;
- problems in collecting accounts receivable;
- adverse economic conditions in foreign markets;
- political instability;
- fluctuations in currency exchange rates, which may lead to lower operating margins, or may cause us to raise prices which could result in reduced revenues;
- expatriation controls; and
- potential adverse tax consequences.

There can be no assurance that one or more of these factors will not have a material adverse effect on our future international activities and, consequently, on our business and results of operations.

We have a pension plan (the "Plan") for Swiss employees, mandated by Swiss law. Since participants of the Plan are entitled to a defined rate of interest on contributions made, the Plan meets the criteria for a defined benefit plan under U.S. GAAP. The Plan, an independent pension fund, is part of a multi-employer plan with unrestricted joint liability for all participating companies and the economic interest in the Plan's overfunding or underfunding is allocated to each participating company based on an allocation key determined by the Plan. U.S. GAAP requires an employer to recognize the funded status of the defined benefit plan on the balance sheet, which we have presented in other long-term liabilities on our Consolidated Balance Sheets at June 28, 2024. The funded status may vary from year to year due to changes in the fair value of the Plan's assets and variations on the underlying assumptions in the Plan and we may have to record an increased liability as a result of fluctuations in the value of the Plan's assets. As of June 28, 2024, we had a liability of \$5.0 million in Other non-current liabilities representing the net under-funded status of the Plan.

In addition, we must comply with the Foreign Corrupt Practices Act, or the FCPA, and the anti-corruption laws of the countries in which we operate. Those laws generally prohibit the giving of anything of value to win business. If we or our intermediaries fail to comply with the requirements of international applicable anti-corruption laws, governmental authorities in the United States or the countries in which we operate could seek to impose civil and criminal penalties, or restrict or limit our ability to do business, which could have a material adverse effect on our business, results of operations, financial condition, and cash flows.

# If we are unable to respond to technological developments and changing customer needs on a timely and cost-effective basis, our results of operations may be adversely affected.

Defense customers demand frequent technological improvements as a means of gaining military advantage. Military planners have historically funded significantly more design projects than actual deployments of new equipment, and those systems that are deployed tend to contain the components of the subcontractors selected to participate in the design process. To participate in the design of new defense electronics systems, we must demonstrate the ability to deliver superior technological performance on a timely and cost-effective basis. There can be no assurance that we will secure an adequate number of design wins in the future, that the equipment in which our products are intended to function will eventually be deployed in the field, or that our products will be included in such equipment if it eventually is deployed.

The design-in process is typically lengthy and expensive, and there can be no assurance that we will be able to continue to meet the product specifications of customers in a timely and adequate manner. In addition, any failure to anticipate or respond adequately to changes in technology, customer preferences and future order demands, or any significant delay in product developments, product introductions, or order volume, could negatively impact our financial condition and results of operations, including the risk of inventory obsolescence. If we build inventory ahead of the associated customer contractual demand, we may face write downs of such inventory. This risk is further enhanced if we purchase end of life material to support a product line or program prior to receiving a customer commitment to pay for such material. Because of the complexity of our products, including the complexity of the related manufacturing processes, we have experienced delays from time to time in completing products on a timely basis. For example, during our fiscal year ended June 28, 2024, we stopped production for several months on multiple programs utilizing a common processing architecture in our secure computing product line while we conducted a root cause corrective analysis on the product design and manufacturing process. This delay and the associated costs had a material impact on our financial condition and results of operations for the fiscal year and negatively impacted our reputation with the customers for such products.

# Our need for continued or increased investment in R&D may increase expenses and reduce our profitability.

Our business is characterized by the need for continued investment in R&D. If we fail to invest sufficiently in R&D, our products could become less attractive to potential customers and our business and financial condition could be materially and adversely affected. As a result of the need to maintain spending levels in this area and the difficulty in reducing costs associated with R&D, our operating results could be materially harmed if our R&D efforts fail to result in new products or if revenues fall below expectations. As a result of our commitment to invest in R&D, spending levels of R&D expenses as a percentage of revenues may fluctuate in the future. In addition, defense prime contractors could increase their requirement for subcontractors, like us, to increase their share in the R&D costs for new programs and design wins.

# Our results of operations are subject to fluctuation from period to period and may not be an accurate indication of future performance.

While our revenues are generated through the sale of products and services across more than 300 programs with no single program contributing more than 10% of our annual revenues, we have experienced fluctuations in operating results due to shifts in timing or quantities across certain of our larger programs. Customers specify delivery date requirements that coincide with their need for our products and services on the programs in which we participate. Because these customers may use our products and services in connection with a variety of defense programs or other projects with different sizes and durations, a customer's orders for one quarter generally do not indicate a trend for future orders by that customer or on that program. As such, we cannot always accurately plan our manufacturing, inventory and working capital requirements. As a result, if orders and shipments differ from what we predict, we may incur additional expenses and build excess inventory, which may require additional reserves and allowances and reduce our working capital and operational flexibility. Any significant change in our customers' purchasing patterns could have a material adverse effect on our operating results and reported earnings per share for a particular quarter. Results of operations in any period should not be considered indicative of the results to be expected for any future period.

High quarterly book-ship ratios pressure our inventory and cash flow management, necessitating increased inventory balances to ensure quarterly revenue attainment. Increased inventory balances tie up additional capital, limiting our operational flexibility. Some of our customers may have become conditioned to wait until the end of a quarter to place orders in the

expectation of receiving a discount. Customers conditioned to seek quarter-end discounts increase risk and uncertainty in our financial forecasting and decrease our margins and profitability.

Our quarterly results may be subject to fluctuations resulting from other factors, including:

- delays in completion of internal product development projects;
- delays in shipping hardware and software or licensing design intellectual property;
- delays in acceptance testing by customers;
- a change in the mix of products sold;
- changes in customer or program order patterns;
- production delays due to quality problems;
- failure to achieve or maintain quality certifications, such as AS9100;
- nonconformity with contractual or other requirements, including the need to respond to corrective action requests;
- inability to scale quick reaction capability products due to low product volume;
- shortages and increased costs of components;
- delays due to the implementation of new tariffs or other trade barriers;
- the timing of product line transitions;
- declines in quarterly revenues from previous generations of products following announcement of replacement products containing more advanced technology; and
- changes in estimates of completion (EAC) on fixed price engagements, which represent a substantial and increasing percentage of our business.

In addition, from time to time, we have entered into contracts, referred to as development contracts, to engineer a specific solution based on modifications to standard products. Gross margins from development contract revenues are typically lower than gross margins from standard product revenues. We intend to continue to enter into development contracts and anticipate that the gross margins associated with development contract revenues will continue to be lower than gross margins from standard product sales.

Many of our contracts require that our facilities remain certified at the AS91000 or ISO9001 level in order to ship products from the relevant facility. Failure to obtain or maintain the required certification may require a waiver by the customer for shipments to continue until the certification is obtained. There can be no assurance that we will receive any customer waivers if a required certification is lost or delayed.

Another factor contributing to fluctuations in our quarterly results is the fixed nature of expenditures on personnel, facilities, information technology and marketing programs. Expense levels for these programs are based, in significant part, on expectations of future revenues. If actual quarterly revenues are below management's expectations, our results of operations could be adversely affected.

Further, the preparation of financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. The percentage of our total revenue using over time revenue accounting has increased in recent years due to M&A transactions and the movement in our business toward subsystem development. Over time revenue recognition is more reliant on estimates than the accounting for our component sales. Actual results could differ from those estimates, and changes in estimates in subsequent periods could cause our results of operations to fluctuate.

# We rely on the significant experience and specialized expertise of our senior management, engineering and operational staff and must retain and attract qualified and highly skilled personnel to grow our business successfully.

Our performance is substantially dependent on the continued services and performance of our senior management and our highly qualified team of engineers and operational staff, many of whom have numerous years of experience, specialized expertise in our industry and security clearances required for certain defense projects. If we are not successful in hiring and retaining such employees, we may not be able to extend or maintain our engineering and operational expertise and our future product development efforts could be adversely affected. Competition for hiring these employees is intense, especially individuals with specialized skills and security clearances required for our business, and we may be unable to hire and retain enough staff to implement our growth strategy or to perform on our existing commitments.

If we experience a disaster or other business continuity problem, we may not be able to recover successfully, which could cause material financial loss, loss of human capital, regulatory actions, reputational harm, or legal liability.

If we experience a local or regional disaster or other business continuity problem, such as an earthquake, terrorist attack, pandemic or other natural or man-made disaster, our continued success will depend, in part, on the availability of our personnel, our facilities and the proper functioning of our network, telecommunication and other business systems and operations. As we grow our operations, the potential for natural or man-made disasters, political, economic, or infrastructure instabilities, or other country- or region-specific business continuity risks increases.

# Risks Related to M&A and Acquisition Integration

# Implementation of our growth strategy may not be successful, which could affect our ability to increase revenues and profits.

Our growth strategy includes developing new products, adding new customers and programs within our existing markets, and entering new markets both domestically and internationally, developing our manufacturing capabilities, as well as identifying and integrating acquisitions and achieving revenue and cost synergies and economies of scale. Our ability to compete in new markets will depend upon several factors including, among others:

- our ability to create demand for products in new markets;
- our ability to respond to changes in our customers' businesses by updating existing products and introducing, in a timely fashion, new products which meet the needs of our customers;
- our ability to increase our market visibility and penetration with prime defense contractors, government agencies and government funded laboratories;
- the quality of our new products;
- our ability to respond rapidly to technological changes;
- our ability to increase utilization of our manufacturing capacity as well as our ability to deliver on schedule and on budget; and
- our ability to successfully integrate acquisitions and achieve revenue and cost synergies and economies of scale.

The failure to do any of the foregoing could have a material adverse effect on our business, financial condition, and results of operations. In addition, we may face competition in these new markets from various companies that may have substantially greater research and development resources, marketing and financial resources, manufacturing capability and/or customer support organizations.

### Acquisitions may adversely affect our financial condition.

As part of our strategy for growth, we may explore acquisitions or strategic alliances, which ultimately may not be completed or be beneficial to us. While we expect any acquisitions to result in synergies and other financial and operational benefits, we may be unable to realize these synergies or other benefits in the timeframe that we expect or at all. The integration process may be complex, costly and time consuming. Acquisitions may pose risks to our business, including:

- problems and increased costs in connection with the integration of the personnel, business systems, operations, technologies, or products of the acquired businesses;
- layering of integration activity due to multiple overlapping acquisitions;
- unanticipated issues, expenses, charges, or liabilities related to the acquisitions;
- failure to implement our business plan for the combined business or to achieve anticipated increases in revenues and profitability;
- diversion of management's attention from our organic business;
- adverse effects on business relationships with suppliers and customers, including the failure to retain key customers and programs;
- acquired assets becoming impaired as a result of technical advancements or worse-than-expected performance by the acquired company;
- failure to rationalize supply chain, manufacturing capacity, locations, logistics and operating models to achieve
  anticipated economies of scale, or disruptions to supply chain, manufacturing, or product design operations during
  the combination of facilities;

- failure to rationalize business, information and communication systems and to expand the IT infrastructure and security protocols throughout the enterprise;
- volatility associated with accounting for earn-outs in a given transaction;
- entering markets in which we have no, or limited, prior experience;
- environmental liabilities at current or previous sites of the acquired business;
- poor compliance programs pre-acquisition at acquired companies, which may lead to liabilities for violations, or impact the business acquired when placed under our compliance programs;
- unanticipated changes in applicable laws or regulations;
- potential loss of key employees;
- the impact of any assumed legal proceedings; and
- adverse effects on our internal control over financial reporting before the acquiree's complete integration into our control environment.

In addition, in connection with any acquisitions or investments we could:

- issue stock that would dilute our existing shareholders;
- incur debt and assume liabilities;
- obtain financing on unfavorable terms, or not be able to obtain financing on any terms at all;
- incur amortization expenses related to acquired intangible assets or incur large and immediate write-offs;
- incur large expenditures related to office closures of the acquired companies, including costs relating to the
  termination of employees and facility and leasehold improvement charges resulting from our having to vacate the
  acquired companies' premises; and
- reduce the cash that would otherwise be available to fund operations or for other purposes.

We may not be able to maintain the levels of revenue, earnings, or operating efficiency that we and our prior acquisitions had achieved or might achieve separately. You should not place undue reliance on any anticipated synergies. In addition, our competitors could try to emulate our strategy, leading to greater competition for acquisition targets which could lead to larger competitors if they succeed in emulating our strategy.

# We may incur substantial indebtedness.

On February 28, 2022, we amended our existing revolving credit facility ("the Revolver") to increase and extend the borrowing capacity to a \$1.1 billion, 5-year revolving credit line, with the maturity extended to February 28, 2027. As of June 28, 2024, we had \$591.5 million of outstanding borrowings on the Revolver. On August 13, 2024, we further amended our Revolver, permanently decreased borrowing capacity to \$900 million, with a temporary reduction in credit availability to \$750.0 million until we meet a minimum consolidated EBITDA level of \$75.0 million excluding (a) adjustments for cost savings, operating expense reductions and synergies, (b) estimate at completion ("EAC") charges and other non-cash expenses, charges, and losses addbacks and (c) deducts to reverse EAC charges previously added back, in each case for a last twelve-month period. The Revolver accrues interest, at our option, at floating rates tied to Secured Overnight Financing Rate ("SOFR") or the prime rate plus an applicable percentage. The applicable percentage is set at SOFR plus 1.25% and is established pursuant to a pricing grid based on our total net leverage ratio. We are exposed to the impact of interest rate changes primarily through our borrowing activities. Subject to the limits contained in the Revolver, we may incur substantial additional debt from time to time to finance working capital, capital expenditures, investments or acquisitions, or for other purposes. If we do so, the risks related to our debt could intensify. Specifically, our debt could have important consequences to our investors, including the following:

- making it more difficult for us to satisfy our obligations under our debt instruments, including, without limitation, the Revolver; and if we fail to comply with these requirements, an event of default could result;
- limiting our ability to obtain additional financing to fund future working capital, capital expenditures, acquisitions, or other general corporate requirements;
- requiring a substantial portion of our cash flows to be dedicated to debt service payments instead of other purposes, thereby reducing the amount of cash flows available for working capital, capital expenditures, acquisitions and other general corporate purposes;
- increasing our vulnerability to general adverse economic and industry conditions;

- exposing us to the risk of increased interest rates as certain of our borrowings have variable interest rates, which could increase the cost of servicing our financial instruments and could materially reduce our profitability and cash flows;
- limiting our flexibility in planning for and reacting to changes in the industry in which we compete;
- placing us at a disadvantage compared to other, less leveraged competitors; and
- increasing our cost of borrowing.

In addition, the Revolver contains restrictive covenants that may limit our ability to engage in activities that are in our long-term best interest. Our failure to comply with those covenants could result in an event of default which, if not cured or waived, could result in the acceleration of all our debt. And, if we were unable to repay the amounts due and payable, the lenders under the Revolver could proceed against the collateral granted to them to secure that indebtedness.

Increases in interest rates would increase the cost of servicing our financial instruments with exposure to interest rate risk and could materially reduce our profitability and cash flows. Assuming that we had \$100.0 million of floating rate debt outstanding, our annual interest expense would change by approximately \$1.0 million for each 100 basis point increase in interest rates. We may also incur costs related to interest rate hedges, including the termination of any such hedges. As of June 28, 2024, we had a swap agreement in effect that fixed \$300.0 million of the total \$591.5 million of outstanding borrowings under the Revolver at a rate of 4.66%. The movement of interest rates would affect the value of such swap agreement.

Limited or negative free cash flow as we have recently experienced, if not improved, could eventually lead to a challenge in servicing our debt.

# We have a significant amount of goodwill and intangible assets on our consolidated financial statements that are subject to impairment based upon future adverse changes in our business or prospects.

At June 28, 2024, the carrying values of goodwill and identifiable intangible assets on our balance sheet were \$938.1 million and \$250.5 million, respectively. We evaluate indefinite lived intangible assets and goodwill for impairment annually in the fourth quarter, or more frequently if events or changes in circumstances indicate that the asset might be impaired. During the quarter ended March 29, 2024, we assessed potential triggering events for goodwill impairment and concluded that there was a triggering event for the Mission Systems reporting unit. Based on the quantitative evaluation during the quarter ended March 29, 2024 we determined that the Mission Systems reporting unit had an estimated fair value in excess of carrying value.

We evaluate indefinite lived intangible assets and goodwill for impairment annually in the fourth quarter, or more frequently if events or changes in circumstances indicate that the asset might be impaired. During the quarter ended March 29, 2024, we assessed potential triggering events for goodwill impairment and concluded that there was a triggering event for the Mission Systems reporting unit. Based on the quantitative evaluation during the quarter ended March 29, 2024 we determined that the Mission Systems reporting unit had an estimated fair value in excess of carrying value.

Indefinite lived intangible assets are impaired and goodwill impairment is indicated when their book value exceeds fair value. We also review finite-lived intangible assets and long-lived assets when indications of potential impairment exist, such as a significant reduction in undiscounted cash flows associated with the assets. Should the fair value of our long-lived assets decline because of reduced operating performance, market declines, or other indicators of impairment, a charge to operations for impairment may be necessary. The value of goodwill and intangible assets from the allocation of purchase price from our acquisitions will be derived from our business operating plans and is susceptible to an adverse change in demand, input costs or general changes in our business or industry and could require an impairment charge in the future.

# Risks Related to Legal, Regulatory and Compliance Matters

### We face risks and uncertainties associated with defense-related contracts

Whether our contracts are directly with the U.S. government, a foreign government, or one of their respective agencies, or indirectly as a subcontractor or team member, our contracts and subcontracts are subject to special risks. For example:

- Our contracts with the U.S. and foreign governments and their defense prime contractors and subcontractors are subject to termination either upon default by us or at the convenience of the government or contractor if, among other reasons, the program itself has been terminated. Termination for convenience provisions generally only entitle us to recover costs incurred, settlement expenses and profit on work completed prior to termination.
- Because we contract to supply goods and services to the U.S. and foreign governments and their prime and subcontractors, we compete for contracts in a competitive bidding process. We may not be awarded the contract if the pricing or product offering is not competitive, either at our level or the prime or subcontractor level. In the event we are awarded a contract, we are subject to protests by losing bidders of contract awards that can result in the reopening of the bidding process and changes in governmental policies or regulations and other political factors. We may be

- subject to multiple rebid requirements over the life of a defense program to continue to participate in such program, which can result in the loss of the program or significantly reduce our revenue or margin. Requirements for more frequent technology refreshes on defense programs may lead to increased costs and lower long-term revenues.
- Consolidation among defense industry contractors has resulted in a few large contractors with increased bargaining power relative to us.
- Our customers include U.S. government contractors who must comply with and are affected by laws and regulations relating to the formation, administration and performance of U.S. government contracts. When we contract with the U.S. government, we must comply with these laws and regulations. A violation of these laws and regulations could result in the imposition of fines and penalties to us or our customers or the termination of our or their contracts with the U.S. government. As a result, there could be a delay in our receipt of orders from our customers, a termination of such orders, or a termination of contracts between us and the U.S. government.
- We sell certain products and services to U.S. and international defense contractors or directly to the U.S. government on a commercial item basis, eliminating the requirement to disclose and certify cost data. To the extent that there are interpretations or changes in the Federal Acquisition Regulations ("FAR") regarding the qualifications necessary to sell commercial items, there could be a material impact on our business and operating results. For example, there have been legislative proposals to narrow the definition of a "commercial item" (as defined in the FAR) or to require cost and pricing data on commercial items that could limit or adversely impact our ability to contract under commercial item terms. Changes could be accelerated due to changes in our mix of business, in federal regulations, or in the interpretation of federal regulations, which may subject us to increased oversight by the Defense Contract Audit Agency ("DCAA") for certain of our products or services. Such changes could also trigger contract coverage for a larger percentage of our contracts under the Cost Accounting Standards ("CAS"), requiring compliance with a defined set of business systems criteria. Failure to comply with applicable CAS requirements could adversely impact our ability to win future CAS-type contracts. We may also need to implement or enhance our processes and information systems to support certified cost and pricing and earned value management systems.
- We are subject to the Department of Defense Cybersecurity Maturity Model Certification ("CMMC") in connection with our defense work for the U.S. government and defense prime contractors. Inability to meet the qualifications to the CMMC and any amendments may increase our costs or delay the award of contracts if we are unable to certify that we satisfy such cybersecurity requirements at our Company level and into our supply chain.
- The U.S. government or a defense prime contractor customer could require us to relinquish data rights to a product in connection with performing work on a defense contract, which could lead to a loss of valuable technology and intellectual property in order to participate in a government program.
- The U.S. government or a defense prime contractor customer could require us to enter into cost reimbursable contracts that could offset our cost efficiency initiatives.
- We anticipate that sales to our U.S. prime defense contractor customers as part of foreign military sales ("FMS")
  programs will be an increasing part of our business going forward. These FMS sales combine several different types of
  risks and uncertainties highlighted above, including risks related to government contracts, risks related to defense
  contracts, timing and budgeting of foreign governments and approval from the U.S. and foreign governments related to
  the programs, all of which may be impacted by macroeconomic and geopolitical factors outside of our control.
- We must comply with security requirements pursuant to 32 CFR Part 117, formerly known as the National Industrial Security Program Operating Manual, or NISPOM, and other U.S. government security protocols when accessing sensitive information. Many of our facilities maintain a facility security clearance and many of our employees maintain a personal security clearance to access sensitive information necessary to the performance of our work on certain U.S. government contracts and subcontracts. Failure to comply with such security requirements may subject us to civil or criminal penalties, loss of access to sensitive information, loss of a U.S. government contract or subcontract, or potentially debarment as a government contractor.
- We may need to invest additional capital to build out higher level security infrastructure at certain of our facilities to
  capture new design wins on defense programs with higher level security requirements. In addition, we may need to
  invest in additional secure laboratory space to integrate efficiently subsystem level solutions and maintain quality
  assurance on current and future programs.

If we are unable to continue to obtain U.S. government authorization regarding the export of our products, or if current or future export laws limit or otherwise restrict our business, we could be prohibited from shipping our products to certain countries, which would harm our ability to generate revenue.

We must comply with U.S. laws regulating the export of our products and technology. In addition, we are required to obtain a license from the U.S. government to export certain of our products and technical data as well as to provide technical services to foreign persons related to such products and technical data. We cannot be sure of our ability to obtain any licenses required to export our products or to receive authorization from the U.S. government for international sales or domestic sales to foreign persons including transfers of technical data or the provision of technical services. Likewise, our international operations are subject to the export laws of the countries in which they conduct business. Moreover, the export regimes and the governing policies applicable to our business are subject to change. If we cannot obtain required government approvals under applicable regulations in a timely manner or at all, we could be delayed or prevented from selling our products in certain jurisdictions, which could adversely affect our business and financial results.

# Our products are complex, and undetected defects may increase our costs, harm our reputation with customers or lead to costly litigation.

Our products are extremely complex and must operate successfully with complex products of our customers and their other vendors. Our products may contain undetected errors when first introduced or as we introduce product upgrades. The pressures we face to be the first to market new products or functionality and the elapsed time before our products are integrated into our customer's systems increases the possibility that we will offer products in which we or our customers later discover problems. We have experienced new product and product upgrade errors in the past and expect similar problems in the future. These problems may cause us to incur significant warranty costs and costs to support our service contracts and divert the attention of personnel from our product development efforts. Also, hostile third parties or nation states may try to install malicious code or devices into our products or software. Undetected errors may adversely affect our product's ease of use and may create customer satisfaction issues. If we are unable to repair these problems in a timely manner, we may experience a loss of or delay in revenue and significant damage to our reputation and business prospects. Many of our customers rely upon our products for mission-critical applications. Because of this reliance, errors, defects, or other performance problems in our products could result in significant financial and other damage to our customers. Our customers could attempt to recover those losses by pursuing products liability claims against us which, even if unsuccessful, would likely be time-consuming and costly to defend and could adversely affect our reputation.

# Risks Related to Information Technology and Intellectual Property

# We may need to invest in new information technology systems and infrastructure to scale our operations.

We may need to adopt new information technology systems and infrastructure to scale our business and obtain the synergies from prior acquisitions as well as organic growth. Our information technology and business systems and infrastructure could create product development or production work stoppages, unnecessarily increase our inventory, negatively impact product delivery times and quality and increase our compliance costs. In addition, an inability to maximize the utility and benefit of our current information technology and business tools could impact our ability to meet cost reduction and planned efficiency and operational improvement goals.

# If we suffer ransomware breaches, data breaches, or phishing diversions involving the designs, schematics, or source code for our products or other sensitive information, our business and financial results could be adversely affected.

Our business is subject to heightened risks of cyber intrusion as nation-state hackers seek access to technology used in U.S. defense programs and criminal enterprise hackers, which may or may not be affiliated with foreign governments, use ransomware attacks to disable critical infrastructure and extort companies for ransom payments. We are also targeted by spear phishing attacks in which an email directed at a specific individual or department is disguised to appear to be from a trusted source to obtain sensitive information. Like all DoD contractors that process, store, or transmit controlled unclassified information, we must meet minimum security standards or risk losing our DoD contracts. A breach, whether physical, electronic or otherwise, of the systems on which this sensitive data is stored could lead to damage or piracy of our products or to the shutdown of business systems. If we experience a data security breach from an external source or a data exfiltration from an insider threat, we may have a loss in sales or increased costs arising from the restoration or implementation of additional security measures, either of which could adversely affect our business and financial results. Other potential costs could include damage to our reputation, loss of brand value, incident response costs, loss of stock market value, regulatory inquiries, litigation and management distraction. A security breach that involves classified information could subject us to civil or criminal penalties, loss of a government contract, loss of access to classified information, or debarment as a government contractor. Similarly, a breach that involves loss of customer-provided data could subject us to loss of a customer, loss of a program or contract, litigation costs and legal damages and reputational harm. Like other defense contractors, from time to time we have

experienced the loss of proprietary data due to employees retaining proprietary information in violation of company policies and applicable regulations, resulting in investigation and remediation expenses as well as the other risks outlined above.

We may be unsuccessful in protecting our intellectual property rights which could result in the loss of a competitive advantage. If we become subject to intellectual property infringement claims, we could incur significant expenses and could be prevented from selling specific products.

Our ability to compete effectively against other companies in our industry depends, in part, on our ability to protect our current and future proprietary technology under patent, copyright, trademark, trade secret and unfair competition laws. We cannot assure you that our means of protecting our proprietary rights in the United States or abroad will be adequate, or that others will not develop technologies similar or superior to our technology or design around our proprietary rights. In addition, we may incur substantial costs in attempting to protect our proprietary rights.

We may become subject to claims that we infringe the intellectual property rights of others. We cannot assure you that, if made, these claims will not be successful. Any claim of infringement could cause us to incur substantial costs defending against the claim even if the claim is invalid and could distract management from other business. Any judgment against us could require substantial payment in damages and could also include an injunction or other court order that could prevent us from offering certain products.

### Risks Related to Our Common Stock

# The trading price of our common stock may continue to be volatile, which may adversely affect our business, and investors in our common stock may experience substantial losses.

Our stock price has been and may continue to be volatile. This volatility may or may not be related to our operating performance. Our operating results, from time to time, may be below the expectations of public market analysts and investors, which could have a material adverse effect on the market price of our common stock. Market rumors or the dissemination of false or misleading information may impact our stock price. When the market price of a stock has been volatile, holders of that stock will sometimes file securities class action litigation against the company that issued the stock. If any shareholders were to file a lawsuit, we could incur substantial costs defending the lawsuit, which could also divert the time and attention of management. During fiscal 2023 and 2024, we experienced significant stock price declines following some of our earnings releases as well as after the announcement that the Board of Directors had concluded its review of strategic alternatives in June 2023, in each case with law firms announcing investigations after the event. On December 13, 2023, a securities class action complaint was filed against us in the U.S. District Court for the District of Massachusetts. The complaint alleged that our public disclosures in SEC filings and on earnings calls were false and/or misleading. While the Court dismissed the case without prejudice on July 24, 2024, it permitted the plaintiffs 30 days to file an amended complaint.

# We have never paid cash dividends on our common stock and we do not anticipate paying any dividends in the foreseeable future.

We have not declared or paid cash dividends on any of our classes of capital stock to date and we currently intend to retain our future earnings, if any, to fund the development and growth of our business and for future mergers and acquisitions. As a result, capital appreciation, if any, of our common stock will be the sole source of gain for the foreseeable future.

# We may need additional capital and may not be able to raise funds on acceptable terms, if at all. In addition, any funding through the sale of additional common stock or other equity securities could result in additional dilution to our stockholders and any funding through indebtedness could restrict our operations.

We may require additional cash resources to finance our continued growth or other future developments, including any investments or acquisitions we may decide to pursue. The amount and timing of such additional financing needs will vary principally depending on the timing of new product and service launches, investments and/or acquisitions and the amount of cash flow from our operations. If our resources are insufficient to satisfy our cash requirements, we may seek to sell additional equity or debt securities or obtain a larger credit facility. The sale of additional equity securities or securities convertible into our common shares could result in additional dilution to our stockholders. The incurrence of additional indebtedness would result in increased debt service obligations and could result in operating and financing covenants that would restrict our operations. We cannot assure you that financing will be available in amounts or on terms acceptable to us, if at all. If we fail to raise additional funds, we may need to sell debt or additional equity securities or to reduce our growth to a level that can be supported by our cash flow.

Provisions in our organizational documents and Massachusetts law and other actions we have taken could make it more difficult for a third party to acquire us.

Provisions of our articles of organization and by-laws could have the effect of discouraging a third party from making a proposal to acquire us and could prevent certain changes in control, even if some shareholders might consider the proposal to be in their best interest. These provisions include a classified board of directors, advance notice to our board of directors of shareholder proposals and director nominations, and limitations on the ability of shareholders to remove directors and to call shareholder meetings. In addition, we may issue shares of any class or series of preferred stock in the future without shareholder approval upon such terms as our board of directors may determine. For example, on December 27, 2021, the Board of Directors adopted a Shareholder Rights Plan which, as amended, expired on the date of our annual meeting of shareholders in October 2022. The rights of holders of common stock will be subject to, and may be adversely affected by, the rights of the holders of any such class or series of preferred stock that may be issued.

We also are subject to the Massachusetts General Laws which, subject to certain exceptions, prohibit a Massachusetts corporation from engaging in a broad range of business combinations with any "interested shareholder" for a period of three years following the date that such shareholder becomes an interested shareholder. The Massachusetts Business Corporation Act permits directors to look beyond the interests of shareholders and consider other constituencies in discharging their duties. In determining what the director of a Massachusetts corporation reasonably believes to be in the best interests of the corporation, a director may consider the interests of the corporation's employees, suppliers, creditors, and customers, the economy of the state, the region, and the nation, community and societal considerations and the long-term and short-term interests of the corporation and its shareholders, including the possibility that these interests may be best served by the continued independence of the corporation.

# Shareholder activism could cause us to incur significant expense, disrupt our business, result in a proxy contest or litigation and impact our stock price.

We have been subject to shareholder activism and may be subject to such activism in the future, which could result in substantial costs and divert management's and our Board's attention and resources from our business. Such shareholder activism could give rise to perceived uncertainties as to our future, adversely affect our relationships with our employees, customers, or suppliers and make it more difficult to attract and retain qualified personnel. We may be required to incur significant fees and other expenses related to activist shareholder matters, including for third party advisors. We may be subjected to a proxy contest or to litigation by activist investors. Our stock price has been and could be subject to significant fluctuation or otherwise be adversely affected by the events, risks and uncertainties of any shareholder activism.

### ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

# ITEM 1C. CYBERSECURITY

We assess and identify material risks from cybersecurity threats primarily through the work of our Chief Information Officer ("CIO") as part of our enterprise risk management ("ERM") process. The ERM process, administered by management with input from business leaders and our global and corporate functions, monitors material risks facing Mercury, including cybersecurity threats. Our CIO works directly with our CFO and other members of senior management to assess cybersecurity threats as part of the ERM process. Our CIO oversees the internal cybersecurity organization headed by our Chief Information Security Officer (our "Cybersecurity Team").

Risks related to cybersecurity threats are reflected in an enterprise risk "heat map," along with other material risks identified through the ERM process, and any mitigation plans developed to manage such risks are reported to our Board of Directors. We could be negatively impacted by a security breach, through a cyber-attack, cyber intrusion, insider threat, supply chain incident, or other significant disruption of our IT networks and related systems. See "Item 1A - Risk Factors" in this Annual Report for a further discussion of specific risks related to cybersecurity threats.

Our Cybersecurity Team monitors activity, scans applications and systems for vulnerabilities to risk from cybersecurity threats, and creates action plans to address and track identified cybersecurity threats until they have been remediated. Activities and cybersecurity incidents are reported to our cyber critical incident response team and to our CIO, who briefs our Compliance Committee, a dedicated committee of senior management focused on regulatory compliance. Our Cybersecurity Team also routinely engages with third parties, including government agencies focused on cyber resiliency, to manage risks from cybersecurity threats. For example, we are members of the DoD Defense Industrial Base Collaborative Information Sharing Environment, the National Defense Information Sharing and Analysis Center, and the National Security Agency Enduring Security Framework as well as Infragard, a partnership between the FBI and members of the private sector for the protection of U.S. critical infrastructure. These organizations share real-time cybersecurity threat information and best practices in protecting, detecting, and recovering from cybersecurity threats.

We maintain an insider threat program designed to identify, assess, and address potential internal risks from within our Company. Our program evaluates potential risks consistent with industry practices, customer requirements and applicable law, including privacy and other considerations. As a government contractor, we must comply with extensive cybersecurity regulations, including the Defense Federal Acquisition Regulation Supplement related to adequately safeguarding controlled unclassified information and reporting cybersecurity incidents to the DoD. Our policies and implemented controls reflect our adherence to these requirements.

Additionally, as part of our processes to manage risks related to a breach in our information systems, management requires employees to take cybersecurity trainings and shares regular awareness updates regarding cybersecurity threats. Our Cybersecurity Team regularly tests employees throughout the year to assess the effectiveness of our cybersecurity training. We also conduct penetration testing of our network, hold tabletop exercises of cyber incidents, and undertake cybersecurity assessments to improve our risk mitigation and assist in the determination of a potential material impact caused by a cybersecurity incident.

Our Board of Directors provides oversight of our ERM process and other guidelines and policies governing the processes by which our CEO and senior management assess our exposure to risk, including risk from cybersecurity threats. Our management Compliance Committee receives briefings from our CIO, Chief Information Security Officer, and other members of senior management on cybersecurity threats and related matters and assists the Board in its oversight and review of our ERM process.

Our management Compliance Committee reviews our cybersecurity risk across the enterprise and our cybersecurity strategy framework and operational posture. The Compliance Committee also reviews our IT, data security and other systems, processes, policies, procedures and controls to (a) identify, assess, monitor, and mitigate cybersecurity risks; (b) identify measures to protect and safeguard against cybersecurity threats and breaches of confidential information and data and IT infrastructure and our other assets or assets of our customers or other third parties in our possession or custody; (c) support the response and management of cybersecurity threats and data breach incidents; and (d) aid in compliance with legal and regulatory requirements governing cybersecurity or data security reporting requirements.

To date, we have not experienced any cybersecurity incidents that have had a material affect on the Company or our financial position, results of operations and/or cash flows. We continue to invest in cybersecurity and enhance the resiliency of our networks and to strengthen our internal controls and processes, which are designed to help protect our systems and infrastructure, and the data they contain. For more information regarding the risks we face from cybersecurity threats, please see "Risk Factors."

# ITEM 2. PROPERTIES

The following table sets forth our significant properties as of June 28, 2024:

Leased, expiring 2032
, 1 0
Leased, expiring 2033
Leased, expiring 2030
Leased, expiring 2025
Leased, expiring 2029
Leased, expiring 2031
Leased, expiring 2025
Leased, expiring 2028
Leased, expiring 2027
Leased, expiring 2028
Leased, expiring 2025
Leased, expiring 2027
Leased, expiring 2026

We actively manage our facilities and are in pursuit of lease extensions or alternative locations for facilities with expiration dates in the next one to two years. In addition, we lease a number of smaller offices around the world primarily for sales. See Note B and Note I to the consolidated financial statements for more information regarding our obligations under leases.

# ITEM 3. LEGAL PROCEEDINGS

We are subject to litigation, claims, investigations and audits arising from time to time in the ordinary course of our business. Although legal proceedings are inherently unpredictable, we believe that we have valid defenses with respect to those matters currently pending against us and intend to defend ourself vigorously. The outcome of these matters, individually and in the aggregate, is not expected to have a material impact on our cash flows, results of operations, or financial position.

On December 7, 2021, counsel for National Technical Systems, Inc. ("NTS") sent us an environmental demand letter pursuant to Massachusetts General Laws Chapter 21E, Section 4A, and CERCLA 42 U.S.C. Section 9601, related to a site that NTS formerly owned at 533 Main Street, Acton, MA. NTS received a Notice of Responsibility from the Massachusetts Department of Environmental Protection ("MassDEP") alleging trichloroethene, freon and 1,4-dioxane contamination in the groundwater emanating from NTS's former site. NTS alleges in its demand letter that the operations of a predecessor company to Mercury that was acquired in our acquisition of the Microsemi Carve-Out Business that once owned and operated a facility at 531 Main Street, Acton, Massachusetts contributed to the groundwater contamination. NTS is seeking payment from us of NTS's costs for any required environmental remediation. In April 2022, we engaged in a meet and confer session with NTS pursuant to Massachusetts General Laws Chapter 21E, Section 4A to discuss the status of the environmental review performed by NTS and its licensed site professional. We subsequently delivered a letter to NTS outlining the deficiencies in their claim and reiterated that we are not obligated to tender a substantive response to their demand without first having received the responsive information requested in connection with the meet and confer session. In April 2024, counsel for NTS sent additional communications on their demand that we participate in their environmental monitoring and remediation planning, and in May 2024, we responded with a rebuttal of the allegations. We believe the NTS claims are without merit and intend to defend our self vigorously. In addition, in November 2021, we responded to a request for information from MassDEP regarding the detection of PFAS (per- and polyfluoroakyl substances) in the Acton, Massachusetts Water District's Conant public water supply wells near the former facility at 531 Main Street, Acton, Massachusetts at a level above the standard that MassDEP published for PFAS in October 2020. We have not been contacted by MassDEP since our response was provided in November 2021. It is too early to determine what responsibility, if any, we may have for these environmental matters.

On June 19, 2023, our Board of Directors received notice of our former CEO's resignation from his positions of President and Chief Executive Officer. The Board accepted his resignation effective June 24, 2023. In his notice, the former CEO claimed he was entitled to certain benefits, including equity vesting, severance, and other benefits, under his change in control severance agreement (the "CIC Agreement") because he had resigned with good reason during a potential change in control period. We dispute these claims and maintain that he resigned without good reason. On September 19, 2023, our former CEO filed for binding arbitration under the employment rules of the American Arbitration Association ("AAA"). An arbitrator was appointed on November 29, 2023, and the arbitration trial has been scheduled for mid-December 2024. On March 25, 2024, the arbitrator denied Mr. Aslett's motion for compensation during the dispute and payment of his legal fees, preserving those matters for the arbitration trial. We intend to contest vigorously the claims under the CIC Agreement and believe that we have strong arguments that our former CEO's claims lack merit. If the arbitrator rules in our favor, we may still need to pay the former CEO's reasonable legal fees, interest, and compensation during the dispute. If instead the arbitrator rules for the former CEO, we could be liable for up to approximately \$14.1 million, based on the closing price of our common stock on June 26, 2023, for accelerated equity vesting, severance and other benefits under the CIC Agreement, plus interest, legal fees and expenses and compensation during dispute, which could include Mr. Aslett's base salary and other amounts based on the compensation, benefit and insurance plans in which he participated. We categorically deny any wrongdoing or liability under the CIC Agreement, but the outcome of potential arbitration is inherently uncertain. Accordingly, it is reasonably possible that we will incur a liability in this matter, and we estimate the potential range of exposure from \$0 to \$14.1 million, plus costs and attorneys' fees and compensation to our former CEO during the dispute.

On December 13, 2023, a securities class action complaint was filed against us, Mark Aslett, and Michael Ruppert in the U.S. District Court for the District of Massachusetts. The complaint asserted Section 10(b) and 20(a) securities fraud claims on behalf of a purported class of purchasers and sellers of our stock from December 7, 2020, through June 23, 2023. The complaint alleged that our public disclosures in SEC filings and on earnings calls were false and/or misleading. On February 27, 2024, the Court entered an order appointing Carpenters Pension Trust Fund for Northern California as lead plaintiff. On April 18, 2024, the lead plaintiff filed an amended complaint including William Ballhaus and David Farnsworth as additional defendants and amended the class period to February 3, 2021 through February 6, 2024. We filed a motion to dismiss on May 24, 2024, and after the plaintiffs' filed their opposition motion and we filed our reply to their opposition, a hearing on the motion was conducted by the Court on July 24, 2024. On July 24, 2024, the Court dismissed the case without prejudice and permitted the plaintiffs 30 days to file an amended complaint. Subject to the terms of our by-laws and applicable Massachusetts law, Mr. Aslett, our former Chief Executive Officer, Mr. Ruppert, our former Chief Financial Officer, Mr. Ballhaus, our current Chief Executive Officer, and Mr. Farnsworth, our current Chief Financial officer, are indemnified by us for this matter. We believe the claims in the complaint are without merit and intend to defend our self vigorously. It is too early to determine what responsibility, if any, we will have for this matter.

On January 31, 2024, a former employee at our Torrance, California location, filed a wage and hour class action lawsuit in California state court in Los Angeles County, along with a companion Private Attorneys General Act ("PAGA") lawsuit, to act in a representative capacity for other Mercury Mission Systems, LLC employees in California, alleging a range of violations of California wage and hour regulations. We believe the claims in the complaints are without merit and intend to defend our self vigorously. It is too early to determine what responsibility, if any, Mercury will have for this matter.

# ITEM 4. MINE SAFETY DISCLOSURES

Not Applicable.

# ITEM 4.1. INFORMATION ABOUT OUR EXECUTIVE OFFICERS

Our executive officers are appointed to office by the Board of Directors at the first board meeting following the Annual Meeting of Shareholders or at other board meetings as appropriate, and hold office until the first board meeting following the next Annual Meeting of Shareholders and until a successor is chosen, subject to prior death, resignation or removal. Information regarding our executive officers as of the date of filing of this Annual Report on Form 10-K is presented below.

William L. Ballhaus, age 57, joined the Company's Board of Directors as a non-employee director in June 2022, was appointed interim President and Chief Executive Officer on June 24, 2023, and was appointed President and CEO effective August 15, 2023. In October 2023, Mr. Ballhaus became the Company's Chairman of the Board effective with the annual meeting of shareholders. Mr. Ballhaus has significant experience in the aerospace, defense, and technology industries, including multiple CEO roles, as well as experience in operational transformations and delivering strong results. He previously served as Chairman and CEO of Blackboard, Inc., a leading EdTech company, from 2016 until its merger with Anthology in 2021. Prior to that, he served as CEO and President of SRA International, Inc., a provider of information technology services, from 2011 until the creation of CSRA Inc. from SRA International Inc.'s and CSC's U.S. public sector business. Before that, Mr. Ballhaus served as CEO and President of government contractor DynCorp International from 2008 to 2010. Mr. Ballhaus has also held senior leadership positions at BAE Systems, Boeing, and Hughes, where he led global government and commercial technology businesses particularly focused on software and IT.

David E. Farnsworth, age 64, joined Mercury in July 2023 as Executive Vice President and Chief Financial Officer. Mr. Farnsworth was the Chief Financial Officer of HawkEye 360, a radio frequency data analytics company from 2020 to 2023. Before joining HawkEye 360, Mr. Farnsworth was Vice President and Chief Financial Officer for Integrated Defense Systems of Raytheon Company from 2018 to 2020. Before that, he was CFO for the Intelligence, Information and Services segment of Raytheon.

Stephanie Georges, age 61, joined Mercury in April 2019 as Senior Vice President and Chief Marketing Officer and in September 2023 she became the Company's Executive Vice President and Chief Communications Officer. Prior to Mercury, she was Senior Vice President and Chief Marketing Officer at Maxar Technologies from 2017 to 2019 and its predecessor, DigitalGlobe. She has also served as Executive Vice President of Corporate Strategy and Development at CenturyLink and at Qwest Communications International. Before joining Qwest, Ms. Georges spent 18 years covering the Telecommunications Services sector as a top-ranked sell-side analyst at Morgan Stanley and Salomon Brothers where she led the global telecommunications services equity research team and was the lead U.S. telecommunications services analyst.

Stuart H. Kupinsky, age 56, joined Mercury in February 2024 as Executive Vice President, Chief Legal Officer, and Corporate Secretary. Previously, Mr. Kupinsky served as Chief Legal Officer and General Counsel for five public and private technology companies, including Blackboard Inc. (later Anthology Inc. following its acquisition of Blackboard) from 2015 through 2024, one of the largest global education technology companies, and Tekelec, Inc., a public global telecommunications technology company serving the U.S. Department of Defense until its sale to Oracle. Mr. Kupinsky was also Chief Counsel for FirstNet, a multibillion-dollar independent government agency building a nationwide network for first responders. Earlier in his career he served as a trial attorney for the U.S. Department of Justice and as a law clerk on the U.S. Court of Appeals for the Federal Circuit.

Steven V. Ratner, age 48, joined Mercury in May 2022 as Senior Vice President and Chief Human Resources Officer and in September 2023 he became the Company's Executive Vice President, Chief Human Resources Officer. Mr. Ratner brings more than 20 years of human resources leadership experience with extensive HR strategy, compensation, and employee engagement expertise. Prior to Mercury, he was Vice President of Human Resources for Raytheon Missiles & Defense, a Raytheon business segment with approximately \$16 billion in annual revenues and over 30,000 employees worldwide, from 2020 to 2022. Prior to that, he was Vice President of Human Resources and Security at Raytheon Integrated Defense Systems from 2015 to 2020. He has held numerous HR leadership positions throughout his career.

Charles R. Wells, IV, age 52, joined the Company in November 2021 as Executive Vice President and President of Mercury's Microelectronics Division, and in January 2024 he became the Company's Executive Vice President and Chief Operating Officer. Mr. Wells has more than 25 years' experience across multiple disciplines including engineering, business

development, program management and executive management. Previously, he served as Vice President and General Manager for the Unmanned & Integrated Solutions Business Unit of Teledyne FLIR from 2018 to 2021 with full P&L responsibility while ensuring high levels of product quality and customer satisfaction. Earlier in his career, he worked as a Department of Defense civilian supporting the development and fielding of world-wide C4ISR networks and information systems. He also held positions in Northrop Grumman and ICX Technologies and served as a private consultant for large aerospace and defense companies.

### PART II

# ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is listed and traded on the Nasdaq Global Select Market under the symbol MRCY. The following table sets forth, for the fiscal periods indicated, the high and low sale prices per share for our common stock during such periods. Such market quotations reflect inter-dealer prices without retail markup, markdown or commission.

	High	 Low
2024 Fourth quarter	\$ 32.45	\$ 26.61
Third quarter	\$ 36.05	\$ 26.23
Second quarter	\$ 39.31	\$ 31.69
First quarter	\$ 40.38	\$ 33.40
2023 Fourth quarter	\$ 52.36	\$ 31.50
Third quarter	\$ 56.19	\$ 44.56
Second quarter	\$ 53.58	\$ 41.78
First quarter	\$ 63.66	\$ 40.60

As of June 28, 2024, we had 656 record shareholders and 32,036 nominee holders.

# **Dividend Policy**

We have never declared or paid cash dividends on shares of our common stock. We currently intend to retain any earnings for future growth. Accordingly, we do not anticipate that any cash dividends will be declared or paid on our common stock in the foreseeable future.

### **Net Share Settlement Plans**

The following table includes information with respect to net share settlements we made of our common stock during the fiscal year ended June 28, 2024:

Period of Net Share Settlement	<b>Total Number of Shares Net Settled (1)</b>	<b>Average Price Per Share</b>
July 1, 2023 - September 29, 2023	_	\$ _
September 30, 2022 - December 29, 2023	<u> </u>	\$ <u> </u>
December 30, 2023 - March 29, 2024	_	\$ _
March 30, 2023 - June 28, 2024	1	\$ 31.58
Total	1	

(1) Represents shares we net settled in connection with the surrender of shares to cover the minimum taxes on vesting of restricted stock. Presented in thousands.

# **Share Repurchase Plans**

During fiscal 2024, we had no active share repurchase programs.

# **Equity Compensation Plans**

The information required by this item is incorporated by reference to our Proxy Statement for the Shareholders Meeting.

# ITEM 6. [RESERVED]

Not applicable.

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### FORWARD-LOOKING STATEMENTS

From time to time, information provided, statements made by our employees or information included in our filings with the Securities and Exchange Commission ("SEC") may contain statements that are not historical facts but that are "forwardlooking statements," which involve risks and uncertainties. You can identify these statements by the words "may," "will," "could," "should," "would," "plans," "expects," "anticipates," "continue," "estimate," "project," "intend," "likely," "forecast," "probable," "potential," and similar expressions. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected or anticipated. Such risks and uncertainties include, but are not limited to, continued funding of defense programs, the timing and amounts of such funding, general economic and business conditions, including unforeseen weakness in the Company's markets, effects of any U.S. federal government shutdown or extended continuing resolution, effects of geopolitical unrest and regional conflicts, competition, changes in technology and methods of marketing, delays in or cost increases related to completing development, engineering and manufacturing programs, changes in customer order patterns, changes in product mix, continued success in technological advances and delivering technological innovations, changes in, or in the U.S. government's interpretation of, federal export control or procurement rules and regulations, changes in, or in the interpretation or enforcement of, environmental rules and regulations, market acceptance of the Company's products, shortages in or delays in receiving components, supply chain delays or volatility for critical components such as semiconductors, production delays or unanticipated expenses including due to quality issues or manufacturing execution issues, capacity underutilization, increases in scrap or inventory write-offs, failure to achieve or maintain manufacturing quality certifications, such as AS9100, the impact of supply chain disruption, inflation and labor shortages, among other things, on program execution and the resulting effect on customer satisfaction, inability to fully realize the expected benefits from acquisitions, restructurings, and operational efficiency initiatives or delays in realizing such benefits, challenges in integrating acquired businesses and achieving anticipated synergies, effects of shareholder activism, increases in interest rates, changes to industrial security and cyber-security regulations and requirements and impacts from any cyber or insider threat events, changes in tax rates or tax regulations, such as the deductibility of internal research and development, changes to interest rate swaps or other cash flow hedging arrangements, changes to generally accepted accounting principles, difficulties in retaining key employees and customers, litigation, including the dispute arising with the former CEO over his resignation, unanticipated costs under fixed-price service and system integration engagements, and various other factors beyond our control. These risks and uncertainties also include such additional risk factors as set forth under Part I-Item 1A (Risk Factors) in this Annual Report on Form 10-K. We caution readers not to place undue reliance upon any such forward-looking statements, which speak only as of the date made. We undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made.

### **OVERVIEW**

Mercury Systems is a technology company that delivers mission-critical processing power to the edge to solve the most pressing aerospace and defense challenges. Mercury's products and solutions are deployed in more than 300 programs and across 35 countries. The Company is headquartered in Andover, Massachusetts, and has over 20 locations worldwide.

The Mercury Processing Platform is the unique advantage we provide to our customers. It comprises the innovative technologies we've developed and acquired for more than 40 years that bring integrated, mission-critical processing capabilities to the edge. Our processing platform spans the full breadth of signal processing—from RF front end to the human-machine interface—to rapidly convert meaningful data, gathered in the most remote and hostile environments, into critical decisions. It allows us to offer standard products and custom solutions from silicon to system scale, including components, modules, subsystems, and systems and it embodies the customer-centric approach we take to delivering capabilities that are mission-ready, trusted and secure, software-defined, and open and modular.

As a leading manufacturer of essential components, products, modules and subsystems, we sell to all of the top defense prime contractors, the U.S. government and original equipment manufacturers ("OEM") commercial aerospace companies. Our mission-critical products and solutions are deployed by our customers for a variety of applications including sensor and radar processing, electronic warfare, avionics, weapons, and command, control, communications, and intelligence (C4I). Mercury has built a trusted, robust portfolio of proven capabilities, leveraging the most advanced commercial silicon technologies and purpose-built to exceed the performance needs of our defense and commercial customers. Customers add their own applications and algorithms to our specialized, secure and innovative products and pre-integrated solutions. This allows them to complete their full system by integrating with their platform, the sensor technology and, increasingly, the processing from Mercury.

Our deep, long-standing relationships with leading high-tech and other commercial companies, coupled with our targeted research and development ("R&D") investments and industry-leading trusted and secure design and manufacturing capabilities, are the foundational tenets of this highly successful model. We are leading the development and adaptation of commercial

technology for aerospace and defense solutions. From chip-scale to system scale and from data, including RF to digital to decision, we make mission-critical technologies safe, secure, affordable and relevant for our customers.

Our capabilities, technology, people and R&D investment strategy combine to differentiate Mercury in our industry. We maintain our technological edge by investing in critical capabilities and intellectual property ("IP" or "building blocks") in processing, leveraging open standards and open architectures to adapt quickly those building blocks into solutions for highly data-intensive applications, including emerging needs in areas such as artificial intelligence ("AI").

As of June 28, 2024, we had 2,364 employees. Our consolidated revenues, net loss, diluted net loss per share, adjusted loss per share, and adjusted EBITDA for fiscal 2024 were \$835.3 million, \$(137.6) million, \$(2.38), \$(0.69) and \$9.4 million, respectively. Our consolidated revenues, net loss, diluted net loss per share, adjusted loss per share and adjusted EBITDA for fiscal 2023 were \$973.9 million, \$(28.3) million, \$(0.50), \$1.00 and \$132.3 million, respectively. See the Non-GAAP Financial Measures section for a reconciliation to our most directly comparable GAAP financial measures.

#### **BUSINESS DEVELOPMENTS:**

FISCAL 2024

On July 18, 2023, we executed the planned evolution of our 1MPACT value creation initiative, embedding the processes and execution of 1MPACT into our operations organization. The 1MPACT office concluded its responsibilities, having successfully incorporated the principles behind 1MPACT into how we think about continuous improvement at all levels of the Company.

On August 15, 2023, we announced William L. Ballhaus has been appointed President and Chief Executive Officer.

On August 9, 2023, we approved and initiated a workforce reduction that, together with the consolidation of 1MPACT into our operations organization, eliminated approximately 150 positions resulting in \$9,548 of severance costs. Our plan enacted several immediate cost savings measures that simplified our organizational structure, facilitated clearer accountability, and aligned our priorities, including: (i) embedded the 1MPACT value creation initiatives and execution into the Company's operations; (ii) streamlined organizational structure and removed areas of redundancy between corporate and divisional organizations; and (iii) reduced selling, general, and administrative headcount and rebalanced discretionary and third party spend to better align with our priority areas.

On November 7, 2023, we entered into Amendment No. 5 ("Amendment No. 5") to the Company's Credit Agreement dated May 2, 2016, as amended to date. Due to the uncertainty surrounding a government shutdown or prolonged continuing resolution and the potential impact on the second quarter and fiscal 2024 results, we proactively executed Amendment No. 5 to allow for a temporary increase in the Consolidated Total Net Leverage Ratio covenant requirement from 4.50 to 5.25 for the second quarter ended December 29, 2023. As part of Amendment No. 5, we agreed to a temporary reduction of Revolver capacity to \$750.0 million through the earlier of May 15, 2024 or the filing of the compliance certificate for the period ended March 29, 2024. We had \$576.5 million in outstanding borrowings both prior to and following the closing of Amendment No. 5. See Note L in the accompanying consolidated financial statements for further discussions of the Revolver.

On January 12, 2024, we adopted a plan to consolidate our Mission Systems and Microelectronics divisions into one unified structure that incorporates multiple business units and functions, under the leadership of Charles R. Wells, IV, who was appointed as our Executive Vice President, Chief Operating Officer effective as of January 22, 2024. This consolidation was designed to simplify our organizational structure, facilitate clearer accountability, and align to our priorities. On January 12, 2024, we approved and initiated workforce reductions that eliminated approximately 100 positions resulting in an additional \$9,841 of severance costs for fiscal 2024. See Note H in the accompanying consolidated financial statements for further discussions of restructuring charges incurred during the year.

On June 17, 2024, we approved the next phase of our consolidation efforts, and implemented a workforce reduction that eliminated approximately 100 positions and resulted in restructuring charges of \$6,781 for employee separation costs. See Note H in the accompanying consolidated financial statements for further discussions of restructuring charges incurred during the year.

On August 13, 2024, during fiscal 2025, we entered into Amendment No. 6 ("Amendment No. 6") to our credit agreement dated May 2, 2016, as amended to date. Amendment No. 6 permanently decreased borrowing capacity to \$900.0 million, with a temporary reduction in credit availability to \$750.0 million until we meet a minimum consolidated EBITDA level of \$75.0 million excluding (a) adjustments for cost savings, operating expense reductions and synergies, (b) EAC charges and other non-cash expenses, charges, and losses addbacks and (c) deducts to reverse EAC charges previously added back, in each case for a last twelve-month period. We had \$591.5 million in outstanding borrowings both prior to and following the closing of Amendment No. 6. See Note L in the accompanying consolidated financial statements for further discussions of the Revolver.

### FISCAL 2023

Beginning in January 2023, the Board of Directors (the "Board") engaged in a proactive and rigorous process to evaluate strategic alternatives, focused on a potential sale of Mercury. As part of the review, the Board authorized its financial advisors to contact and hold discussions with more than 40 potential bidders, including a wide range of strategic parties and financial sponsors. The Board executed confidentiality agreements with 20 parties. The two proposals ultimately received did not yield options for a sale that would reflect the intrinsic value of Mercury. Accordingly, in a press release dated June 23, 2023, we announced, among other things, that the independent members of the Board unanimously determined to conclude the sale process and instead focus on all potential opportunities to create value, including through the enhanced execution of our strategic plan under refreshed leadership.

On June 19, 2023, the Company's former President and Chief Executive Officer, delivered a letter to the Board resigning from his positions of President and Chief Executive Officer and the Board accepted his resignation effective as of June 24, 2023. On June 23, 2023, we announced the Board has appointed William L. Ballhaus as the Company's interim President and Chief Executive Officer, effective as of June 24, 2023.

On June 29, 2023, we announced that David E. Farnsworth will be joining the Company as Executive Vice President, Chief Financial Officer, and Treasurer, on July 17, 2023.

### **RESULTS OF OPERATIONS:**

### FISCAL 2024 Vs. FISCAL 2023

The Company has applied the FAST Act Modernization and Simplification of Regulation S-K, which limits the discussion to the two most recent fiscal years. Refer to Item 7 of the Company's Form 10-K issued on August 15, 2023 for prior year discussion related to fiscal 2023.

The following tables set forth, for the periods indicated, financial data from the Consolidated Statements of Operations and Comprehensive (Loss) Income:

(In thousands)	Fiscal 2024	As a % of Total Net Revenue	Fiscal 2023	As a % of Total Net Revenue
Net revenues	\$ 835,275	100.0 %	\$ 973,882	100.0 %
Cost of revenues	639,374	76.5	657,154	67.5
Gross margin	195,901	23.5	316,728	32.5
Operating expenses:				
Selling, general and administrative	166,786	20.1	160,637	16.5
Research and development	101,328	12.1	108,799	11.2
Amortization of intangible assets	47,661	5.7	53,552	5.5
Restructuring and other charges	26,170	3.1	6,981	0.7
Acquisition costs and other related expenses	1,710	0.2	8,444	0.8
Total operating expenses	343,655	41.2	338,413	34.7
Loss from operations	(147,754)	(17.7)	(21,685)	(2.2)
Interest income	1,199	0.1	1,053	0.1
Interest expense	(35,015)	(4.2)	(25,159)	(2.6)
Other expense, net	(7,705)	(0.9)	(2,751)	(0.3)
Loss before income taxes	(189,275)	(22.7)	(48,542)	(5.0)
Income tax benefit	(51,635)	(6.2)	(20,207)	(2.1)
Net loss	\$ (137,640)	(16.5)%	\$ (28,335)	(2.9)%

### REVENUES

Total revenues decreased \$138.6 million, or 14.2%, to \$835.3 million during fiscal 2024, as compared to \$973.9 million during fiscal 2023. Revenues decreased year over year as we continue to prioritize resources to execute our challenged programs, transition from our higher mix of development programs and aim to better align our operating cadence with prudent working capital management. As a result, we are observing a temporary volume shift in our total revenue, including our point in

time revenue and over time revenue which decreased by approximately \$56.3 million and \$82.3 million, respectively. Over time revenue represented 55% of total revenues during fiscal 2024, as compared to 56% of total revenues during fiscal 2023.

During fiscal 2024, we experienced incremental net EAC change impact across various programs with revenue recognized over time, including our challenged programs. For the challenged programs, which are recognized over time, we have recognized a majority of the revenue and related cost as we acquired material and applied labor over the period of performance to progress these programs in prior periods. As we continue to resolve technical challenges and complete these programs, which consumes a significant amount of operational capacity, the remaining revenues on these challenged programs are recognized, however these revenues represent a very small proportion of the total contract value. In addition, we adjusted our estimates at completion for incremental technical and execution costs in the period, especially as related to one of our challenged programs as well as certain other development and production programs resulting in a cumulative adjustment to reduce revenues in fiscal 2024. Despite the net EAC change impact we experienced on our programs, the trend in the net EAC change impact of these programs has reduced significantly as we retire risk across the portfolio. In addition, as we transition our operating cadence with a goal of more properly balancing our material purchases with contract awards and resource availability to drive better working capital results, we are experiencing a near-term revenue timing dynamic.

The reduction in revenue was also contributed to by a temporary, self-imposed pause in operations at one of our sites. In the second quarter of fiscal 2024, we paused the transition of our Common Processing Architecture toward full-rate production in order to retire risk and validate the producibility and scalability of the design. We believe we drove to root cause and implemented corrective action in our common processing architecture. We initiated limited pilot production in the fourth quarter of fiscal 2024, which returned positive results in terms of yield and is an important initial step toward full-scale production. We remain confident that the significant investments we are making in this area will lead to profitable organic growth where we see robust demand for our unique ability to support our customers' stringent mission-critical needs.

We experienced revenue decreases across all product groupings, including integrated solutions, modules and sub-assemblies and components which decreased \$115.8 million, \$18.4 million and \$4.4 million, respectively. The decrease in total revenue was primarily driven by the radar, C4I, and electronic warfare end applications decreases of \$119.1 million, \$25.6 million, and \$23.9 million, respectively, partially offset by increases to other sensor and effector end applications of \$16.4 million. We experienced decreases across several of our platforms during fiscal 2024 when compared to fiscal 2023; Airborne, Land, and Naval platforms decreased \$60.9 million, \$50.3 million, and \$36.0 million, respectively, partially offset by an increase to Other platforms of \$8.6 million. The largest program decreases were related to the LTAMDS, THAAD and F-16 programs, partially offset by increases to the SCAR and a strategic weapons programs when compared to the prior period. There were no programs comprising 10% or more of our revenues for fiscal 2024 and 2023.

### **GROSS MARGIN**

Gross margin was 23.5% for fiscal 2024, a decrease of 900 basis points from the 32.5% gross margin realized during fiscal 2023. The lower gross margin was driven by net EAC change impacts to revenue programs recognized over time and higher manufacturing adjustments of \$44.9 million, related to inventory reserves, warranty expense, scrap, and certain other non-recurring cost adjustments. The increase in inventory reserves was primarily related to programs with end of life components, where design changes have occurred, as well as configuration changes necessary to drive efficient production in the common processing architecture. The increase in scrap was primarily a result of higher levels of discrepant material especially as related to the common processing architecture across several of our remaining challenged programs. We have several initiatives underway to address more efficient and cost-effective producibility of these subsystems.

Additionally, the growth in estimated costs to complete on our over time revenue programs during fiscal 2024 has significantly reduced the overall margins. Net margin impact of approximately \$73.2 million was recorded in fiscal 2024 resulting in an incremental impact of approximately \$17.0 million to gross margin, or 300 basis points, when compared to the prior period. Approximately \$30.2 million of net EAC change impact in fiscal 2024 was attributable to the challenged programs, of which a total of \$20.0 million related to two programs. The remaining \$43.0 million was incurred across certain other development and production programs based on facts and circumstances in the year.

We had the following aggregate effects of favorable and unfavorable margin impacts as a result of changes in estimates across our portfolio for the period presented:

(in thousands)	Ju	me 28, 2024	June 30, 2023		
Gross favorable	\$	17,622	\$ 12,291		
Gross unfavorable		(90,867)	(68,557)		
Net impact of changes in estimates	\$	(73,245)	\$ (56,266)		

The changes in estimates are assessed based on historical results and cumulative adjustments are recorded to recognize revenue to date based on changes in estimated margin on programs, including impact of contract amendments, factored for potential risks and opportunities. We utilize the latest and best information available when revising our estimates and apply consistent judgement across the full portfolio of programs.

### SELLING, GENERAL AND ADMINISTRATIVE

Selling, general and administrative expenses increased \$6.2 million, or 3.8%, to \$166.8 million during fiscal 2024 as compared to \$160.6 million during fiscal 2023. The increase was primarily driven by higher bad debt expense of \$15.3 million due to contract asset reserves as a result of ongoing negotiations of settlement terms with our customers to reduce scope, or otherwise exit contracts, primarily as related to certain challenged programs. This increase was partially offset by lower compensation costs of \$8.5 million, including stock compensation, benefits and salary expense, as a result of the reductions in force initiated on August 9, 2023, January 12, 2024, and June 17, 2024 as well as lower consulting fees of \$1.9 million compared to fiscal 2023.

#### RESEARCH AND DEVELOPMENT

Research and development expenses decreased \$7.5 million, or 6.9%, to \$101.3 million during fiscal 2024, as compared to \$108.8 million for fiscal 2023. The decrease was primarily due to lower compensation expense of \$1.9 million associated with headcount reductions of 128 employees in fiscal 2024 as well as higher CRAD of \$15.4 million in the period, partially offset by higher bonus expenses of \$3.1 million.

### AMORTIZATION OF INTANGIBLE ASSETS

Amortization of intangible assets decreased \$5.9 million to \$47.7 million during fiscal 2024, as compared to \$53.6 million for fiscal 2023, primarily due to the backlog from our Avalex acquisition becoming fully amortized in fiscal 2023, and various other developed technologies, and customer relationship intangibles from previous acquisitions becoming fully amortized during fiscal 2024.

### RESTRUCTURING AND OTHER CHARGES

During fiscal 2024, we incurred \$26.2 million of restructuring and other charges, as compared to \$7.0 million in fiscal 2023. During fiscal 2024, we initiated several cost savings measures that simplify our organizational structure, facilitate clearer accountability, and align our priorities, including: (i) embedding the 1MPACT value creation initiatives and execution into our operations; (ii) streamlining organizational structure and removing areas of redundancy between corporate and divisional organizations; and (iii) reducing selling, general, and administrative headcount and rebalancing discretionary and third party spending to better align with our priority areas. On July 20, 2023, we executed the plan to embed the 1MPACT value creation initiatives into operations, and on August 9, 2023, we approved and initiated a workforce reduction that, together with the 1MPACT related action, eliminated approximately 150 positions resulting in \$9.6 million of severance costs. On January 12, 2024, we initiated and approved a workforce reduction that eliminated approximately 100 positions resulting in \$9.8 million of severance costs. On June 17, 2024, we approved and initiated workforce reductions that eliminated an additional 100 positions resulting in \$6.8 million of severance costs. Restructuring and other charges during fiscal 2023 primarily related to 1MPACT including \$3.4 million of severance costs, \$1.8 million of third party consulting costs, \$1.8 million of costs for facility optimization efforts, including \$1.3 million related to lease asset impairment.

All of the Restructuring and Other Charges is classified as Operating expenses in the Consolidated Statements of Operations and Comprehensive (Loss) Income and any remaining restructuring obligations are expected to be paid within the next twelve months.

### **ACQUISITION COSTS AND OTHER RELATED EXPENSES**

Acquisition costs and other related expenses were \$1.7 million during fiscal 2024, as compared to \$8.4 million during fiscal 2023. The acquisition costs and other related expenses we incurred during fiscal 2024 includes \$0.7 million related to run-rate amortization of fair value adjustments from purchase accounting, \$0.3 million related to the conclusion of the Board of Directors' review of strategic alternatives, as well as \$0.3 million for third-party advisory fees in connection with engagements

by activist investors. Acquisition costs during fiscal 2023 were primarily related to \$3.7 million associated with the Board of Directors' review of strategic alternatives and \$3.5 million for third party advisory fees in connection with engagements by activist investors.

#### INTEREST INCOME

Interest income remained consistent at \$1.2 million in fiscal 2024 compared to \$1.1 million in fiscal 2023.

#### INTEREST EXPENSE

Interest expense for fiscal 2024 increased to \$35.0 million, as compared to \$25.2 million in fiscal 2023. The increase was driven by an increase in interest rates and higher average borrowings on our Revolver. Borrowings under our Revolver were \$591.5 million and \$511.5 million at June 28, 2024 and June 30, 2023, respectively.

### OTHER EXPENSE, NET

Other expense, net was \$7.7 million during fiscal 2024, as compared to \$2.8 million in fiscal 2023. Fiscal 2024 includes \$4.9 million of litigation and settlement costs, \$3.4 million of financing costs and \$0.4 million of net foreign currency translation losses, partially offset by other income of \$1.3 million during fiscal 2024. There was \$2.3 million of financing costs and \$2.1 million of litigation and settlement costs, partially offset by net foreign currency translation gains of \$1.6 million during fiscal 2023.

### **INCOME TAXES**

We recorded an income tax benefit of \$51.6 million and \$20.2 million on losses before income taxes of \$189.3 million and \$48.5 million for fiscal years 2024 and 2023, respectively.

The effective tax rate for fiscal 2024 differed from the federal statutory rate primarily due to federal and state research and development tax credits and state taxes, partially offset by tax provisions related to stock compensation.

The effective tax rate for fiscal 2023 differed from the federal statutory rate primarily due to federal and state research and development tax credits, releases to reserves for unrecognized income tax benefits and state taxes, partially offset by valuation allowances recorded and tax provisions related to stock compensation.

We continue to maintain a valuation allowance on the majority of our foreign net operating loss carryforwards and state research and development tax credit carryforwards. Based on forecasted taxable income and the scheduled reversal of the remaining deferred tax assets, we believe it is more likely than not that all other deferred tax assets will be realized.

### LIQUIDITY AND CAPITAL RESOURCES

Our primary sources of liquidity come from existing cash and cash generated from operations, our Revolver, and our ability to raise capital under our universal shelf registration statement. Our near-term fixed commitments for cash expenditures consist primarily of payments under operating leases and inventory purchase commitments. We experienced growth in our working capital balances and, in particular, related to unbilled receivables and inventory over fiscal 2022 and 2023. As we complete our challenged programs and then receive follow-on production awards, we believe that both unbilled receivables and inventory is expected to convert to cash reducing our working capital balances. During fiscal 2024, our working capital balance declined \$93.3 million compared to the prior year.

Based on our current plans and business conditions, we believe that existing cash and cash equivalents, our available Revolver, cash generated from operations and our financing capabilities will be sufficient to satisfy our anticipated cash requirements for at least the next twelve months.

### Shelf Registration Statement

On October 4, 2023, we filed a shelf registration statement on Form S-3ASR with the SEC. The shelf registration statement, which was effective upon filing with the SEC, registered each of the following securities: debt securities, preferred stock, common stock, warrants and units. We intend to use the proceeds from financings using the shelf registration statement for general corporate purposes, which may include the following:

- the acquisition of other companies or businesses;
- the repayment and refinancing of debt;
- capital expenditures;
- working capital; and
- other purposes as described in the prospectus supplement.

We have an unlimited amount available under the shelf registration statement.

### Revolving Credit Facilities

On February 28, 2022, we amended the Revolver to increase and extend the borrowing capacity to a \$1.1 billion, 5-year revolving credit line, with the maturity extended to February 28, 2027. The borrowing capacity as defined under the Revolver as of June 28, 2024 is approximately \$986.0 million, less outstanding borrowings against of \$591.5 million. See Note L in the accompanying consolidated financial statements for further discussion of the Revolver.

On November 7, 2023, due to the uncertainty surrounding a government shutdown or prolonged continuing resolution and the potential impact on the second quarter and fiscal 2024 results, we proactively executed Amendment No. 5 to the Revolver, as amended to date, with a syndicate of commercial banks and Bank of America, N.A acting as the administrative agent allowing for a temporary increase in the Consolidated Total Net Leverage Ratio covenant requirement from 4.50 to 5.25 for the second quarter ended December 29, 2023. As part of Amendment No. 5, we agreed to a temporary reduction of Revolver capacity to \$750.0 million through the earlier of May 15, 2024 or the filing of the compliance certificate for the period ended March 29, 2024.

During fiscal 2024, we borrowed \$105.0 million and paid down \$25.0 million. As of June 28, 2024, the Company was in compliance with all covenants and conditions under the Revolver.

During fiscal 2025, on August 13, 2024, we executed Amendment No. 6 to the Revolver, decreasing the permanent borrowing capacity to \$900.0 million, with a temporary reduction in credit availability to \$750.0 million until we meet a minimum consolidated EBITDA level of \$75.0 million excluding (a) adjustments for cost savings, operating expense reductions and synergies, (b) EAC charges and other non-cash expenses, charges, and losses addbacks and (c) deducts to reverse EAC charges previously added back, in each case for a last twelve-month period.

### Receivables Purchase Agreement

On September 27, 2022, we entered into an uncommitted receivables purchase agreement ("RPA"), pursuant to which we may offer to sell certain customer receivables, subject to the terms and conditions of the RPA. The RPA is an uncommitted arrangement such that we are not obligated to sell any receivables and the party has no obligation to purchase any receivables from us. Pursuant to the RPA, the party may purchase certain of our customer receivables at a discounted rate, subject to a limit that as of any date, the total amount of purchased receivables held by the party, less the amount of all collections received on such receivables, may not exceed \$20.0 million. The RPA has an indefinite term and the agreement remains in effect until it is terminated by either party. On March 14, 2023, we amended the RPA to increase the capacity from \$20.0 million to \$30.6 million. On June 21, 2023, we further amended the RPA to increase the capacity from \$30.6 million to \$60.0 million. We factored accounts receivable and incurred factoring fees of approximately \$33.8 million and \$1.9 million, respectively, in fiscal 2024. We factored accounts receivable and incurred factoring fees of approximately \$30.5 million and \$0.6 million, respectively, in fiscal 2023.

On August 13, 2024, we entered into a \$60.0 million committed receivables purchase and servicing agreement ("RPSA") with a new party. The RPSA has an initial term of two years. Pursuant to the RPSA, the new party has committed to purchase receivables at a discount rate from a list of our customers, maintaining a balance of purchased receivables at or below \$60 million.

### **CASH FLOWS**

	For the Fiscal	d Years Ended			
(In thousands)	Ju	ne 28, 2024	J	June 30, 2023	
Net cash provided by (used in) operating activities	\$	60,382	\$	(21,254)	
Net cash used in investing activities	\$	(34,291)	\$	(38,561)	
Net cash provided by financing activities	\$	82,680	\$	65,429	
Net increase in cash and cash equivalents	\$	108,958	\$	5,909	
Cash and cash equivalents at end of year	\$	180,521	\$	71,563	

Our cash and cash equivalents increased by \$109.0 million during fiscal 2024 primarily as the result of \$80.0 million net borrowings on our Revolver and \$60.4 million provided by operating activities, partially offset by \$34.3 million invested in purchases of property and equipment.

### **Operating Activities**

During fiscal 2024, we had an inflow of \$60.4 million in cash from operating activities compared to a \$21.3 million outflow during fiscal 2023. The increase during fiscal 2024 was primarily due to an inflow of \$76.5 million from accounts receivable, unbilled receivables and costs in excess of billings as compared to a \$58.7 million outflow in fiscal 2023. Fiscal 2024 included a lower outflow due to the benefit for deferred income taxes. Fiscal 2024 also included inflows of \$0.1 million and \$0.7 million due to inventory and accounts payable, accrued expenses, and accrued compensation, respectively as compared to outflows of \$64.1 million and \$16.7 million in fiscal 2023, respectively. This activity was partially offset by a net loss of \$137.6 million, a \$17.3 million inflow from deferred revenues and customer advances, and an outflow of \$11.2 million due to income taxes payable in fiscal 2024, as compared to a net loss of \$28.3 million, a \$40.7 million inflow from deferred revenues and customer advances, and an inflow of \$9.9 million due to income taxes payable in fiscal 2023.

### **Investing Activities**

During fiscal 2024, we invested \$34.3 million, a decrease of \$4.3 million, as compared to \$38.6 million during fiscal 2023 primarily due to lower purchases of property and equipment.

### Financing Activities

During fiscal 2024, we had \$82.7 million in cash provided by financing activities, as compared to \$65.4 million during fiscal 2023. During fiscal 2024, we had \$80.0 million of net borrowings on our Revolver as compared to \$60.0 million of net borrowings during fiscal 2023. In fiscal 2024, we also had \$4.6 million of proceeds from employee stock plans, as compared to \$5.5 million in fiscal 2023.

### COMMITMENTS AND CONTRACTUAL OBLIGATIONS

The following is a schedule of our commitments and contractual obligations outstanding at June 28, 2024:

(In thousands)	Total		Total		Less Than 1 Year				 3-5 Years	lore Than 5 Years
Operating leases	\$	89,190	\$	15,286	\$	27,516	\$ 23,482	\$ 22,906		
Purchase obligations		122,195		122,195			 	 		
	\$	211,385	\$	137,481	\$	27,516	\$ 23,482	\$ 22,906		

See Note B and Note I to the consolidated financial statements for more information regarding our obligations under leases.

Purchase obligations represent open non-cancelable purchase commitments for certain inventory components and services used in normal operations. The purchase commitments covered by these agreements are for less than one year and aggregated \$122.2 million at June 28, 2024.

We had a liability at June 28, 2024 of \$7.7 million for uncertain tax positions that have been taken or are expected to be taken in various income tax returns. We do not know the ultimate resolution of these uncertain tax positions and as such, do not know the ultimate timing of payments related to this liability. Accordingly, these amounts are not included in the above table.

Our standard product sales and license agreements entered into in the ordinary course of business typically contain an indemnification provision pursuant to which we indemnify, hold harmless, and agree to reimburse the indemnified party for losses suffered or incurred in connection with certain intellectual property infringement claims by any third party with respect to our products. Such provisions generally survive termination or expiration of the agreements. The potential amount of future payments we could be required to make under these indemnification provisions is, in some instances, unlimited.

As part of our strategy for growth, we continue to explore acquisitions or strategic alliances. The associated acquisition costs incurred in the form of professional fees and services may be material to the future periods in which they occur, regardless of whether the acquisition is ultimately completed.

We may elect from time to time to purchase and subsequently retire shares of common stock in order to settle employees' tax liabilities associated with vesting of a restricted stock award. These transactions would be treated as a use of cash in financing activities in our Consolidated Statements of Cash Flows.

### **OFF-BALANCE SHEET ARRANGEMENTS**

Other than certain indemnification provisions, we do not have any off-balance sheet financing arrangements or liabilities, guarantee contracts, retained or contingent interests in transferred assets, or any obligation arising out of a material variable interest in an unconsolidated entity. We do not have any majority-owned subsidiaries that are not consolidated in the financial statements. Additionally, we do not have an interest in, or relationships with, any special purpose entities.

### RELATED PARTY TRANSACTIONS

During fiscal 2024 and 2023, we did not engage in any related party transactions.

### NON-GAAP FINANCIAL MEASURES

In our periodic communications, we discuss certain important measures that are not calculated according to U.S. generally accepted accounting principles ("GAAP"), including adjusted EBITDA, adjusted loss, adjusted loss per share, and free cash flow.

Adjusted EBITDA is defined as net income before other non-operating adjustments, interest income and expense, income taxes, depreciation, amortization of intangible assets, restructuring and other charges, impairment of long-lived assets, acquisition, financing and other third party costs, fair value adjustments from purchase accounting, litigation and settlement income and expense, COVID related expenses, and stock-based and other non-cash compensation expense. We use adjusted EBITDA as an important indicator of the operating performance of our business. We use adjusted EBITDA in internal forecasts and models when establishing internal operating budgets, supplementing the financial results and forecasts reported to our board of directors, determining a portion of bonus compensation for executive officers and other key employees based on operating performance, evaluating short-term and long-term operating trends in our operations and allocating resources to various initiatives and operational requirements. We believe that adjusted EBITDA permits a comparative assessment of our operating performance, relative to our performance based on our GAAP results, while isolating the effects of charges that may vary from period to period without any correlation to underlying operating performance. We believe that these non-GAAP financial adjustments are useful to investors because they allow investors to evaluate the effectiveness of the methodology and information used by management in our financial and operational decision-making. We believe that trends in our adjusted EBITDA are valuable indicators of our operating performance.

Adjusted EBITDA is a non-GAAP financial measure and should not be considered in isolation or as a substitute for financial information provided in accordance with GAAP. This non-GAAP financial measure may not be computed in the same manner as similarly titled measures used by other companies. We expect to continue to incur expenses similar to the adjusted EBITDA financial adjustments described above, and investors should not infer from our presentation of this non-GAAP financial measure that these costs are unusual, infrequent or non-recurring.

The following table reconciles our net (loss) income, the most directly comparable GAAP financial measure, to our adjusted EBITDA:

	For the Fiscal Years Ended						
(In thousands)	June 28, 202	24	June 30, 2023		July 1, 2022		
Net (loss) income	\$ (137,6	(40)	\$ (28,335)	\$	11,275		
Other non-operating adjustments, net	(5	92)	(1,589)		2,932		
Interest (expense) income, net	33,8	16	24,106		5,663		
Income tax (benefit) provision	(51,6	35)	(20,207)		7,120		
Depreciation	40,3	69	43,777		33,150		
Amortization of intangible assets	47,6	61	53,552		60,267		
Restructuring and other charges <sup>(1)</sup>	26,1	70	6,981		27,445		
Impairment of long-lived assets		—					
Acquisition, financing and other third party costs <sup>(2)</sup>	4,3	70	10,019		13,608		
Fair value adjustments from purchase accounting	7	10	356		(2,009)		
Litigation and settlement expense, net	4,9	27	495		1,908		
COVID related expenses		—	67		689		
Stock-based and other non-cash compensation expense <sup>(3)</sup>	41,2	257	43,031		38,459		
Adjusted EBITDA	\$ 9,4	13	\$ 132,253	\$	200,507		

<sup>(1)</sup> Restructuring and other charges for fiscal 2024 are related to management's decision to undertake certain actions to realign our cost structure through workforce reductions and the closure of certain facilities, businesses and product lines. These charges are typically related to acquisitions and organizational redesign programs initiated as part of discrete post-acquisition integration activities. We believe these items are non-routine and may not be indicative of ongoing operating results.

Adjusted income and adjusted EPS exclude the impact of certain items and, therefore, have not been calculated in accordance with GAAP. We believe that exclusion of these items assists in providing a more complete understanding of our underlying results and trends and allows for comparability with our peer company index and industry. These non-GAAP financial measures may not be computed in the same manner as similarly titled measures used by other companies. We use these measures along with the corresponding GAAP financial measures to manage our business and to evaluate our performance compared to prior periods and the marketplace. We define adjusted income as net income before other non-operating adjustments, amortization of intangible assets, restructuring and other charges, impairment of long-lived assets, acquisition, financing and other third party costs, fair value adjustments from purchase accounting, litigation and settlement income and expense, COVID related expenses, and stock-based and other non-cash compensation expense. The impact to income taxes includes the impact to the effective tax rate, current tax provision and deferred tax provision. Adjusted EPS expresses adjusted income on a per share basis using weighted average diluted shares outstanding.

Adjusted income and adjusted EPS are non-GAAP financial measures and should not be considered in isolation or as a substitute for financial information provided in accordance with GAAP. We expect to continue to incur expenses similar to the adjusted income and adjusted EPS financial adjustments described above, and investors should not infer from our presentation of these non-GAAP financial measures that these costs are unusual, infrequent or non-recurring.

<sup>(2)</sup> Acquisition, financing and other third party costs for fiscal 2024 are related to financing costs, and the conclusion of the Board's review of strategic alternatives.

<sup>(3)</sup> Effective in the first quarter of fiscal 2023, the Company increased the rate of its matching contributions from 3% to 6% of participants' eligible annual compensation and changed the form of these contributions from cash to company stock. Fiscal 2023 also includes forfeitures of \$6.8 million of stock-based compensation from the Company's former CEO's resignation.

The following table reconciles net (loss) income and diluted (loss) earnings per share, the most directly comparable GAAP financial measures, to adjusted income and adjusted EPS:

	For the Fiscal Years Ended						
(In thousands, except per share data)	June 28,	2024	June 30,	2023	2022		
Net (loss) income and diluted (loss) earnings per share	\$(137,640)	\$ (2.38)	\$ (28,335)	\$ (0.50)	\$ 11,275	\$ 0.20	
Other non-operating adjustments, net	(592)		(1,589)		2,932		
Amortization of intangible assets	47,661		53,552		60,267		
Restructuring and other charges <sup>(1)</sup>	26,170		6,981		27,445		
Impairment of long-lived assets	_		_		_		
Acquisition, financing and other third party costs <sup>(2)</sup>	4,370		10,019		13,608		
Fair value adjustments from purchase accounting	710		356		(2,009)		
Litigation and settlement expense, net	4,927		495		1,908		
COVID related expenses	_		67		689		
Stock-based and other non-cash compensation expense <sup>(3)</sup>	41,257		43,031		38,459		
Impact to income taxes <sup>(4)</sup>	(26,621)		(27,776)		(32,309)		
Adjusted (loss) income and adjusted (loss) earnings per share	\$ (39,758)	\$ (0.69)	\$ 56,801	\$ 1.00	\$ 122,265	\$ 2.19	
Diluted weighted-average shares outstanding		57,738		56,874		55,901	

<sup>(1)</sup> Restructuring and other charges for fiscal 2024 are related to management's decision to undertake certain actions to realign our cost structure through workforce reductions and the closure of certain facilities, businesses and product lines. These charges are typically related to acquisitions and organizational redesign programs initiated as part of discrete post-acquisition integration activities. We believe these items are non-routine and may not be indicative of ongoing operating results.

Free cash flow, a non-GAAP measure for reporting cash flow, is defined as cash provided by operating activities less capital expenditures for property and equipment, which includes capitalized software development costs. We believe free cash flow provides investors with an important perspective on cash available for investments and acquisitions after making capital investments required to support ongoing business operations and long-term value creation. We believe that trends in our free cash flow can be valuable indicators of our operating performance and liquidity.

Free cash flow is a non-GAAP financial measure and should not be considered in isolation or as a substitute for financial information provided in accordance with GAAP. This non-GAAP financial measure may not be computed in the same manner as similarly titled measures used by other companies. We expect to continue to incur expenditures similar to the free cash flow adjustment described above, and investors should not infer from our presentation of this non-GAAP financial measure that these expenditures reflect all of our obligations which require cash.

The following table reconciles cash provided by (used in) operating activities, the most directly comparable GAAP financial measure, to free cash flow:

	_	For the Fiscal Years Ended							
(In thousands)		Jur	ne 28, 2024	J	une 30, 2023		July 1, 2022		
Net cash provided by (used in) operating activities		\$	60,382	\$	(21,254)	\$	(18,869)		
Purchase of property and equipment	_		(34,291)		(38,796)		(27,656)		
Free cash flow	_	\$	26,091	\$	(60,050)	\$	(46,525)		

<sup>(2)</sup> Acquisition, financing and other third party costs for fiscal 2024 are related to financing costs, and the conclusion of the Board's review of strategic alternatives.

<sup>(3)</sup> Effective in the first quarter of fiscal 2023, the Company increased the rate of its matching contributions from 3% to 6% of participants' eligible annual compensation and changed the form of these contributions from cash to company stock. Fiscal 2023 also includes forfeitures of \$6.8 million of stock-based compensation from the Company's former CEO's resignation.

<sup>(4)</sup> Impact to income taxes is calculated by recasting income before income taxes to include the add-backs involved in determining adjusted income and recalculating the income tax provision using this adjusted income from operations before income taxes. The impact to income taxes includes the impact to the effective tax rate, current tax provision and deferred tax provision.

### CRITICAL ACCOUNTING POLICIES AND SIGNIFICANT JUDGMENTS AND ESTIMATES

We have identified the policies discussed below as critical to understanding our business and our results of operations. The impact and any associated risks related to these policies on our business operations are discussed throughout Management's Discussion and Analysis of Financial Condition and Results of Operations where such policies affect our reported and expected financial results. We believe the following critical accounting policies to be those most important to the portrayal of our financial position and results of operations and those that require the most subjective judgment.

### REVENUE RECOGNITION

We recognize revenue at a point in time or over time as the performance obligations are met. A performance obligation is a promise in a contract to transfer a distinct good or service to the customer. Contracts with distinct performance obligations recognized at a point in time, with or without an allocation of the transaction price, totaled 45% and 44% of revenues for the fiscal years ended June 28, 2024 and June 30, 2023, respectively. Total revenue recognized under contracts over time was 55% and 56% of revenues for the fiscal years ended June 28, 2024 and June 30, 2023, respectively.

Revenue recognized at a point in time generally relates to contracts that include a combination of components, modules and sub-assemblies, integrated subsystems and related system integration or other services. Revenue is recognized at a point in time for these products and services (versus over time recognition) due to the following: (i) customers are only able to consume the benefits provided by us upon completion of the product or service; (ii) customers do not control the product or service prior to completion; and (iii) we do not have an enforceable right to payment at all times for performance completed to date. Accordingly, there is little judgment in determining when control of the good or service transfers to the customer, and revenue is recognized upon shipment (for goods) or completion (for services).

For contracts with multiple performance obligations, the transaction price is allocated to each performance obligation using the standalone selling price of each distinct good or service in the contract. Standalone selling prices of our goods and services are generally not directly observable. Accordingly, the primary method used to estimate standalone selling price is the expected cost plus a margin approach, under which we forecast the expected costs of satisfying a performance obligation and then add an appropriate margin for that distinct good or service. The objective of the expected cost plus a margin approach is to determine the price at which we would transact if the product or service were sold by us on a standalone basis. Our determination of the expected cost plus a margin approach involves the consideration of several factors based on the specific facts and circumstances of each contract. Specifically, we consider the cost to produce the deliverable, the anticipated margin on that deliverable, the selling price and profit margin for similar parts, our ongoing pricing strategy and policies, often based on the price list established and updated by management on a regular basis, the value of any enhancements that have been built into the deliverable and the characteristics of the varying markets in which the deliverable is sold.

Revenue is recognized over time (versus point in time recognition) for long-term contracts with development, production and service activities where the performance obligations are satisfied over time. These over time contracts involve the design, development, manufacture, or modification of complex modules and sub-assemblies or integrated subsystems and related services. Revenue is recognized over time, given: (i) our performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or (ii) our performance creates an asset with no alternative use to us and (iii) we have an enforceable right to payment for performance completed to date. We consider the nature of these contracts and the types of products and services provided when determining the proper accounting for a particular contract. These contracts include both fixed-price and cost reimbursable contracts. Our cost reimbursable contracts typically include cost-plus fixed fee and time and material ("T&M") contracts. We consider whether contracts should be combined or segmented, and based on this assessment, we combine closely related contracts when all the applicable criteria are met. The combination of two or more contracts requires judgment in determining whether the intent of entering into the contracts was effectively to enter into a single contract, which should be combined to reflect an overall profit rate. Similarly, we may separate an arrangement, which may consist of a single contract or group of contracts, with varying rates of profitability, only if the applicable criteria are met. Judgment also is involved in determining whether a single contract or group of contracts may be segmented based on how the arrangement and the related performance criteria were negotiated. The decision to combine a group of contracts or segment a contract could change the amount of revenue and gross profit recorded in a given period. For all types of contracts, we recognize anticipated contract losses as soon as they become known and estimable. These losses are recognized in advance of contract performance and as of June 28, 2024, approximately \$4.6 million of these costs were in Accrued expenses on our Consolidated Balance Sheet.

For over time contracts, we typically leverage the input method, using a cost-to-cost measure of progress. We believe that this method represents the most faithful depiction of our performance because it directly measures value transferred to the customer. Contract estimates and estimates of any variable consideration are based on various assumptions to project the outcome of future events that may span several years. These assumptions include: the amount of time to complete the contract, including the assessment of the nature and complexity of the work to be performed; the cost and availability of materials; the availability of subcontractor services and materials; and the availability and timing of funding from the customer. We bear the

risk of changes in estimates to complete on a fixed-price contract which may cause profit levels to vary from period to period. For cost reimbursable contracts, we are reimbursed periodically for allowable costs and are paid a portion of the fee based on contract progress. In the limited instances where we enter into T&M contracts, revenue recognized reflects the number of direct labor hours expended in the performance of a contract multiplied by the contract billing rate, as well as reimbursement of other direct billable costs. For T&M contracts, we elected to use a practical expedient permitted by ASC 606 whereby revenue is recognized in the amount for which we have a right to invoice the customer based on the control transferred to the customer. For over time contracts, we recognize anticipated contract losses as soon as they become known and estimable.

Accounting for contracts recognized over time requires significant judgment relative to estimating total contract revenues and costs, in particular, assumptions relative to the amount of time to complete the contract, including the assessment of the nature and complexity of the work to be performed. Our estimates are based upon the professional knowledge and experience of our engineers, program managers and other personnel, who review each over time contract monthly to assess the contract's schedule, performance, technical matters and estimated cost at completion. Changes in estimates are applied retrospectively and when adjustments in estimated contract costs are identified, such revisions may result in current period adjustments to earnings applicable to performance in prior periods.

We generally do not provide our customers with rights of product return other than those related to assurance warranty provisions that permit repair or replacement of defective goods over a period of 12 to 36 months. We accrue for anticipated warranty costs upon product shipment. We do not consider activities related to such assurance warranties, if any, to be a separate performance obligation. We offer separately priced extended warranties which generally range from 12 to 36 months that are treated as separate performance obligations. The transaction price allocated to extended warranties is recognized over time in proportion to the costs expected to be incurred in satisfying the obligations under the contract.

On over time contracts, the portion of the payments retained by the customer is not considered a significant financing component because most contracts have a duration of less than one year and payment is received as progress is made. Many of our over time contracts have milestone payments, which align the payment schedule with the progress towards completion on the performance obligation. On some contracts, we may be entitled to receive an advance payment, which is not considered a significant financing component because it is used to facilitate inventory demands at the onset of a contract and to safeguard us from the failure of the other party to abide by some or all of their obligations under the contract.

We define service revenues as revenue from activities that are not associated with the design, development, production, or delivery of tangible assets, software or specific capabilities sold by us. Examples of our service revenues include: analyst services and systems engineering support, consulting, maintenance and other support, testing and installation. We combine our product and service revenues into a single class as services revenues are less than 10 percent of total revenues.

### INVENTORY VALUATION

We value our inventory at the lower of cost (first-in, first-out) or its net realizable value. We write down inventory for excess and obsolescence based upon assumptions about future demand, product mix and possible alternative uses. Actual demand, product mix and alternative usage may be higher or lower resulting in variations in on our gross margin.

### GOODWILL, INTANGIBLE ASSETS AND LONG-LIVED ASSETS

We evaluate our goodwill for impairment annually in the fourth quarter and in any interim period in which events or circumstances arise that indicate our goodwill may be impaired. Indicators of impairment include, but are not limited to, a significant deterioration in overall economic conditions, a decline in our market capitalization, the loss of significant business, significant decreases in funding for our contracts, or other significant adverse changes in industry or market conditions.

We test goodwill for impairment at the reporting unit level. Goodwill impairment guidance provides entities an option to perform a qualitative assessment (commonly known as "step zero") to determine whether further impairment testing is necessary before performing the two-step test. The qualitative assessment requires significant judgments by management about macro-economic conditions including our operating environment, industry and other market considerations, entity-specific events related to financial performance or loss of key personnel, and other events that could impact the reporting unit. If we conclude that further testing is required, the impairment test is completed. Step one compares the fair value of the reporting unit with its carrying value, including goodwill. If the carrying amount of a reporting unit exceeds the reporting unit's fair value, the amount by which the carrying value exceeds the fair value is recognized as an impairment loss. We estimate the fair value of our reporting units using the income approach based upon a discounted cash flow ("DCF") model. The income approach requires the use of many assumptions and estimates including future revenues, expenses, capital expenditures, and working capital, as well as discount factors and income tax rates. The discount rates used in the DCF model were based on a weighted-average cost of capital ("WACC") determined from relevant market comparisons, adjusted upward for specific reporting unit risks (primarily the uncertainty of achieving projected operating cash flows). A terminal value growth rate was applied to the final year of the projected period, which reflects our estimate of stable, perpetual growth. We then calculated a present value of the respective cash flows for each reporting unit to arrive at an estimate of fair value under the income approach. Finally, we

compared the estimates of our fair values to our total market capitalization to assess the reasonableness of our reporting units' combined determined fair value.

Key assumptions of the forecast model over expected revenues, expenses, capital expenditures, and working capital, as well as discount factors and income tax rates are subject to a high degree of judgement and complexity. We make every effort to forecast future financial performance as accurately as possible with the information available at the time the forecast is developed. These assumptions were reviewed by management and compared to assumptions used in prior analyses and were deemed reasonable. There were no material changes in the key assumptions during the periods presented.

There are inherent uncertainties and management judgement required in these determinations and risks to the forecast included but are not limited to program/product execution, transition from development to production programs, industry related make-buy decisions, and global market conditions. Changes in these estimates and assumptions could materially affect the results of our tests for goodwill impairment. We continuously monitor and evaluate relevant events and circumstances that could unfavorably impact our significant assumptions used in testing goodwill, including macroeconomic conditions, industry and market considerations, financial performance and expectations of projected financial performance and cash flows, and changes in our stock price in relation to the carrying value of its reporting units, among other relevant factors. It is possible that future changes in such circumstances, or in the inputs and assumptions used in estimating the fair value of our reporting units, could require us to perform an interim impairment assessment and record an impairment charge. In addition, we use the market approach, which compares the reporting unit to publicly traded companies and transactions involving similar businesses, to support the conclusions of the income approach.

The Company utilizes the management approach for determining its operating segment in accordance with ASC 280. There has been no change to the Company's conclusion of one operating and reportable segment in fiscal 2024.

In accordance with FASB ASC 350, *Intangibles-Goodwill and Other* ("ASC 350"), the Company determines its reporting units based upon whether discrete financial information is available, if management regularly reviews the operating results of the component, the nature of the products offered to customers and the market characteristics of each reporting unit. A reporting unit is considered to be an operating segment or one level below an operating segment also known as a component. Component level financial information is reviewed by management across two divisions: Microelectronics, and Mission Systems. Accordingly, these were determined to be the Company's reporting units.

As part of our annual goodwill impairment testing, we utilized a discount rate for each of our reporting units, as defined by ASC 350, that we believe represents the risks that our businesses face, considering their sizes, the current economic environment, and other industry data we believe is appropriate. The discount rates for Microelectronics and Mission Systems were 9.0%, and 8.5%, respectively. The annual testing indicated that the Mission Systems reporting unit had an estimated fair value in excess of their carrying value of 5.0% and the Microelectronics reporting unit had an estimated fair value that substantially exceeded its carrying value. The carrying value of goodwill for the Mission Systems reporting unit was \$622 million as of June 28, 2024. We concluded that the Mission Systems reporting unit's goodwill was not impaired. In order to evaluate the sensitivity of the estimated fair value for Mission Systems, we assessed an increase of 1.0% in the WACC under the DCF approach would have a material impact to the Mission Systems reporting unit's fair value determination. If there are adverse trends in the Mission Systems reporting unit's expected future operating results, business plans, economic projections, anticipated future cash flows, business trends, and our market capitalization, then it could result in the carrying value of the Mission Systems reporting unit exceeding its estimated fair value and impairment charges.

We also review finite-lived intangible assets and long-lived assets when indications of potential impairment exist, such as a significant reduction in undiscounted cash flows associated with the assets. Should the fair value of our finite-lived intangible assets or long-lived assets decline because of reduced operating performance, market declines, or other indicators of impairment, a charge to operations for impairment may be necessary.

### INCOME TAXES

The determination of income tax expense requires us to make certain estimates and judgments concerning the calculation of deferred tax assets and liabilities, as well as the deductions and credits that are available to reduce taxable income. We recognize deferred tax assets and liabilities for the expected future tax consequences of events that have been included in our consolidated financial statements. Under this method, deferred tax assets and liabilities are determined based on the difference between the financial statement and tax basis of assets and liabilities using enacted tax rates for the year in which the differences are expected to reverse.

In evaluating our ability to recover deferred tax assets, we consider all available positive and negative evidence, including our past operating results, our forecast of future earnings, future taxable income and tax planning strategies. The assumptions utilized in determining future taxable income require significant judgment. We record a valuation allowance against deferred tax assets if, based upon the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. If it becomes more likely than not that a tax asset will be used for which a reserve has been provided, we reverse the

related valuation allowance. If our actual future taxable income by tax jurisdiction differs from estimates, additional allowances or reversals of reserves may be necessary.

We use a two-step approach to recognize and measure uncertain tax positions. First, the tax position must be evaluated to determine the likelihood that it will be sustained upon external examination. If the tax position is deemed more-likely-than-not to be sustained, the tax position is then assessed to determine the amount of benefit to recognize in the financial statements. The amount of the benefit that may be recognized is the largest amount that has a greater than 50% likelihood of being realized upon ultimate settlement. We reevaluate our uncertain tax positions on a quarterly basis and any changes to these positions as a result of tax audits, tax laws or other facts and circumstances could result in additional charges to operations.

#### BUSINESS COMBINATIONS

We utilize the acquisition method of accounting for business combinations and allocate the purchase price of an acquisition to the various tangible and intangible assets acquired and liabilities assumed based on their estimated fair values. We primarily establish fair value using the income approach based upon a discounted cash flow model. The income approach requires the use of many assumptions and estimates including future revenues and expenses, as well as discount factors and income tax rates. Other estimates include:

- estimated step-ups for the over time contracts fixed assets, leasehold interests and inventory;
- estimated fair values of intangible assets; and
- estimated income tax assets and liabilities assumed from the acquiree.

While we use our best estimates and assumptions as part of the purchase price allocation process to accurately value assets acquired and liabilities assumed at the business acquisition date, our estimates and assumptions are inherently uncertain and subject to refinement. As a result, during the purchase price allocation period, which is generally one year from the business acquisition date, we record adjustments to the assets acquired and liabilities assumed, with the corresponding offset to goodwill. For changes in the valuation of intangible assets between preliminary and final purchase price allocation, the related amortization is adjusted in the period it occurs. Subsequent to the purchase price allocation period any adjustment to assets acquired or liabilities assumed is included in operating results in the period in which the adjustment is determined.

### RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

See Note B to consolidated financial statements (under the caption "Recently Issued Accounting Pronouncements").

### RECENTLY ADOPTED ACCOUNTING PRONOUNCEMENTS

See Note B to consolidated financial statements (under the caption "Recently Adopted Accounting Pronouncements").

### ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

### INTEREST RATE RISK

Our exposure to interest rate risk is related primarily to our investment portfolio and the Revolver.

Our investment portfolio includes money market funds from high quality U.S. government issuers. A change in prevailing interest rates may cause the fair value of our investments to fluctuate. For example, if we hold a security that was issued with a fixed interest rate at the then-prevailing rate and the prevailing rate rises, the fair value of the principal amount of our investment will probably decline. To minimize this risk, investments are generally available for sale and we generally limit the amount of credit exposure to any one issuer.

We also are exposed to the impact of interest rate changes primarily through our borrowing activities. For our variable rate borrowings, we may use a fixed interest rate swap, effectively converting a portion of variable rate borrowings to fixed rate borrowings in order to mitigate the impact of interest rate changes on earnings. We utilize interest rate derivatives to mitigate interest rate exposure with respect to our financing arrangements. There were \$591.5 million of outstanding borrowings against the Revolver at June 28, 2024.

### CONCENTRATION OF CREDIT RISK

Financial instruments that potentially expose the Company to concentrations of credit risk consist principally of cash, cash equivalents, accounts receivable, unbilled receivables and costs in excess of billings. We place our cash and cash equivalents with financial institutions with high credit quality. As of June 28, 2024 and June 30, 2023, we had \$180.5 million and \$71.6 million, respectively, of cash and cash equivalents on deposit or invested with our financial and lending institutions.

We provide credit to customers in the normal course of business. We perform ongoing credit evaluations of our customers' financial condition and limit the amount of credit extended when deemed necessary. As of June 28, 2024, five customers accounted for 51% of our receivables, unbilled receivables and costs in excess of billings. As of June 30, 2023, five customers accounted for 48% of our receivables, unbilled receivables and costs in excess of billings.

#### FOREIGN CURRENCY RISK

We operate primarily in the United States; however, we conduct business outside the United States through our foreign subsidiaries in Switzerland, the United Kingdom, Spain, and Canada where business is largely transacted in non-U.S. dollar currencies. Accordingly, we are subject to exposure from adverse movements in the exchange rates of local currencies. Local currencies are used as the functional currency for our non-U.S. subsidiaries. Consequently, changes in the exchange rates of the currencies may impact the translation of the foreign subsidiaries' statements of operations into U.S. dollars, which may in turn affect our Consolidated Statement of Operations.

We have not entered into any financial derivative instruments that expose us to material market risk, including any instruments designed to hedge the impact of foreign currency exposures. We may, however, hedge such exposure to foreign currency exchange rate fluctuations in the future.

### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors Mercury Systems, Inc.:

Opinions on the Consolidated Financial Statements and Internal Control Over Financial Reporting

We have audited the accompanying consolidated balance sheets of Mercury Systems, Inc. and subsidiaries (the Company) as of June 28, 2024 and June 30, 2023, the related consolidated statements of operations and comprehensive (loss) income, shareholders' equity, and cash flows for each of the fiscal years in the three-year period ended June 28, 2024, and the related notes and financial statement schedule II - valuation and qualifying accounts (collectively, the consolidated financial statements). We also have audited the Company's internal control over financial reporting as of June 28, 2024, based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of June 28, 2024 and June 30, 2023, and the results of its operations and its cash flows for each of the fiscal years in the three-year period ended June 28, 2024, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of June 28, 2024 based on criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the consolidated financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Estimate of total contract costs to be incurred for certain fixed price contract revenue recognized over time

As discussed in Note B to the consolidated financial statements, revenue recognized over time for the year ended June 28, 2024 represented 55% of total revenues. For contracts where revenue is recognized over time under fixed price arrangements, the Company recognizes revenue based on the ratio of (1) actual contract costs incurred to date to (2) the Company's estimate of total contract costs to be incurred.

We identified the evaluation of total contract costs to be incurred for certain fixed price contract revenue recognized over time as a critical audit matter given the complex nature of the Company's products sold under such contracts. In particular, evaluating the Company's judgments regarding the amount of time to complete the contracts, including the assessment of the nature and complexity of the work to be performed, involved a high degree of subjective auditor judgment.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the Company's process to develop estimates of total contract costs to be incurred for partially completed performance obligations. This included controls related to the estimated amount of time to complete the contracts, including the assessment of the nature and complexity of the work to be performed. We considered factors, including the value and stage of completion, to select certain customers' contracts to evaluate the Company's assumptions underlying the estimate of total contract costs to be incurred. We inspected the selected contracts to evaluate the Company's identification of performance obligations and the determined method for measuring contract progress. We compared the Company's original or prior period estimate of total contract costs to be incurred to the actual costs incurred for completed contracts to assess the Company's ability to accurately estimate costs. We inquired of operational personnel of the Company to evaluate progress to date, the estimate of remaining costs to be incurred, and factors impacting the amount of time and cost to complete the selected contracts, including the assessment of the nature and complexity of the work to be performed. We inspected correspondence, if any, between the Company and the customers for the selected contracts as part of our evaluation of contract progress.

Valuation of goodwill for the Mission Systems reporting unit as of an interim period

As discussed in Notes B and F to the consolidated financial statements, the Company's consolidated goodwill balance as of June 28, 2024 was 938.1 million, which included goodwill related to the Mission Systems reporting unit. Annually, or whenever events or changes in circumstances indicate potential asset impairment has occurred, the Company assesses goodwill for impairment. As a result of the sustained decline in the Company's stock price and overall market capitalization during the third quarter ended March 29, 2024, along with other qualitative considerations, management concluded that there was a triggering event for its Mission Systems reporting unit that required an interim impairment test.

We identified the evaluation of the fair value of Mission Systems reporting unit goodwill as a critical audit matter. Subjective and challenging auditor judgment and specialized skills and knowledge were required to evaluate certain assumptions used to determine the fair value of the reporting unit in the Company's third quarter impairment test. These assumptions included forecasted revenue growth rates including the terminal growth rate, margin rates, and net working capital adjustments used in determining the forecasted cash flows, and the discount rate. Minor changes to these assumptions could have had a significant effect on the fair value determined and the resulting assessment of the carrying value of the Mission Systems reporting unit goodwill.

The following are the primary procedures we performed to address this critical audit matter. We evaluated the design and tested the operating effectiveness of certain internal controls related to the Company's goodwill impairment process, including certain controls related to management's determination of the above assumptions. We evaluated the Company's ability to forecast cash flows by comparing historical forecasts to actual results. We also assessed the current industry, macroeconomic and market conditions and trends, and the Company's historical results in evaluating the assumptions described above. We involved valuation professionals with specialized skills and knowledge, who assisted in:

- evaluating the terminal growth rate by comparing to publicly available market data
- evaluating the discount rate used by the Company by comparing the Company's inputs to the discount rate to publicly
  available data for comparable entities and assessing the resulting discount rate

### /s/ KPMG LLP

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in thousands, except per share data)

### A. Description of Business

Mercury Systems, Inc. (the Company) is a technology company that delivers mission-critical processing power to the edge - where signals and data are collected - to solve the most pressing aerospace and defense challenges. Mercury's products and solutions are deployed in more than 300 programs and across 35 countries. The Company is headquartered in Andover, Massachusetts, and has over 20 locations worldwide.

The Mercury Processing Platform is the unique advantage the Company provides to its customers. It comprises the innovative technologies the Company has developed and acquired for more than 40 years that brings integrated, mission-critical processing capabilities to the edge. The Company's processing platform spans the full breadth of signal processing—from RF front end to the human-machine interface—to rapidly convert meaningful data, gathered in the most remote and hostile environments, into critical decisions. It allows the Company to offer standard products and custom solutions from silicon to system scale, including components, modules, subsystems, and systems, and it embodies the customer-centric approach the Company takes to delivering capabilities that are mission-ready, trusted and secure, software-defined, and open and modular.

### B. Summary of Significant Accounting Policies

### PRINCIPLES OF CONSOLIDATION

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All intercompany transactions and balances have been eliminated in consolidation.

### **BASIS OF PRESENTATION**

All references to fiscal 2024 are to the 52-week period from July 1, 2023 to June 28, 2024. All references to fiscal 2023 are to the 52-week period from July 2, 2022 to June 30, 2023. All references to fiscal 2022 are to the 52-week period from July 3, 2021 to July 1, 2022.

### **USE OF ESTIMATES**

The preparation of financial statements in conformity with Generally Accepted Accounting Principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

### **BUSINESS COMBINATIONS**

The Company utilizes the acquisition method of accounting under ASC 805, *Business Combinations*, ("ASC 805"), for all transactions and events in which it obtains control over one or more other businesses, to recognize the fair value of all assets and liabilities acquired, even if less than one hundred percent ownership is acquired, and in establishing the acquisition date fair value as of the measurement date for all assets and liabilities assumed. The Company also utilizes ASC 805 for the initial recognition and measurement, subsequent measurement and accounting, and disclosure of assets and liabilities arising from contingencies in business combinations. Other estimates include:

- estimated step-ups for fixed assets and inventory;
- estimated fair values of intangible assets; and
- estimated income tax assets and liabilities assumed from the acquiree.

While the Company uses its best estimates and assumptions as part of the purchase price allocation process to accurately value assets acquired and liabilities assumed at the business acquisition date, the estimates and assumptions are inherently uncertain and subject to refinement. As a result, during the purchase price allocation period, which is generally one year from the business acquisition date, the Company records adjustments to the assets acquired and liabilities assumed, with the corresponding offset to goodwill. For changes in the valuation of intangible assets between the preliminary and final purchase price allocation, the related amortization is adjusted in the period it occurs. Subsequent to the purchase price allocation period, any adjustment to assets acquired or liabilities assumed is included in operating results in the period in which the adjustment is determined.

#### LEASES

The Company measures its lease obligations in accordance with ASC 842, *Leases*, ("ASC 842"), which requires lessees to recognize a right-of-use ("ROU") asset and lease liability for most lease arrangements.

The Company has arrangements involving the lease of facilities, machinery and equipment. Under ASC 842, at inception of the arrangement, the Company determines whether the contract is or contains a lease and whether the lease should be classified as an operating or a financing lease. This determination, among other considerations, involves an assessment of whether the Company can control the underlying asset and have the right to obtain substantially all of the economic benefits or outputs from the asset.

The Company recognizes ROU assets and lease liabilities as of the lease commencement date based on the net present value of the future minimum lease payments over the lease term. ASC 842 requires lessees to use the rate implicit in the lease unless it is not readily determinable and then it may use its incremental borrowing rate ("IBR") to discount the future minimum lease payments. Most of the Company's lease arrangements do not provide an implicit rate; therefore, the Company uses its IBR to discount the future minimum lease payments. The Company determines its IBR with its credit rating and current economic information available as of the commencement date, as well as the identified lease term. During the assessment of the lease term, the Company considers its renewal options and extensions within the arrangements and the Company includes these options when it is reasonably certain to extend the term of the lease.

The Company has lease arrangements with both lease and non-lease components. Consideration is allocated to lease and non-lease components based on estimated standalone prices. The Company has elected to exclude non-lease components from the calculation of its ROU assets and lease liabilities. In the Company's adoption of ASC 842, leases with an initial term of 12 months or less will not result in recognition of a ROU asset and a lease liability and will be expensed as incurred over the lease term. Leases of this nature were immaterial to the Company's consolidated financial statements.

The Company has lease arrangements that contain incentives for tenant improvements as well as fixed rent escalation clauses. For contracts with tenant improvement incentives that are determined to be a leasehold improvement that will be owned by the lessee and the Company is reasonably certain to exercise, it records a reduction to the lease liability and amortizes the incentive over the identified term of the lease as a reduction to rent expense. The Company records rental expense on a straight-line basis over the identified lease term on contracts with rent escalation clauses.

Finance leases are not material to the Company's consolidated financial statements and the Company is not a lessor in any material lease arrangements. There are no material restrictions, covenants, sale and leaseback transactions, variable lease payments or residual value guarantees in the Company's lease arrangements. Operating leases are included in Operating lease right-of-use assets, net, Accrued expenses, and Operating lease liabilities in the Company's Consolidated Balance Sheets. The standard had no impact on the Company's Consolidated Statements of Operations and Comprehensive (Loss) Income or Consolidated Statements of Cash Flows. See Note I to the consolidated financial statements for more information regarding our obligations under leases.

### REVENUE RECOGNITION

The Company recognizes revenue in accordance with the five step model set forth by ASC 606, *Revenue from Contracts with Customers*, ("ASC 606"), which involves identification of the contract(s), identification of performance obligations in the contract, determination of the transaction price, allocation of the transaction price to the previously identified performance obligations, and revenue recognition as the performance obligations are satisfied.

During step one of the five step model, the Company considers whether contracts should be combined or segmented, and based on this assessment, the Company combines closely related contracts when all the applicable criteria are met. The combination of two or more contracts requires judgment in determining whether the intent of entering into the contracts was effectively to enter into a single contract, which should be combined to reflect an overall profit rate. Similarly, the Company may separate an arrangement, which may consist of a single contract or group of contracts, with varying rates of profitability, only if the applicable criteria are met. Judgment also is involved in determining whether a single contract or group of contracts may be segmented based on how the arrangement and the related performance criteria were negotiated. The conclusion to combine a group of contracts or segment a contract could change the amount of revenue and gross profit recorded in a given period.

A performance obligation is a promise in a contract to transfer a distinct good or service to the customer. A contract's transaction price is allocated to each distinct performance obligation and recognized as revenue when the performance obligation is satisfied. Certain contracts with customers require the Company to perform tests of its products prior to shipment to ensure their performance complies with the Company's published product specifications and, on occasion, with additional customer-requested specifications. In these cases, the Company conducts such tests and, if they are completed successfully, includes a written confirmation with each order shipped. As a result, at the time of each product shipment, the Company

believes that no further customer testing requirements exist and that there is no uncertainty of acceptance by its customer. The Company's contracts with customers generally do not include a right of return relative to delivered products. In certain cases, contracts are modified to account for changes in the contract specifications or requirements. In most instances, contract modifications are accounted for as part of the existing contract. Certain contracts with customers have options for the customer to acquire additional goods or services. In most cases the pricing of these options are reflective of the standalone selling price of the good or service. These options do not provide the customer with a material right and are accounted for only when the customer exercises the option to purchase the additional goods or services. If the option on the customer contract was not indicative of the standalone selling price of the good or service, the material right would be accounted for as a separate performance obligation.

The Company is a leading technology company serving the aerospace and defense industry, positioned at the intersection of high-tech and defense. Revenues are derived from the sales of products that are grouped into one of the following three categories: (i) components; (ii) modules and sub-assemblies; and (iii) integrated solutions. The Company also generates revenues from the performance of services, including systems engineering support, consulting, maintenance and other support, testing and installation. Each promised good or service within a contract is accounted for separately under the guidance of ASC 606 if they are distinct. Promised goods or services not meeting the criteria for being a distinct performance obligation are bundled into a single performance obligation with other goods or services that together meet the criteria for being distinct. The appropriate allocation of the transaction price and recognition of revenue is then determined for the bundled performance obligation.

Once the Company identifies the performance obligations, the Company then determines the transaction price, which includes estimating the amount of variable consideration to be included in the transaction price, if any. Variable consideration typically arises due to volume discounts, or other provisions that can either decrease or increase the transaction price. To the extent the transaction price includes variable consideration, the Company estimates the amount of variable consideration that should be included in the transaction price utilizing either the expected value method or the most likely amount method depending on the method the Company expects to better predict the amount of consideration to which it will be entitled. The determination of the estimates for variable consideration require judgment, and are based on past history with similar contracts and anticipated performance. Further, variable consideration is only included in the determination of the transaction price if it is probable that a significant reversal in the amount of revenue recognized will not occur. There are no constraints on the variable consideration recorded.

For contracts with multiple performance obligations, the transaction price is allocated to each performance obligation using the standalone selling price of each distinct good or service in the contract. Standalone selling prices of the Company's goods and services are generally not directly observable. Accordingly, the primary method used to estimate standalone selling price is the expected cost plus a margin approach, under which the Company estimates the expected costs of satisfying a performance obligation and then adds an appropriate margin for that distinct good or service. The objective of the expected cost plus a margin approach is to determine the price at which the Company would transact if the product or service were sold by the Company on a standalone basis. The Company's determination of the expected cost plus a margin approach involves the consideration of several factors based on the specific facts and circumstances of each contract. Specifically, the Company considers the cost to produce the deliverable, the anticipated margin on that deliverable, the selling price and profit margin for similar parts, the Company's ongoing pricing strategy and policies, often based on the price list established and updated by management on a regular basis, the value of any enhancements that have been built into the deliverable and the characteristics of the varying markets in which the deliverable is sold.

The Company analyzes the standalone selling prices used in its allocation of transaction price on contracts at least annually. Standalone selling prices will be analyzed on a more frequent basis if a significant change in the Company's business necessitates a more frequent analysis or if the Company experiences significant variances in its selling prices.

Revenue recognized at a point in time generally relates to contracts that include a combination of components, modules and sub-assemblies, integrated subsystems and related system integration or other services. Contracts with distinct performance obligations recognized at a point in time, with or without an allocation of the transaction price, totaled 45%, 44% and 45% of revenues in the fiscal years ended June 28, 2024, June 30, 2023 and July 1, 2022, respectively. Revenue is recognized at a point in time for these products and services (versus over time recognition) due to the following: (i) customers are only able to consume the benefits provided by the Company upon completion of the product or service; (ii) customers do not control the product or service prior to completion; and (iii) the Company does not have an enforceable right to payment at all times for performance completed to date. Accordingly, there is little judgment in determining when control of the good or service transfers to the customer, and revenue is generally recognized upon transfer of control (for goods) or completion (for services).

The Company engages in contracts for development, production and service activities and recognizes revenue for performance obligations over time. These over time contracts involve the design, development, manufacture, or modification of complex modules and sub-assemblies or integrated subsystems and related services. Revenue is recognized over time, due to the fact that: (i) the Company's performance creates or enhances an asset that the customer controls as the asset is created or

enhanced; and (ii) the Company's performance creates an asset with no alternative use to the Company and the Company has an enforceable right to payment for performance completed to date. The Company considers the nature of these contracts and the types of products and services provided when determining the proper accounting for a particular contract. These contracts include both fixed-price and cost reimbursable contracts. The Company's cost reimbursable contracts typically include cost-plus fixed fee and time and material ("T&M") contracts.

For over time contracts, the Company typically leverages the input method, using a cost-to-cost measure of progress. The Company believes that this method represents the most faithful depiction of the Company's performance because it directly measures value transferred to the customer. Contract estimates and estimates of any variable consideration are based on various assumptions to project the outcome of future events that may span several years. These assumptions include: the amount of time to complete the contract, including the assessment of the nature and complexity of the work to be performed; the cost and availability of materials; the availability of subcontractor services and materials; and the availability and timing of funding from the customer. The Company bears the risk of changes in estimates to complete on a fixed-price contract which may cause profit levels to vary from period to period. For cost reimbursable contracts, the Company is reimbursed periodically for allowable costs and is paid a portion of the fee based on contract progress. In the limited instances where the Company enters into T&M contracts, revenue recognized reflects the number of direct labor hours expended in the performance of a contract multiplied by the contract billing rate, as well as reimbursement of other direct billable costs. For T&M contracts, the Company recognizes revenue in the amount for which the Company has a right to invoice the customer based on the control transferred to the customer. For over time contracts, the Company recognizes anticipated contract losses as soon as they become known and estimable.

Accounting for contracts recognized over time requires significant judgment relative to estimating total contract revenues and costs, in particular, assumptions relative to the amount of time to complete the contract, including the assessment of the nature and complexity of the work to be performed and the impact of contract amendments which may result in cumulative adjustments. The Company's estimates are based upon the professional knowledge and experience of its engineers, program managers and other personnel, who review each over time contract monthly to assess the contract's schedule, performance, technical matters and estimated cost at completion. Changes in estimates are applied retrospectively and when adjustments in estimated contract costs are identified, such revisions may result in current period adjustments to earnings applicable to performance in prior periods. The aggregate effects of these favorable and unfavorable changes across the Company's portfolio of programs can have a significant effect upon its reported Loss from operations, Net loss and Diluted net loss per share in each of the reporting periods. The net impact of changes in estimates had the following impact on the Company's operating results:

		r the Fiscal Years End	ded			
(In thousands, except per share data)		June 28, 2024 June 30, 2023				
Loss from operations	\$	(73,245)	\$ (56,266)	\$	(14,069)	
Net loss (1)	\$	(53,469)	\$ (41,074)	\$	(10,270)	
Diluted net loss per share	\$	(0.93)	\$ (0.73)	\$	(0.18)	
Diluted Shares		57,738	56,554		55,901	
(1) Federal and state statutory rate of 27%						

Total revenue recognized under over time contracts over time was 55%, 56% and 55% of revenues in the fiscal years ended June 28, 2024, June 30, 2023 and July 1, 2022, respectively.

The Company generally does not provide its customers with rights of product return other than those related to assurance warranty provisions that permit repair or replacement of defective goods over a period of 12 to 36 months. The Company accrues for anticipated warranty costs upon product shipment. The Company does not consider activities related to such assurance warranties, if any, to be a separate performance obligation. The Company does offer separately priced extended warranties which generally range from 12 to 36 months that are treated as separate performance obligations. The transaction price allocated to extended warranties is recognized over time in proportion to the costs expected to be incurred in satisfying the obligations under the contract.

On over time contracts, the portion of the payments retained by the customer is not considered a significant financing component because most contracts have a duration of less than one year and payment is received as progress is made. Many of the Company's over time contracts have milestone payments, which align the payment schedule with the progress towards completion on the performance obligation. On some contracts, the Company may be entitled to receive an advance payment, which is not considered a significant financing component because it is used to facilitate inventory demands at the onset of a contract and to safeguard the Company from the failure of the other party to abide by some or all of their obligations under the contract.

All revenues are reported net of government assessed taxes (e.g., sales taxes or value-added taxes).

### COSTS TO OBTAIN AND FULFILL A CONTRACT

The Company expenses sales commissions as incurred for contracts where the amortization period would have been one year or less. The Company had \$837 and \$1,328 of deferred sales commissions for contracts where the amortization period is greater than one year as of June 28, 2024 and June 30, 2023, respectively.

The Company has elected to treat shipping and handling activities performed after the customer has obtained control of the related goods as a fulfillment cost. Such costs are accrued for in conjunction with the recording of revenue for the goods and are classified as cost of revenues.

#### CONTRACT BALANCES

Contract balances result from the timing of revenue recognized, billings and cash collections, and the generation of contract assets and liabilities. Contract assets represent revenue recognized in excess of amounts invoiced to the customer and the right to payment is not subject to the passage of time. Contract assets are presented as unbilled receivables and costs in excess of billings, net of allowance for credit losses on the Company's Consolidated Balance Sheets. Contract liabilities consist of deferred product revenue, billings in excess of revenues, deferred service revenue, and customer advances. Deferred product revenue represents amounts that have been invoiced to customers, but are not yet recognizable as revenue because the Company has not satisfied its performance obligations under the contract. Billings in excess of revenues represents milestone billing contracts where the billings of the contract exceed recognized revenues. Deferred service revenue primarily represents amounts invoiced to customers for annual maintenance contracts or extended warranty contracts, which are recognized over time in proportion to the costs expected to be incurred in satisfying the obligations under the contract. Customer advances represent deposits received from customers on an order. Contract liabilities are included in deferred revenue and the long-term portion of deferred revenue is included within other non-current liabilities on the Company's Consolidated Balance Sheets. Contract balances are reported in a net position on a contract-by-contract basis.

The contract asset balances were \$304,029 and \$382,558 as of June 28, 2024 and June 30, 2023, respectively. The contract asset balance decreased due to \$524,655 of billings, offset by revenue recognized under over time contracts of \$462,143 during the fiscal year ended June 28, 2024. During the fiscal year ended June 28, 2024, the Company's contract assets were impacted by changes in estimates for contracts recognized over time and \$16,017 write-offs and reserves as a result of ongoing negotiations of settlement terms with its customers. The contract liability balances were \$74,367 and \$57,142 as of June 28, 2024 and June 30, 2023, respectively. The contract liability increased due to a higher volume of advanced milestone billing events as well as timing of revenue recognized across multiple programs.

Revenue recognized during fiscal 2024 that was included in the contract liability balance at June 30, 2023 was \$43,790.

### REMAINING PERFORMANCE OBLIGATIONS

The Company includes in its computation of remaining performance obligations customer orders for which it has accepted executed sales orders. The definition of remaining performance obligations excludes those contracts that provide the customer with the right to cancel or terminate the order with no substantial penalty, even if the Company's historical experience indicates the likelihood of cancellation or termination is remote. As of June 28, 2024, the aggregate amount of the transaction price allocated to remaining performance obligations was \$768,442. The Company expects to recognize approximately 55% of its remaining performance obligations as revenue in the next 12 months and the balance thereafter.

### CASH AND CASH EQUIVALENTS

Cash equivalents, consisting of highly liquid money market funds and U.S. government and U.S. government agency issues with original maturities of 90 days or less at the date of purchase, are carried at fair market value which approximates cost

### ACCOUNTS RECEIVABLE

Accounts receivable, net, represents amounts that have been billed and are currently due from customers. The Company maintains an allowance for credit losses to provide for the estimated amount of receivables that will not be collected. The Company provides credit to customers in the normal course of business. The Company performs ongoing credit evaluations of its customers' financial condition and limits the amount of credit extended as necessary. The allowance is based upon an assessment of the customer's credit worthiness, reasonable forecasts about the future, history with the customer, recovery of balances from contract settlements, and the age of the receivable balance. The Company typically invoices a customer upon shipment of the product (or completion of a service) for contracts where revenue is recognized at a point in time. For contracts where revenue is recognized over time, the invoicing events are typically based on specified performance obligation deliverables or milestone events, or quantifiable measures of performance.

#### ACCOUNTS RECEIVABLES FACTORING

On September 27, 2022, the Company executed an uncommitted receivables purchase agreement ("RPA"), pursuant to which the Company may offer to sell certain customer receivables, subject to the terms and conditions of the RPA. The RPA is an uncommitted arrangement such that the Company is not obligated to sell any receivables and the party has no obligation to purchase any receivables from the Company. Pursuant to the RPA, the party may purchase certain of the Company's customer receivables at a discounted rate, subject to a limit that as of any date, the total amount of purchased receivables held by the party, less the amount of all collections received on such receivables, may not exceed \$20,000. The RPA has an indefinite term and the agreement remains in effect until it is terminated by either party. Factoring under the RPA Agreement is treated as a true sale of accounts receivable by the Company. The Company has continued involvement in servicing accounts receivable under the RPA, but no retained interests related to the factored accounts receivable. On March 14, 2023, the Company amended the RPA to increase the capacity from \$20,000 to \$30,600. On June 21, 2023, the Company further amended the RPA to increase the capacity from \$30,600 to \$60,000.

Proceeds for amounts factored by the Company are recorded as an increase to cash and a reduction to accounts receivable outstanding in the Consolidated Balance Sheets. Cash Flows attributable to factoring are reflected as cash flows from operating activities in the Company's Consolidated Statements of Cash Flows. Factoring fees are included as selling, general and administrative expenses in the Company's Consolidated Statements of Operations and Comprehensive (Loss) Income.

The Company had \$33,777 and \$30,488 factored accounts receivables as of June 28, 2024 and June 30, 2023, respectively. The Company incurred factoring fees of approximately \$1,947 and \$562 for fiscal years 2024 and 2023, respectively.

See Note R "Subsequent Events" to the consolidated financial statements for discussion of the Company's termination of its uncommitted RPA and entrance into a committed receivables purchase and service agreement ("RPSA") a new party.

### FAIR VALUE OF FINANCIAL INSTRUMENTS

The Company measures at fair value certain financial assets and liabilities, including cash equivalents, restricted cash, interest rate derivatives, and contingent consideration. ASC 820, *Fair Value Measurement and Disclosures*, specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's market assumptions. These two types of inputs have created the following fair-value hierarchy:

Level 1—Quoted prices for identical instruments in active markets;

Level 2—Quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets; and

Level 3—Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

### CONCENTRATION OF CREDIT RISK

Financial instruments that potentially expose the Company to concentrations of credit risk consist principally of cash, cash equivalents, accounts receivable, unbilled receivables and costs in excess of billings. The Company places its cash and cash equivalents with financial institutions of high credit quality. As of June 28, 2024 and June 30, 2023, the Company had \$180,521 and \$71,563, respectively, of cash and cash equivalents on deposit or invested with its financial and lending institutions.

The Company provides credit to customers in the normal course of business. The Company performs ongoing credit evaluations of its customers' financial condition and limits the amount of credit extended when deemed necessary. As of June 28, 2024, five customers accounted for 51% of the Company's accounts receivable, unbilled receivables and costs in excess of billings. As of June 30, 2023, five customers accounted for 48% of the Company's accounts receivable, unbilled receivables and costs in excess of billings.

The Company maintains an allowance for credit losses to provide for the estimated amount of receivables that will not be fully collected. The allowance is based on the assessment of the following factors: customer creditworthiness; historical payment experience; age of outstanding receivables; and any applicable collateral.

#### INVENTORY

Inventory is stated at the lower of cost (first-in, first-out) or net realizable value, and consists of materials, labor and overhead. On a quarterly basis, the Company evaluates inventory for net realizable value. Once an item is written down, the value becomes the new inventory cost basis. The Company reduces the value of inventory for excess and obsolete inventory, consisting of on-hand and non-cancelable on-order inventory in excess of estimated usage. The excess and obsolete inventory evaluation is based upon assumptions about future demand, product mix and possible alternative uses.

### **SEGMENT INFORMATION**

The Company uses the management approach for segment disclosure, which designates the internal organization that is used by management for making operating decisions and assessing performance as the source of its reportable segments. The Company manages its business on the basis of one reportable segment, as a leading technology company serving the aerospace and defense industry.

### GOODWILL AND INTANGIBLE ASSETS

Goodwill is the amount by which the purchase price of a business acquisition exceeded the fair values of the net identifiable assets on the date of purchase (see Note F). In accordance with the requirements of Intangibles-Goodwill and Other ("ASC 350") Goodwill is not amortized. Goodwill is assessed for impairment at least annually, on a reporting unit basis, or when events and circumstances ("triggering event") occur indicating that the recorded goodwill may be impaired. Potential triggering events include macroeconomic conditions, industry and market considerations, financial performance and expectations of projected financial performance and cash flows, and changes in the Company's stock price in relation to the carrying value of its reporting units, among other relevant factors. Adverse changes to these events and circumstances could require the Company to perform an interim impairment test.

Intangible assets result from the Company's various business acquisitions (see Note G) and certain licensed technologies, and consist of identifiable intangible assets, including completed technology, licensing agreements, patents, customer relationships, trademarks, backlog and non-compete agreements. Intangible assets are reported at cost, net of accumulated amortization and are either amortized on a straight-line basis over their estimated useful lives of up to 12.5 years or over the period the economic benefits of the intangible asset are consumed.

### LONG-LIVED ASSETS

Long-lived assets primarily include property and equipment, intangible assets and ROU assets. The Company regularly evaluates its long-lived assets for events and circumstances that indicate a potential impairment in accordance with ASC 360, *Property, Plant, and Equipment* ("ASC 360"). The Company reviews long-lived assets for impairment whenever events or changes in business circumstances indicate that the carrying amount of the assets may not be fully recoverable or that the useful lives of these assets are no longer appropriate. Each impairment test is based on a comparison of the estimated undiscounted cash flows of the asset as compared to the recorded value of the asset. If impairment is indicated, the asset is written down to its estimated fair value.

Property and equipment are the long-lived, physical assets of the Company acquired for use in the Company's normal business operations and are not intended for resale by the Company. These assets are recorded at cost. Renewals and betterments that increase the useful lives of the assets are capitalized. Repair and maintenance expenditures that increase the efficiency of the assets are expensed as incurred. Equipment under capital lease is recorded at the present value of the minimum lease payments required during the lease period. Depreciation is based on the estimated useful lives of the assets using the straight-line method (see Note E).

As assets are retired or sold, the related cost and accumulated depreciation are removed from the accounts and any resulting gain or loss is included in the results of operations.

Expenditures for major software purchases and software developed for internal use are capitalized and depreciated using the straight-line method over the estimated useful lives of the related assets, which are generally three years. For software developed for internal use, all external direct costs for material and services and certain payroll and related fringe benefit costs are capitalized in accordance with ASC 350. During fiscal 2024, 2023 and 2022, the Company capitalized \$2,086, \$3,931 and \$3,000 of software development costs, respectively.

### INCOME TAXES

The Company accounts for income taxes under ASC 740, *Income Taxes* ("ASC 740"). The Company recognizes deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the Company's consolidated financial statements. Under this method, deferred tax assets and liabilities are determined based on the difference between the financial statement and tax basis of assets and liabilities using enacted tax rates for the year in which the differences are expected to reverse. The Company records a valuation allowance against net deferred tax assets if, based upon the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized.

ASC 740 requires a two-step approach to recognizing and measuring uncertain tax positions. First, the tax position must be evaluated to determine the likelihood that it will be sustained upon external examination. If the tax position is deemed more-likely-than-not to be sustained, the tax position is then assessed to determine the amount of benefit to recognize in the financial statements. The amount of the benefit that may be recognized is the largest amount that has a greater than 50% likelihood of being realized upon ultimate settlement. The Company recognizes interest and penalties accrued on any unrecognized tax benefits as a component of income tax expense.

### PRODUCT WARRANTY ACCRUAL

The Company's product sales generally include a 12 to 36 month standard hardware warranty. At time of product shipment, the Company accrues for the estimated cost to repair or replace potentially defective products. Estimated warranty costs are based upon prior actual warranty costs for substantially similar transactions and any specifically identified warranty requirements. Product warranty accrual is included as part of accrued expenses in the accompanying Consolidated Balance Sheets. The following table presents the changes in the Company's product warranty accrual.

	Fis	scal 2024	I	Fiscal 2023	I	Fiscal 2022
Beginning balance	\$	1,282	\$	1,857	\$	3,283
Accruals for warranties issued during the period		6,270		1,146		359
Settlements made during the period		(1,831)		(1,721)		(1,785)
Ending balance	\$	5,721	\$	1,282	\$	1,857

### RESEARCH AND DEVELOPMENT COSTS

Research and development costs are expensed as incurred. Research and development costs are primarily made up of labor charges and prototype material and development expenses.

### STOCK-BASED COMPENSATION

Stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense over the requisite service period, which generally represents the vesting period, and includes an estimate of the awards that will be forfeited. Stock-based compensation expense for the Company's performance-based restricted stock awards is amortized over the requisite service period using graded vesting. The Company's other restricted stock awards recognize expense over the requisite service period on a straight-line basis.

### RETIREMENT OF COMMON STOCK

Stock that is repurchased or received in connection with the vesting of restricted stock is retired immediately upon the Company's repurchase. The Company accounts for this under the cost method and upon retirement the excess amount over par value is charged against additional paid-in capital.

### **NET (LOSS) EARNINGS PER SHARE**

Basic net (loss) earnings per share is calculated by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted net earnings per share computation includes the effect of shares which would be issuable upon the exercise of outstanding stock options and the vesting of restricted stock, reduced by the number of shares which are assumed to be purchased by the Company under the treasury stock method. For all periods presented, net (loss) income is the control number for determining whether securities are dilutive or not.

Basic and diluted weighted average shares outstanding were as follows:

	Fiscal 2024	Fiscal 2023	Fiscal 2022
Basic weighted-average shares outstanding	57,738	56,554	55,527
Effect of dilutive equity instruments			374
Diluted weighted-average shares outstanding	57,738	56,554	55,901

Equity instruments to purchase 2,501, 1,852 and 39 shares of common stock were not included in the calculation of diluted net earnings per share for the fiscal years ended June 28, 2024, June 30, 2023 and July 1, 2022, respectively, because the equity instruments were anti-dilutive.

### ACCUMULATED OTHER COMPREHENSIVE (LOSS) INCOME

Accumulated other comprehensive (loss) income ("AOCI") includes changes in fair value of derivative instruments, foreign currency translation adjustments and pension benefit plan adjustments. The components of AOCI included the change in fair value of derivative instruments, net of tax adjustments and totaled \$(833) and \$5,856 for the fiscal years ended June 28, 2024 and June 30, 2023, respectively. There was no change in fair value of derivative instruments, net of tax adjustments for the fiscal year ended July 1, 2022. Also included are \$380, \$300 and \$1,131 of foreign currency translation adjustments for the fiscal years ended June 28, 2024, June 30, 2023 and July 1, 2022, respectively, and pension benefit plan adjustments totaled \$(1,383), \$142 and \$4,739 for the fiscal years ended June 28, 2024, June 30, 2023 and July 1, 2022, respectively.

A summary of the change in component of Accumulated other comprehensive (loss) income, net of tax is provided below:

	Foreig currend translati adjustme net of ta	ey ion nts,	Pension benefi plan, net of tax	t i	Change in fair of derivative instruments, net of tax	Accumulated Other Comprehensive (Loss) Income
Balance at July 2, 2021	\$	(80)	\$ (259	) \$	_	\$ (339)
Other comprehensive income, net of tax	1	,131	4,739		<u> </u>	5,870
Balance at July 1, 2022	1	,051	4,480	)	_	5,531
Other comprehensive income, net of tax		300	142	<u> </u>	5,856	6,298
Balance at June 30, 2023	1	,351	4,622		5,856	11,829
Other comprehensive (loss) income, net of tax		380	(1,383	<u> </u>	(833)	(1,836)
Balance at June 28, 2024	\$ 1	,731	\$ 3,239	\$	5,023	\$ 9,993

### FOREIGN CURRENCY

Local currencies are the functional currency for the Company's subsidiaries in Switzerland, the United Kingdom, France, Spain and Canada. The accounts of foreign subsidiaries are translated using exchange rates in effect at period-end for assets and liabilities and at average exchange rates during the period for results of operations. The related translation adjustments are reported in accumulated other comprehensive income in shareholders' equity. Gains (losses) resulting from non-U.S. currency transactions are included in Other income (expense), net in the Consolidated Statements of Operations and Comprehensive (Loss) Income and were immaterial for all periods presented.

#### RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In November 2023, the FASB issued ASU No. 2023-07, Segment Reporting (ASC 280): Improvements to Reportable Segment Disclosures, an amendment of the FASB Accounting Standards Codification. The amendments in this ASU address improvements to reportable segment disclosure requirements, specifically requiring disclosure of significant segment expenses. The amendment also extends certain annual disclosures to interim periods, and clarifies that single reportable segment entities must apply ASC 280 in its entirety, inclusive of this update. This ASU is effective for fiscal years beginning after December 15, 2023, as well as all interim periods within fiscal years beginning after December 15, 2024, with early adoption permitted, including adoption in an interim period. The Company is currently evaluating the effect that this standard will have on its consolidated financial statements and related disclosures.

In December 2023, the FASB issued ASU No. 2023-09, *Improvement to Income Tax Disclosures*, an amendment of the FASB Accounting Standards Codification. The amendments in this ASU enact new income tax disclosure requirements in addition to modifying existing requirements. The amendment requires entities to categorize and provide greater disaggregation of information in the rate reconciliation and income taxes paid disclosures. This ASU is effective for fiscal years beginning after December 15, 2024, with early adoption permitted. The Company is currently evaluating the effect that this standard will have on its consolidated financial statements and related disclosures.

In March 2024, the FASB issued ASU No. 2024-01, Compensation - Stock Compensation (Topic 718), an amendment of the FASB Accounting Standards Codification. The amendments in this ASU address improvements to clarify the accounting treatment of profits interest awards. The amendments provide illustrative examples for entities to evaluate whether profits interest awards should be accounted for are share based compensation (Topic 718) or as cash bonus or profit-sharing arrangement (Topic 710). This ASU is effective for fiscal years beginning after December 15, 2023, as well as all interim periods within fiscal years beginning after December 15, 2024, with early adoption permitted, including adoption in an interim period. The Company does not believe this standard will have an impact on its consolidated financial statements and related disclosures.

In March 2024, the FASB issued ASU No. 2024-02, *Codification Improvements - Amendments to Remove References to the Concepts Statements*, an amendment of the FASB Accounting Standards Codification. The amendments in this ASU are related to the removal of various references to FASB Concept Statements from the codification to make clear distinctions between authoritative and non-authoritative literature in the codification. This ASU is effective for fiscal years beginning after December 15, 2024, with early adoption permitted. The Company does not believe this standard will have an impact on its consolidated financial statements and related disclosures.

### RECENTLY ADOPTED ACCOUNTING PRONOUNCEMENTS

Effective July 1, 2023, the company adopted ASU No. 2021-08, *Business Combinations (ASC 805): Accounting for Contract Assets and Contract Liabilities from Contracts with Customers*, an amendment of the FASB Accounting Standards Codification. The amendments in this ASU address diversity and inconsistency related to the recognition and measurement of contract assets and contract liabilities acquired in a business combination and require that an acquirer recognize and measure contract assets and contract liabilities acquired in a business combination in accordance with ASC 606, *Revenue from Contracts with Customers*. This adoption did not have an impact to the Company's consolidated financial statements or related disclosures.

### C. Fair Value of Financial Instruments

The following table summarizes the Companies' financial instruments measured at fair value on a recurring basis as of June 28, 2024:

	 Fair Value Measurements							
	June 28, 2024		Level 1		Level 2		Level 3	
Liabilities:								
Interest rate swap	\$ 2,436	\$	_	\$	2,436	\$	_	
Total	\$ 2,436	\$		\$	2,436	\$		

The carrying values of cash and cash equivalents, including money market funds, restricted cash, accounts receivable and payable, contract assets and liabilities and accrued liabilities approximate fair value due to the short-term maturities of these assets and liabilities. The Company determined the carrying value of long-term debt approximated fair value due to variable interest rates charged on the borrowings, which reprice frequently. During the first quarter ended September 29, 2023, the Company entered into an interest rate hedging agreement (the "September 2023 Swap").

The fair value of the September 2023 Swap is estimated using a discounted cash flow analysis based on the contractual terms of the derivative, leveraging observable inputs other than quoted prices, such as interest rates. As of June 28, 2024, the fair value of the September 2023 Swap was a liability of \$2,436 and is included within Other non-current liabilities in the Company's Consolidated Balance Sheets.

The following table summarizes the Company's' financial instruments measured at fair value on a recurring basis as of June 30, 2023

		Fair Value Measurements								
	Jur	ne 30, 2023		Level 1		Level 2		Level 3		
Assets:										
Interest rate swap	\$	3,523	\$	_	\$	3,523	\$	_		
Total assets measured at fair value	\$	3,523	\$		\$	3,523	\$	_		

The fair value of interest rate hedging agreement entered on September 29, 2022 ("the Swap") is estimated using a discounted cash flow analysis based on the contractual terms of the derivative, leveraging observable inputs other than quoted prices, such as interest rates. As of June 30, 2023, the fair value of the Swap was an asset of \$3,523 and was included within Other non-current assets in the Company's Consolidated Balance Sheets. The Company terminated the Swap during the first quarter ended September 29, 2023.

Refer to Note Q for further information regarding the September 2023 Swap and the termination of the Swap.

### D. Inventory

Inventory was comprised of the following:

		As of				
	June 28, 202	4 Ju	June 30, 2023			
Raw materials	\$ 200,5	01 \$	229,984			
Work in process	118,0	60	81,930			
Finished goods	16,7	39	25,302			
Total	\$ 335,3	00 \$	337,216			

### E. Property and Equipment

Property and equipment consisted of the following:

	Estimated Useful Lives (Years)		As	of		
			June 28, 2024		June 30, 2023	
Computer equipment and software	3-4	\$	138,366	\$	125,297	
Furniture and fixtures	5		21,694		20,729	
Leasehold improvements	lesser of estimated useful life or lease term		72,420		70,305	
Machinery and equipment	5-10		150,991		136,504	
			383,471		352,835	
Less: accumulated depreciation			(273,118)		(233,281)	
Property and equipment, net		\$	110,353	\$	119,554	

The \$9,201 decrease in Property and equipment, net was primarily due to depreciation expense and was partially offset by current year additions. During fiscal 2024 and 2023, the Company retired \$1,308 and \$1,056, respectively, of computer equipment and software, furniture and fixtures, leasehold improvements, and machinery and equipment that were no longer in use by the Company.

Depreciation expense related to property and equipment for the fiscal years ended June 28, 2024, June 30, 2023 and July 1, 2022 was \$40,369, \$43,777 and \$33,150, respectively.

### F. Goodwill

In accordance with FASB ASC 350, *Intangibles-Goodwill and Other* ("ASC 350"), the Company determines its reporting units based upon whether discrete financial information is available, if management regularly reviews the operating results of the component, the nature of the products offered to customers and the market characteristics of each reporting unit. A reporting unit is considered to be an operating segment or one level below an operating segment also known as a component. Component level financial information is reviewed by management across two reporting units: Mission Systems and Microelectronics. Accordingly, these were determined to be the Company's reporting units which is consistent with the prior period. There were no adjustments to the carrying value of Goodwill during fiscal 2024.

The Company performed its annual goodwill impairment test in the fourth quarter of fiscal 2024. In making this assessment, management relies on a number of factors including expected future operating results, business plans, economic projections, anticipated future cash flows, business trends, and changes in the Company's market capitalization. The Company determined the fair values of the reporting units by using a discounted cash flow ("DCF") approach. Under the DCF approach, the Company estimated the future cash flows, as well as selected a risk-adjusted Weighted Average Cost of Capital ("WACC") of 9.0% and 8.5% for Microelectronics and Missions Systems, respectively, to measure the present value of the anticipated cash flows. When determining future cash flow estimates, the Company considered historical results adjusted to reflect current and anticipated future operating conditions. The Company estimated cash flows for the reporting units over a discrete period and a terminal period (considering expected long-term growth rates and trends). The Company then used the market approach to corroborate the results of the DCF approach. Under the market approach, the Company used revenue and earnings multiples based on comparable industry multiples to estimate the fair value of the reporting units. If the carrying amount of a reporting unit exceeds the reporting unit's fair value, the amount by which the carrying value exceeds the fair value is recognized as an impairment loss.

Based on the quantitative evaluation, the Company determined that the Mission Systems reporting unit had an estimated fair value in excess of their carrying value of 5.0% and the Microelectronics reporting unit had an estimated fair value that substantially exceeded its carrying value. The Company concluded that its goodwill was not impaired. In order to evaluate the sensitivity of the estimated fair value for Mission Systems, the Company assessed an increase of 1.0% in the WACC under the DCF approach would have a material impact to the Mission Systems reporting unit's fair value determination. If there are adverse trends in the Mission Systems reporting unit's expected future operating results, business plans, economic projections, anticipated future cash flows, business trends, and Company's market capitalization, then it could result in the carrying value of the Mission Systems reporting unit exceeding its estimated fair value and impairment charges.

The Company also assesses potential triggering events during interim reporting periods. During the third quarter ended March 29, 2024, the Company assessed events and circumstances to consider its reporting units for a potential triggering event, including: macroeconomic conditions, industry and market considerations, financial performance and expectations of projected financial performance and cash flows, changes in the Company's stock price in relation to the carrying value of its reporting units, among other relevant factors.

As a result of the sustained decline in the Company's stock and overall market capitalization during the third quarter ended March 29, 2024, along with other qualitative considerations the Company concluded that there was a triggering event for its Mission Systems reporting unit that would require an interim impairment test. As of March 29, 2024, the Company completed a quantitative goodwill impairment analysis related to its Mission Systems reporting unit by comparing the fair value of the reporting unit with its carrying amount. Under the DCF approach, the Company estimated the future cash flows, as well as selected a risk-adjusted WACC of 8.5% to measure the present value of the anticipated cash flows. The Company then used the market approach to corroborate the results of the DCF approach. Under the market approach, the Company used revenue and earnings multiples based on comparable industry multiples to estimate the fair value of the reporting unit.

Based on the interim quantitative evaluation, the Company determined that the Mission Systems reporting unit had an estimated fair value in excess of their carrying value of 2.5%. The Company concluded that the Mission Systems reporting unit's goodwill was not impaired. In order to evaluate the sensitivity of the estimated fair value for Mission Systems, the Company assessed an increase of 1.0% in the WACC under the DCF approach would have a material impact to the Mission Systems reporting unit's fair value determination. If there are adverse trends in the Mission Systems reporting unit's expected future operating results, business plans, economic projections, anticipated future cash flows, business trends, and Company's market capitalization, then it could result in the carrying value of the Mission Systems reporting unit exceeding its estimated fair value and impairment charges.

The Company is required to perform the next annual goodwill impairment analysis during the fourth quarter of fiscal year 2025. Adverse changes to the underlying information assumptions used in its assessment of potential triggering events could require the Company to perform an interim impairment test. If assumed revenue growth rate and cash flow projections are not achieved in future periods or the Company's common stock price significantly declines from current levels, among other factors, its Mission Systems and Microelectronics reporting units could be at risk of failing the quantitative assessment and goodwill assigned to the respective reporting units could be impaired. Any impairment charges that the Company may record in the future could be material to its results of operations and financial condition.

#### G. Intangible Assets

Intangible assets consisted of the following:

	Gross Carrying Amount		Accumulated Amortization				Net Carrying Amount	Weighted Average Useful Life
June 28, 2024								
Customer relationships	\$ 342,610	\$	(155,903)	\$	186,707	12.2 years		
Licensing agreements and patents	4,162		(2,254)		1,908	5.0 years		
Completed technologies	122,680		(62,975)		59,705	9.4 years		
Other	 3,238		(1,046)		2,192	5.0 years		
	\$ 472,690	\$	(222,178)	\$	250,512			
June 30, 2023								
Customer relationships	\$ 349,120	\$	(130,756)	\$	218,364	12.1 years		
Licensing agreements and patents	4,162		(1,423)		2,739	5.0 years		
Completed technologies	134,983		(60,680)		74,303	8.0 years		
Backlog	410		(325)		85	2.0 years		
Other	 3,236		(676)		2,560	5.0 years		
	\$ 491,911	\$	(193,860)	\$	298,051			

Estimated future amortization expense for intangible assets remaining at June 28, 2024 is as follows:

Fiscal Year	 Totals
2025	\$ 42,836
2026	38,199
2027	35,093
2028	31,169
2029	27,874
Thereafter	 73,949
Total future amortization expense	\$ 249,120
Estimated salvage value of identified intangible assets	 1,392
Net carrying amount	\$ 250,512

The Company reviews net intangible assets with finite lives for impairment when an event occurs indicating the potential for impairment. Based on the Company's last assessment, the Company believes that the carrying values of net intangible assets were recoverable as of June 28, 2024. However, if business conditions deteriorate, the Company may be required to record impairment losses, and or increase the amortization of intangibles in the future. Any impairment charges that the Company may record in the future could be material to the results of operations and financial condition.

#### H. Restructuring

During fiscal 2024, the Company initiated several immediate cost savings measures that simplify the Company's organizational structure, facilitate clearer accountability, and align to the Company's priorities, including: (i) embedding the 1MPACT value creation initiatives and execution into the Company's operations; (ii) streamlining organizational structure and removing areas of redundancy between corporate and divisional organizations; and (iii) reducing selling, general, and administrative headcount and rebalancing discretionary and third party spending to better align with the Company's priority areas. On July 20, 2023, the Company executed the plan to embed the 1MPACT value creation initiatives into operations. On August 9, 2023, the Company approved and initiated a workforce reduction that, together with the 1MPACT related action, eliminated approximately 150 positions resulting in \$9,548 of severance costs during fiscal 2024. On January 12, 2024, the Company approved and initiated workforce reductions that eliminated approximately 100 positions resulting in an additional \$9,841 of severance costs during fiscal 2024. On June 17, 2024, the Company approved and initiated workforce reductions that eliminated an additional 100 positions, resulting in an additional \$6,781 of severance costs in fiscal 2024. The workforce reductions that eliminated approximately 350 positions in fiscal 2024 were across manufacturing, SG&A and R&D based on ongoing talent and workforce optimization efforts.

The Company incurs restructuring and other charges in connection with management's decision to undertake certain actions to realign operating expenses through workforce reductions and the closure of certain Company facilities, businesses and product lines. The Company's adjustments reflected in restructuring and other charges are typically related to organizational redesign programs or discrete post-acquisition integration activities initiated as part of discrete post acquisition integration activities.

During fiscal 2023, the Company incurred \$6,981 of restructuring and other charges. Restructuring and other charges primarily related to \$3,415 of severance costs, 1MPACT related costs consisting of \$1,804 for facility optimization efforts, including \$1,339 related to lease asset impairment, and \$1,762 of third party consulting costs.

All of the restructuring and other charges are classified as Operating expenses in the Consolidated Statements of Operations and Comprehensive (Loss) Income and any remaining severance obligations are expected to be paid within the next twelve months. The remaining restructuring liability is classified as Accrued expenses in the Consolidated Balance Sheets.

The following table presents the detail of charges included in the Company's liability for restructuring and other charges:

Sevei	Severance & Related		Facilities & Other		Total
\$	4,722	\$	_	\$	4,722
	3,415		465		3,880
	(6,608)		(444)		(7,052)
			(21)		(21)
	1,529		_		1,529
	26,170		_		26,170
	(18,941)				(18,941)
\$	8,758	\$		\$	8,758
	•	\$ 4,722 3,415 (6,608) 1,529 26,170 (18,941)	\$ 4,722 \$ 3,415 (6,608)  1,529 26,170	\$ 4,722 \$ —  3,415 465 (6,608) (444)  (21)  1,529 —  26,170 — (18,941) —	\$ 4,722 \$ — \$  3,415

#### I. Leases

The Company enters into lease arrangements to facilitate its operations, including manufacturing, storage, as well as engineering, sales, marketing and administration resources. The Company measures its lease obligations in accordance with ASC 842, which requires lessees to record a ROU asset and lease liability for most lease arrangements. Finance leases are not material to the Company's consolidated financial statements and therefore are excluded from the following disclosures.

SUPPLEMENTAL BALANCE SHEET INFORMATION

Supplemental operating lease balance sheet information is summarized as follows:

	A	As of	As of
	June	28, 2024	June 30, 2023
Operating lease right-of-use assets, net	\$	60,860	\$ 63,015
Accrued expenses(1)	\$	11,614	\$ 10,434
Operating lease liabilities		62,584	66,797
Total operating lease liabilities	\$	74,198	\$ 77,231

<sup>(1)</sup> The short term portion of the Operating lease liabilities is included within Accrued expenses on the Consolidated Balance Sheet.

# OTHER SUPPLEMENTAL INFORMATION

Other supplemental operating lease information is summarized as follows:

	For tl	he Fiscal Year Ended	For	the Fiscal Year Ended
		June 28, 2024		June 30, 2023
Cash paid for amounts included in the measurement of operating lease liabilities	\$	10,343	\$	10,756
Right-of-use assets obtained in exchange for new lease liabilities	\$	7,249	\$	10,627
Weighted average remaining lease term		6.4 years		7.0 years
Weighted average discount rate		5.50 %		5.17 %

# MATURITIES OF LEASE COMMITMENTS

Maturities of operating lease commitments as of June 28, 2024 were as follows:

Fiscal Year	 Totals
2025	\$ 15,286
2026	13,524
2027	13,992
2028	12,579
2029	10,903
Thereafter	 22,906
Total lease payments	89,190
Less: imputed interest	 (14,992)
Present value of operating lease liabilities	\$ 74,198

During fiscal 2024, 2023 and 2022 the Company recognized operating lease expense of \$13,775, \$13,763, and \$14,332, respectively. There were no material restrictions, covenants, sale and leaseback transactions, variable lease payments or residual value guarantees imposed by the Company's leases at June 28, 2024.

#### J. Income Taxes

The components of (loss) income before income taxes and income tax (benefit) provision were as follows:

	Fiscal Years					
		2024		2023		2022
(Loss) income before income taxes:						
United States	\$	(183,263)	\$	(42,864)	\$	24,286
Foreign	<u>,</u>	(6,012)		(5,678)		(5,891)
	\$	(189,275)	\$	(48,542)	\$	18,395
Tax (benefit) provision:						
Federal:						
Current	\$	(19,791)	\$	33,898	\$	3,857
Deferred		(21,274)		(54,010)		(230)
		(41,065)		(20,112)		3,627
State:						
Current		(3,016)		10,054		3,626
Deferred		(7,937)		(10,200)		(2,721)
		(10,953)		(146)		905
Foreign:						
Current		95		104		2,535
Deferred		288		(53)		53
		383		51		2,588
	\$	(51,635)	\$	(20,207)	\$	7,120

The following is the reconciliation between the federal statutory income tax rate and the Company's effective income tax rate:

	Fiscal Years			
	2024	2023	2022	
Tax (benefit) provision at federal statutory rates	(21.0)%	(21.0)%	21.0 %	
State income tax, net of federal tax benefit	(5.9)	(5.4)	8.1	
Research and development tax credits	(3.7)	(15.1)	(39.5)	
Provision to return	(0.1)	(0.7)	10.3	
Excess tax provision related to stock compensation	1.4	2.6	5.3	
Foreign income tax rate differential	0.2	0.2	2.3	
Non-deductible compensation	0.9	1.0	20.9	
Acquisition costs	_	_	1.2	
Reserves for unrecognized income tax benefits	0.2	(6.9)	5.4	
Valuation allowance	0.7	3.8	4.3	
Foreign derived intangible income	_	(1.4)	(1.6)	
Other		1.3	1.0	
	(27.3)%	(41.6)%	38.7 %	

The effective tax rate for fiscal 2024 differed from the Federal statutory rate primarily due to Federal and state research and development tax credits and state taxes, partially offset by tax provisions related to stock compensation.

The effective tax rate for fiscal 2023 differed from the Federal statutory rate primarily due to Federal and state research and development tax credits, releases to reserves for unrecognized income tax benefits and state taxes, partially offset by valuation allowances recorded and tax provisions related to stock compensation.

The effective tax rate for fiscal 2022 differed from the Federal statutory rate primarily due to additional tax provisions for non-deductible compensation, provision to return adjustments, state taxes and excess tax provisions related to stock compensation, partially offset by research and development tax credits.

The components of the Company's net deferred tax assets (liabilities) were as follows:

	A	s of
	June 28, 2024	June 30, 2023
Deferred tax assets:		
Inventory valuation and receivable allowances	\$ 23,799	\$ 18,095
Accruals	10,852	6,762
Stock compensation	6,700	5,149
Federal and state research and development tax credit carryforwards	17,762	14,287
Research and development expenditures	68,728	63,114
Interest expense carryforward	5,289	<u> </u>
Federal and state net operating loss carryforward	2,357	774
Foreign net operating loss carryforward	4,004	3,166
Operating lease liabilities	20,107	19,968
Other	1,339	2,325
	160,937	133,640
Valuation allowance	(17,575)	(14,785)
Total deferred tax assets	143,362	118,855
Deferred tax liabilities:		
Property and equipment	(13,647)	(15,798)
Intangible assets	(50,935)	(54,550)
Operating lease right-of-use assets, net	(16,493)	(17,077)
Other	(3,675)	(4,331)
Total deferred tax liabilities	(84,750)	(91,756)
Net deferred tax assets	\$ 58,612	\$ 27,099
		<del> </del>

At June 28, 2024, the Company has gross state research and development tax credit carryforwards of \$17,385, \$13,734 net of federal benefit, of which a portion will expire each fiscal year through fiscal year 2039. The Company maintains a valuation allowance on the majority of the Company's state research and development tax credit carryforwards. The Company has gross federal research and development tax credit carryforwards of \$3,887, of which a portion will expire starting in fiscal year 2040.

At June 28, 2024, the Company has gross interest expense carryforwards of \$19,518, which have an indefinite life, gross state net operating loss carryforwards of \$33,802, which will expire starting in fiscal year 2040 and gross foreign net operating loss carryforwards of \$25,742 which will expire starting in fiscal year 2028. The Company maintains a valuation allowance on the majority of the foreign net operating loss carryforward.

Based on forecasted taxable income and the scheduled reversal of the remaining deferred tax assets, the Company believes it is more likely than not that all other deferred tax assets will be realized.

The Company is subject to taxation in the U.S. (Federal and state) and various foreign jurisdictions that it operates in. The Company has established income tax reserves for potential additional income taxes based upon management's assessment, including recognition and measurement. All income tax reserves are analyzed quarterly, and adjustments are made as events occur and warrant modification.

The changes in the Company's income tax reserves for gross unrecognized income tax benefits, including interest and penalties, are summarized as follows:

	 Fiscal Years		
	2024		2023
Unrecognized tax benefits, beginning of period	\$ 5,165	\$	9,112
Increases for tax positions taken related to a prior period	3,371		
Increases for tax positions taken during the current period	3,083		1,260
Decreases for tax positions taken by an acquired company	_		(2,679)
Decreases for tax positions taken related to a prior period	(2,971)		(191)
Decreases for settlements of previously recognized positions	_		(93)
Decreases as a result of a lapse of the applicable statute of limitations	(935)		(2,244)
Unrecognized tax benefits, end of period	\$ 7,713	\$	5,165

The Company has \$7,713 of unrecognized tax benefits as of June 28, 2024. If released, \$5,543 of these unrecognized income tax benefits would reduce the Company's income tax provision.

The Company includes interest and penalties related to unrecognized tax benefits within the provision for income taxes. The total amount of interest and penalties accrued was \$1,374 and \$583 as of June 28, 2024 and June 30, 2023, respectively, and the amount of interest and penalties accrued and recognized was \$791 and \$96 during June 28, 2024 and June 30, 2023, respectively.

The Company's major tax jurisdiction is the U.S. (Federal and state) and the open tax years are fiscal 2018 through 2024.

### K. Commitments and Contingencies

#### **LEGAL CLAIMS**

The Company is subject to litigation, claims, investigations and audits arising from time to time in the ordinary course of business. Although legal proceedings are inherently unpredictable, the Company believes that it has valid defenses with respect to any matters currently pending against the Company and intends to defend itself vigorously. The outcome of these matters, individually and in the aggregate, is not expected to have a material impact on the Company's cash flows, results of operations, or financial position.

On December 7, 2021, counsel for National Technical Systems, Inc. ("NTS") sent the Company an environmental demand letter pursuant to Massachusetts General Laws Chapter 21E, Section 4A, and CERCLA 42 U.S.C. Section 9601, related to a site that NTS formerly owned at 533 Main Street, Acton, Massachusetts. NTS received a Notice of Responsibility from the Massachusetts Department of Environmental Protection ("MassDEP") alleging trichloroethene, freon and 1,4-dioxane contamination in the groundwater emanating from NTS's former site. NTS alleges in its demand letter that the operations of a predecessor company to Mercury that was acquired in the Company's acquisition of the Microsemi Carve-Out Business that once owned and operated a facility at 531 Main Street, Acton, Massachusetts contributed to the groundwater contamination. NTS is seeking payment from the Company of NTS's costs for any required environmental remediation. In April 2022, the Company engaged in a meet and confer session with NTS pursuant to Massachusetts General Laws Chapter 21E, Section 4A to discuss the status of the environmental review performed by NTS and its licensed site professional. The Company subsequently delivered a letter to NTS outlining the deficiencies in their claim and reiterated that the Company is not obligated to tender a substantive response to their demand without first having received the responsive information requested in connection with the meet and confer session. In April 2024, counsel for NTS sent additional communications on their demand that the Company participate in their environmental monitoring and remediation planning, and in May 2024, the Company responded with a rebuttal of the allegations. The Company believes the NTS claims are without merit and intends to defend itself vigorously. In addition, in November 2021, the Company responded to a request for information from MassDEP regarding the detection of PFAS (per- and polyfluoroakyl substances) in the Acton, Massachusetts Water District's Conant public water supply wells near the former facility at 531 Main Street, Acton, Massachusetts at a level above the standard that MassDEP published for PFAS in October 2020. The Company has not been contacted by MassDEP since the response was provided in November 2021. It is too early to determine what responsibility, if any, the Company may have for these environmental matters.

On June 19, 2023, the Board of Directors received notice of the Company's former CEO's resignation from his positions of President and Chief Executive Officer. The Board accepted his resignation effective June 24, 2023. In his notice, the former CEO claimed he was entitled to certain benefits, including equity vesting, severance, and other benefits, under his change in control severance agreement (the "CIC Agreement") because he had resigned with good reason during a potential change in control period. The Company disputes these claims and maintains that he resigned without good reason. On September 19, 2023, the former CEO filed for binding arbitration under the employment rules of the American Arbitration Association

("AAA"). An arbitrator was appointed on November 29, 2023, and the arbitration trial has been scheduled for mid-December 2024. On March 25, 2024, the arbitrator denied Mr. Aslett's motion for compensation during the dispute and payment of his legal fees, preserving those matters for the arbitration trial. The Company intends to contest vigorously the claims under the CIC Agreement and believes that the Company has strong arguments that the former CEO's claims lack merit. If the arbitrator rules in the Company's favor, the Company may still need to pay the former CEO's reasonable legal fees, interest, and compensation during the dispute. If instead the arbitrator rules for the former CEO, the Company could be liable for up to approximately \$14,100, based on the closing price of the Company's common stock on June 26, 2023, for accelerated equity vesting, severance, and other benefits under the CIC Agreement, plus interest, legal fees and expenses and compensation during dispute, which could include Mr. Aslett's base salary and other amounts based on the compensation, benefit and insurance plans in which he participated. The Company categorically denies any wrongdoing or liability under the CIC Agreement, but the outcome of potential arbitration is inherently uncertain. Accordingly, it is reasonably possible that the Company will incur a liability in this matter, and the Company estimates the potential range of exposure from \$0 to \$14,100, plus costs and attorneys' fees and compensation to the former CEO during the dispute.

On December 13, 2023, a securities class action complaint was filed against the Company, Mark Aslett, and Michael Ruppert in the U.S. District Court for the District of Massachusetts. The complaint asserted Section 10(b) and 20(a) securities fraud claims on behalf of a purported class of purchasers and sellers of the Company's stock from December 7, 2020, through June 23, 2023. The complaint alleged that the Company's public disclosures in SEC filings and on earnings calls were false and/or misleading. On February 27, 2024, the Court entered an order appointing Carpenters Pension Trust Fund for Northern California as lead plaintiff. On April 18, 2024, the lead plaintiff filed an amended complaint including William Ballhaus and David Farnsworth as additional defendants and amended the class period to February 3, 2021 through February 6, 2024. The Company filed a motion to dismiss on May 24, 2024, and after the plaintiffs' filed their opposition motion and the Company filed its reply to their opposition, a hearing on the motion was conducted by the Court on July 24, 2024. On July 24, 2024, the Court dismissed the case without prejudice and permitted the plaintiffs 30 days to file an amended complaint. Subject to the terms of the Company's by-laws and applicable Massachusetts law, Mr. Aslett, the former Chief Executive Officer, Mr. Ruppert, the former Chief Financial Officer, Mr. Ballhaus, the current Chief Executive Officer, and Mr. Farnsworth, the current Chief Financial officer, are indemnified by the Company for this matter. The Company believes the claims in the complaint are without merit and intends to defend itself vigorously. It is too early to determine what responsibility, if any, the Company will have for this matter.

On January 31, 2024, a former employee at the Company's Torrance, California location, filed a wage and hour class action lawsuit in California state court in Los Angeles County, along with a companion Private Attorneys General Act ("PAGA") lawsuit, to act in a representative capacity for other Mercury Mission Systems, LLC employees in California, alleging a range of violations of California wage and hour regulations. The Company believes the claims in the complaints are without merit and intends to defend itself vigorously. It is too early to determine what responsibility, if any, the Company will have for this matter.

#### INDEMNIFICATION OBLIGATIONS

The Company's standard product sales and license agreements entered into in the ordinary course of business typically contain an indemnification provision pursuant to which the Company indemnifies, holds harmless, and agrees to reimburse the indemnified party for losses suffered or incurred by the indemnified party in connection with any patent, copyright or other intellectual property infringement claim by any third party with respect to the Company's products. Such provisions generally survive termination or expiration of the agreements. The potential amount of future payments the Company could be required to make under these indemnification provisions is, in some instances, unlimited.

#### **PURCHASE COMMITMENTS**

As of June 28, 2024, the Company has entered into non-cancelable purchase commitments for certain inventory components and services used in its normal operations. The purchase commitments covered by these agreements are for less than one year and aggregate to \$122,195.

#### **O**THER

The Company may elect from time to time to purchase and subsequently retire shares of common stock in order to settle an individual employees' tax liability associated with vesting of a restricted stock award or exercise of stock options. These transactions are treated as a use of cash in financing activities in the Company's Statements of Cash Flows.

#### L. Debt

# **Revolving Credit Facilities**

On February 28, 2022, the Company amended the Revolver to increase and extend the borrowing capacity to a \$1,100,000, 5-year revolving credit line, with the maturity extended to February 28, 2027. As of June 28, 2024, the Company's outstanding balance of unamortized deferred financing costs was \$4,051, which is being amortized to Other (expense) income, net in the Consolidated Statements of Operations and Comprehensive (Loss) Income over the term of the Revolver and includes the costs incurred in conjunction with the November 2023 amendment to the Revolver.

On November 7, 2023, due to the uncertainty surrounding a government shutdown or prolonged continuing resolution and the potential impact on the second quarter and fiscal 2024 results, the Company proactively executed Amendment No. 5 to the Revolver, as amended to date, with a syndicate of commercial banks and Bank of America, N.A acting as the administrative agent allowing for a temporary increase in the Consolidated Total Net Leverage Ratio covenant requirement from 4.50 to 5.25 for the second quarter ended December 29, 2023. In conjunction with Amendment No. 5 to the Revolver, the Company incurred \$1,931 of new deferred financing costs that will be amortized over the remaining term of the Revolver. Refer to exhibit 10.7.5 included herein.

See Note R "Subsequent Events" to the consolidated financial statements for discussion of the Company's Amendment No. 6 to the Revolver.

#### Maturity

The Revolver has a 5-year maturity and will mature on February 28, 2027.

#### Interest Rates and Fees

Borrowings under the Revolver bear interest, at the Company's option, at floating rates tied to Secured Overnight Financing Rate ("SOFR") or the prime rate plus an applicable percentage in the case of dollar denominated loans or, in the case of certain other currencies, such alternative floating rates as agreed. The interest rate applicable to outstanding loans has initially been set at SOFR plus 1.25% and in future fiscal quarters will be established pursuant to a pricing grid based on the Company's total net leverage ratio.

In addition to interest on the aggregate outstanding principal amounts of any borrowings, the Company will also pay a quarterly commitment fee on the unutilized commitments under the Revolver, which fee has initially been set at 0.20% per annum and in future fiscal quarters will be established pursuant to a pricing grid based on the Company's total net leverage ratio. The Company will also pay customary letter of credit and agency fees.

#### Covenants and Events of Default

The Revolver provides for customary negative covenants, including, among other things and subject to certain significant exceptions, restrictions on the incurrence of debt or guarantees, the creation of liens, the making of certain investments, loans and acquisitions, mergers and dissolutions, the sale of assets including capital stock of subsidiaries, the payment of dividends, the repayment or amending of junior debt, altering the business conducted, engaging in transactions with affiliates and entering into agreements limiting subsidiary dividends and distributions. The Revolver also requires the Company to comply with certain financial covenants, including a quarterly minimum consolidated cash interest charge ratio test and a quarterly maximum consolidated total net leverage ratio test.

The Revolver also provides for customary representations and warranties, affirmative covenants and events of default (including, among others, the failure to make required payments of principal and interest, certain insolvency events and an event of default upon a change of control). If an event of default occurs, the lenders under the Revolver will be entitled to take various actions, including the termination of unutilized commitments, the acceleration of amounts outstanding under the Revolver and all actions permitted to be taken by a secured creditor.

#### Guarantees and Security

The Company's obligations under the Revolver are guaranteed by certain of the Company's material domestic wholly-owned restricted subsidiaries (the "Guarantors"). The obligations of both the Company and the Guarantors are secured by a perfected security interest in substantially all of the assets of the Company and the Guarantors, in each case, now owned or later acquired, including a pledge of all of the capital stock of substantially all of the Company's domestic wholly-owned restricted subsidiaries and 65% of the capital stock of certain of its foreign restricted subsidiaries, subject in each case to the exclusion of certain assets and additional exceptions.

As of June 28, 2024, the Company was in compliance with all covenants and conditions under the Revolver and there were outstanding borrowings of \$591,500 against the Revolver as compared to \$511,500 for the fiscal year ended June 30, 2023, resulting in interest expense of \$35,015 and \$25,159 for fiscal years ended June 28, 2024 and June 30, 2023, respectively. The current borrowing capacity as defined under the Revolver as of June 28, 2024 is approximately \$986,000, of which we had outstanding borrowings against of \$591,500. There were outstanding letters of credit of \$753 as of June 28, 2024.

# M. Employee Benefit Plans

#### Pension Plan

The Company maintains a pension plan (the "Plan") for its Swiss employees, which is administered by an independent pension fund. The Plan is mandated by Swiss law and meets the criteria for a defined benefit plan under ASC 715, Compensation—Retirement Benefits ("ASC 715"), since participants of the Plan are entitled to a defined rate of return on contributions made. The independent pension fund is a multi-employer plan with unrestricted joint liability for all participating companies for which the Plan's overfunding or underfunding is allocated to each participating company based on an allocation key determined by the Plan.

The Company recognizes a net asset or liability for the Plan equal to the difference between the projected benefit obligation of the Plan and the fair value of the Plan's assets as required by ASC 715. The funded status may vary from year to year due to changes in the fair value of the Plan's assets and variations on the underlying assumptions of the projected benefit obligation of the Plan.

In fiscal 2021, the independent pension fund changed the conversion rate for accumulated retirement savings leading to a Plan amendment. The Company's results contain the effects of this change in conversion rates by the independent pension fund as prior service costs. These prior service costs are amortized from AOCI to net periodic benefit costs over approximately nine years.

At June 28, 2024, the accumulated benefit obligation of the Plan equals the fair value of the Plan's assets. The Plan's funded status at June 28, 2024 and June 30, 2023 was a net liability of \$5,005 and \$4,151, respectively, which is recorded in other non-current liabilities on the Consolidated Balance Sheets. The Company recognized net periodic benefit costs of \$471 and \$440 associated with the Plan and a net (loss) gain of \$(1,383) and \$142 in AOCI during the fiscal years ended June 28, 2024 and June 30, 2023, respectively. Total employer contributions to the Plan were \$988 during the year ended June 28, 2024, and the Company's total expected employer contributions to the Plan during fiscal 2025 are \$927.

The following table reflects the total pension benefits expected to be paid from the Plan, which is funded from contributions by participants and the Company.

Fiscal Year	 Total
2025	\$ 788
2026	935
2027	969
2028	1,312
2029	1,463
Thereafter (next 5 years)	6,314
Total	\$ 11,781

The following table outlines the components of net periodic benefit cost of the Plan for the fiscal years ended June 28, 2024 and June 30, 2023:

 Fiscal Years Ended			
 June 28, 2024			
\$ 965	\$	1,068	
481		463	
(400)		(379)	
(203)		(203)	
(18)		_	
(354)		(509)	
\$ 471	\$	440	
•	June 28, 2024 \$ 965 481 (400) (203) (18) (354)	June 28, 2024 June 28, 2024 S S S S S S S S S S S S S S S S S S S	

The following table reflects the related actuarial assumptions used to determine net periodic benefit cost of the Plan for the fiscal years ended June 28, 2024 and June 30, 2023:

	Fiscal Year	s Ended
	June 28, 2024	June 30, 2023
Discount rate	1.30 %	1.95 %
Expected rate of return on Plan assets	1.30 %	1.95 %
Expected inflation	1.20 %	1.00 %
Rate of compensation increases	2.50 %	1.50 %

The calculation of the projected benefit obligation ("PBO") utilized BVG 2020 Generational data for assumptions related to the mortality rates, disability rates, turnover rates, and early retirement ages.

The PBO represents the present value of Plan benefits earned through the end of the year, with an allowance for future salary and pension increases as well as turnover rates. The following table presents the change in projected benefit obligation for the periods presented:

		Fiscal Years Ended					
	J	une 28, 2024	June 30, 2023				
Projected benefit obligation, beginning	\$	24,710	\$	25,509			
Service cost		965		1,068			
Interest cost		481		463			
Employee contributions		1,235		1,439			
Actuarial (loss) gain		629		(516)			
Benefits paid		(881)		(246)			
Settlements		(5,239)		(4,770)			
Plan amendment		20		_			
Foreign exchange (gain) loss		(42)		1,763			
Projected benefit obligation at end of year	\$	21,878	\$	24,710			

The following table presents the change in Plan assets for the periods presented:

Fiscal Years Ended						
Jur	June 30, 2023					
\$	20,559	\$	20,849			
	246		700			
	988		1,158			
	1,235		1,439			
	(881)		(246)			
	(5,239)		(4,770)			
	(35)		1,429			
\$	16,873	\$	20,559			
	Jun	June 28, 2024 \$ 20,559 246 988 1,235 (881) (5,239) (35)	June 28, 2024     Ju       \$ 20,559     \$       246     988       1,235     (881)       (5,239)     (35)			

The following table presents the Company's reconciliation of funded status for the period presented:

	 As of						
	 June 28, 2024	June 30, 2023					
Projected benefit obligation at end of year	\$ 21,878	\$	24,710				
Fair value of plan assets at end of year	16,873		20,559				
Funded status	\$ (5,005)	\$	(4,151)				

The fair value of Plan assets was \$16,873 at June 28, 2024. The Plan is denominated in a foreign currency, the Swiss Franc, which can have an impact on the fair value of Plan assets. The Plan was not subject to material fluctuations during the years ended June 28, 2024 or June 30, 2023. The Plan's assets are administered by an independent pension fund foundation (the "foundation"). As of June 28, 2024, the foundation has invested the assets of the Plan in various investments vehicles, including cash, real estate, equity securities, and bonds. The investments are measured at fair value using a mix of Level 1, Level 2 and Level 3 inputs.

#### 401(k) Plan

The Company maintains a qualified 401(k) plan (the "401(k) Plan") for its U.S. employees. Effective in the first quarter of fiscal 2023, the Company increased the rate of its matching contributions from 3% to 6% of participants' eligible annual compensation and changed the form of these contributions from cash to Company stock. The Company may also make optional contributions to the plan for any plan year at its discretion. The Company had \$2,901 of capitalized stock-based 401(k) matching compensation expense on the Consolidated Balance Sheet at June 28, 2024. Stock-based 401(k) matching compensation cost is measured based on the value of the matching amount and is recognized as expense as incurred. Expense recognized by the Company for matching contributions related to the 401(k) plan was \$15,853, \$15,665, and \$7,603 during the fiscal years ended June 28, 2024, June 30, 2023, and July 1, 2022, respectively.

#### Deferred Compensation Plan

The Company implemented a nonqualified deferred compensation plan as of January 1, 2024, under which eligible employees may defer up to 50% of their base salaries and up to 100% of their annual incentive bonuses. The Company may also make employer contributions to participant accounts in its sole discretion, and for calendar year 2024, will match participants' deferrals under the plan of up to 6% of their eligible annual compensation in the form of deferred stock units (or at the Company's election, a cash deferral credited to participants' account balances). The Company's matching obligation for 2024 is subject to the satisfaction of a financial performance condition for the 2024 calendar year. Participant deferrals under the plan are held in a Rabbi trust and are subject to the claims of the Company's creditors. Assets held by the rabbi trust are classified as trading securities and are recorded at fair value, with changes in value recorded as adjustments to other income. All deferrals or employer contributions under the plan, and all earnings thereon, are fully vested as and when made or credited to plan participants.

As of June 28, 2024, the Company held assets under the rabbi trust of \$88, was subject to liabilities for amounts payable under the plan to participants (including accrued employer matching contributions not yet credited to plan participants) of \$88. Assets related to this plan are included in Other assets, and liabilities related to this plan are included in Other long-term liabilities in the Consolidated Balance Sheets. During the fiscal year ended June 28, 2024, the Company recognized an immaterial value of compensation expense as a result of changes in the value of notional investments selected by plan participants for the investment of their plan account balances, with the same amount being recorded as other income attributable to changes in the market value of the assets held by the Rabbi trust. The nonqualified deferred compensation plan was not in place as of June 30, 2023.

### N. Shareholders' Equity

#### PREFERRED STOCK

The Company is authorized to issue 1,000 shares of preferred stock with a par value of \$0.01 per share.

#### SHELF REGISTRATION STATEMENT

On October 4, 2023, the Company filed a shelf registration statement on Form S-3ASR with the SEC. The shelf registration statement, which was effective upon filing with the SEC, registered each of the following securities: debt securities; preferred stock; common stock; warrants; and units. The Company has an unlimited amount available under the shelf registration statement.

#### STOCKHOLDER RIGHTS PLAN

On December 27, 2021, the Company's Board of Directors authorized and declared a dividend of one preferred share purchase right (a "Right"), payable on January 10, 2022, for each outstanding share of common stock par value \$0.01 per share to the stockholders of record on that date. Each Right entitled the registered holder to purchase from the Company a unit of Series A Junior Preferred Stock, par value \$0.01 per share, of the Company at a designated price per unit, subject to adjustment. The Rights initially trade with, and are inseparable from, the shares of common stock.

On June 24, 2022, the Company amended the Rights Agreement, dated as of December 27, 2021, to increase the ownership threshold for a person to be an "Acquiring Person" (as defined in the Rights Agreement) from 7.5% of common stock to 10% of common stock (10% of common stock to 20% of common stock in the case of a passive institutional investor).

Additional details about the Rights Agreement are contained in the Current Reports on Form 8-K filed by the Company with the SEC on December 29, 2021 and June 24, 2022.

On October 26, 2022 the Stockholder Rights Plan and the Rights thereunder expired.

#### O. Stock-Based Compensation

#### STOCK INCENTIVE PLANS

At June 28, 2024, the aggregate number of shares authorized for issuance under the Company's Amended and Restated 2018 Stock Incentive Plan (the "2018 Plan") is 7,862 shares, including 3,000 shares approved by the Company's shareholders on October 28, 2020 and 2,000 shares approved for future grant under the 2018 Plan by the company's shareholders on October 26, 2022. On October 25, 2023, the Company's shareholders approved an additional 3,450 shares to be added to the 2018 plan. The 2018 Plan shares available for issuance also include 948 shares rolled into the 2018 Plan that were available for future grant under the Company's 2005 Stock Incentive Plan, as amended and restated (the "2005 Plan"). The 2018 Plan replaced the 2005 Plan. The shares authorized for issuance under the 2018 Plan will continue to be increased by any future cancellations, forfeitures or terminations of awards under the 2005 Plan. The foregoing does not affect any outstanding awards under the 2005 Plan, which remain in full force and effect in accordance with their terms. The 2018 Plan provides for the grant of non-qualified and incentive stock options, restricted stock, stock appreciation rights and deferred stock awards to employees and non-employees. Stock options must be granted with an exercise price of not less than 100% of the fair value of the Company's common stock on the date of grant and the options generally have a term of seven years. There were 4,820 shares available for future grant under the 2018 Plan at June 28, 2024.

As part of the Company's ongoing annual equity grant program for employees, the Company grants performance-based restricted stock awards to certain executives and employees pursuant to the 2018 Plan. Performance awards vest based on the requisite service period subject to the achievement of specific financial performance targets. Based on the performance targets, some of these awards require graded vesting which results in more rapid expense recognition compared to traditional time-based vesting over the same vesting period. The Company monitors the probability of achieving the performance targets on a quarterly basis and may adjust periodic stock compensation expense accordingly based on its determination of the likelihood for reaching targets. The performance targets generally include the achievement of financial performance goals, either on an absolute basis or relative to a peer group of companies. Payouts under performance-based restricted stock awards may also be subject to modification based on Mercury's total shareholder return relative to the component companies within the Spade Defensive Index.

#### **EMPLOYEE STOCK PURCHASE PLAN**

The number of shares authorized for issuance under the Company's 1997 Employee Stock Purchase Plan, as amended and restated (the "1997 ESPP"), is 2,300 shares, including 500 shares approved by the Company's shareholders on October 28, 2020. Under the 1997 ESPP, rights are granted to purchase shares of common stock at 85% of the lesser of the market value of such shares at either the beginning or the end of each six-month offering period. The 1997 ESPP permits employees to purchase common stock through payroll deductions, which may not exceed 10% of an employee's compensation as defined in the 1997 ESPP. The number of shares issued under the 1997 ESPP during fiscal years 2024, 2023 and 2022 was 167, 145 and 115, respectively. The 1997 ESPP terminated in accordance with its terms effective May 14, 2024.

The Company adopted a new employee stock purchase plan (the "2024 ESPP") in April 2024. Subject to shareholder approval at the Company's 2024 annual meeting of shareholders, the number of shares authorized for issuance under the 2024 ESPP is 1,000 shares. Under the 2024 ESPP, rights are granted to purchase shares of common stock at 85% of the lesser of the market value of such shares at either the beginning or the end of each six-month offering period. The 2024 ESPP permits employees to purchase common stock through payroll deductions, which may not exceed 10% of an employee's compensation as defined in the 2024 ESPP. As of June 28, 2024, no shares have been issued under the 2024 ESPP.

#### STOCK OPTION AND AWARD ACTIVITY

On August 15, 2023, the Company announced that William L. Ballhaus was appointed as the Company's President and Chief Executive Officer. Mr. Ballhaus received an onboarding grant of premium-priced stock options ("New Hire Option") under the 2018 Plan. The Company and Mr. Ballhaus are parties to an employment agreement, which is included in exhibit 10.1 on Form 8-K filed by the Company with the SEC on August 15, 2023.

The New Hire Option is granted in four (4) tranches as follows: (w) 233,500 shares of the Company's common stock with an exercise price equal to \$42.00 ("Tranche 1"); (x) 233,500 shares of the Company's common stock with an exercise price equal to \$43.00 ("Tranche 2"); (y) 233,500 shares of the Company's common stock with an exercise price equal to \$46.00 ("Tranche 3"); and (z) 233,500 shares of the Company's common stock with an exercise price equal to \$49.00 ("Tranche 4"). Tranche 1 and Tranche 2 shall become vested and exercisable on the third anniversary of August 17, 2023 ("the Initial Grant Date") (subject to the Executive's continued employment through such date) and shall expire on the fourth anniversary of the Initial Grant Date (subject to the Executive's continued employment through such date) and shall expire on the fifth anniversary of the Initial Grant Date.

The following table summarizes activity of the Company's stock option plans since July 1, 2022:

	Options Outstanding										
	Number of Shares	G	Veighted Average rant Date air Value		Weighted Average tercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value as of 6/28/2024				
Granted	934	\$	12.71	\$	45.00						
Exercised	_			\$	_						
Cancelled	_			\$	_						
Outstanding at June 28, 2024	934	\$	12.71	\$	45.00	3.69 years	\$ —				
Exercisable at June 28, 2024		\$	_	\$	_	_	\$ —				

There were no options vested or exercised during fiscal year 2024. Non-vested stock options are subject to the risk of forfeiture until the fulfillment of specified conditions. As of June 28, 2024, there was \$9,244 of total unrecognized compensation cost related to non-vested options granted that is expected to be recognized over a weighted-average period 2.69 years from June 28, 2024.

The Company uses the Black-Scholes valuation model for estimating the fair value on the date of grant of stock options. The Company calculated the fair values of the options grants using the following weighted-average assumptions:

	Fiscal Y	Year Ended
	June	28, 2024
Expected volatility		45 %
Expected term		4 years
Risk-free interest rate		4.44 %
Expected dividend yield		— %
Weighted-average grant date fair value per share	\$	12.71

The expected volatility of options granted has been determined using a weighted average of the historical volatility of the Company's stock for a period equal to the expected term of the option. The expected term of options has been determined using the average of the contractual term and the weighted average vesting term of the options. The risk-free interest rate is based on a zero-coupon U.S. treasury instrument whose term is consistent with the expected term of the stock options. The Company has not paid and does not anticipate paying cash dividends on its shares of common stock; therefore, the expected dividend yield is assumed to be zero. The Company applied an estimated annual forfeiture rate based on historical averages in determining the expense recorded in each period. There were 934 stock options granted during fiscal year ended June 28, 2024.

The following table summarizes the status of the Company's non-vested restricted stock awards and deferred stock awards since July 1, 2022:

	Non-Vested Restricted Stock Awards						
	Number of Shares	Ğ	hted Average rant Date air Value				
Outstanding at July 1, 2022	2,305	\$	57.47				
Granted	298		51.90				
Vested	(738)		60.89				
Forfeited	(526)		55.66				
Outstanding at June 30, 2023	1,339	\$	54.45				
Granted	1,334		36.38				
Vested	(476)		56.04				
Forfeited	(671)		47.14				
Outstanding at June 28, 2024	1,526	\$	41.35				

The total fair value of restricted stock awards vested during fiscal years 2024, 2023 and 2022 was \$15,994, \$25,587 and \$25,533, respectively.

#### STOCK-BASED COMPENSATION EXPENSE

The Company recognizes expense for its share-based payment plans in the Consolidated Statements of Operations and Comprehensive (Loss) Income in accordance with ASC 718. The Company had \$456 and \$1,215 of capitalized stock-based compensation expense on the Consolidated Balance Sheets as of June 28, 2024 and June 30, 2023, respectively. Under the fair value recognition provisions of ASC 718, stock-based compensation cost is measured at the grant date based on the value of the award and is recognized as expense over the service period.

The following table presents share-based compensation expenses from continuing operations included in the Company's Consolidated Statements of Operations and Comprehensive (Loss) Income:

	Fiscal Years Ended							
	June 28, 2024			ne 30, 2023	J	uly 1, 2022		
Cost of revenues	\$	2,919	\$	2,926	\$	2,161		
Selling, general and administrative		16,936		18,335		30,116		
Research and development		5,814		6,492		6,016		
Stock-based compensation expense before tax		25,669		27,753		38,293		
Income taxes		(6,931)		(7,216)		(10,339)		
Stock-based compensation expense, net of income taxes	\$	18,738	\$	20,537	\$	27,954		

# P. Operating Segment, Geographic Information and Significant Customers

Operating segments are defined as components of an enterprise evaluated regularly by the Company's chief operating decision maker ("CODM") in deciding how to allocate resources and assess performance. The Company evaluated its internal organization under FASB ASC 280, *Segment Reporting* ("ASC 280") to determine whether there has been a change to its conclusion of a single operating and reportable segment. The Company concluded there has been no changes given the CODM continues to evaluate and manage the Company on the basis of one operating and reportable segment. The Company utilized the management approach for determining its operating segment in accordance with ASC 280.

The geographic distribution of the Company's revenues as determined by order origination based on the country in which the Company's legal subsidiary is domiciled is summarized as follows:

	U.S.	 Europe	Asia Pacific		Asia Pacific		 Eliminations	Total
YEAR ENDED JUNE 28, 2024								
Net revenues to unaffiliated customers	\$ 785,881	\$ 49,375	\$	19	\$ 	\$ 835,275		
Inter-geographic revenues	6,777	 1,369			 (8,146)	 _		
Net revenues	\$ 792,658	\$ 50,744	\$	19	\$ (8,146)	\$ 835,275

<sup>(1)</sup> Identifiable long-lived assets exclude ROU assets, goodwill and intangible assets.

In recent years, the Company completed a series of acquisitions that changed its technological capabilities, applications and end markets. As these acquisitions and changes occurred, the Company's proportion of revenue derived from the sale of components in different technological areas, and modules, sub-assemblies and integrated subsystems which combine technologies into more complex diverse products has shifted. The following tables present revenue consistent with the Company's strategy of expanding its technological capabilities and program content. As additional information related to the Company's products by end user, application, product grouping and/or platform is attained, the categorization of these products can vary over time. When this occurs, the Company reclassifies revenue by end user, application, product grouping and/or platform for prior periods. Such reclassifications typically do not materially change the underlying trends of results within each revenue category.

The following table presents the Company's net revenue by end market for the periods presented:

	Fiscal Years Ended							
	June 28, 2024			ne 30, 2023	23 July 1, 20			
Domestic (1)	\$	704,132	\$	865,216	\$	861,125		
International/Foreign Military Sales (2)		131,143		108,666		127,072		
Total Net Revenue	\$	835,275	\$	973,882	\$	988,197		

<sup>(1)</sup> Domestic revenues consist of sales where the end user is within the U.S., as well as sales to prime defense contractor customers where the ultimate end user location is not defined.

The following table presents the Company's net revenue by end application for the periods presented:

	Fiscal Years Ended						
	June 28, 2024			ne 30, 2023	J	uly 1, 2022	
Radar (1)	\$	110,371	\$	229,467	\$	251,126	
Electronic Warfare (2)		120,685		144,554		157,676	
Other Sensor and Effector (3)		129,034		112,659		104,114	
Total Sensor and Effector		360,090		486,680		512,916	
C4I (4)		388,533		414,143		399,816	
Other (5)		86,652		73,059		75,465	
Total Net Revenues	\$	835,275	\$	973,882	\$	988,197	

<sup>(1)</sup> Radar includes end-use applications where radio frequency signals are utilized to detect, track and identify objects.

<sup>(2)</sup> International/Foreign Military Sales consist of sales to U.S. prime defense contractor customers where the end user is outside the U.S., foreign military sales through the U.S. government, and direct sales to non-U.S. based customers intended for end use outside of the U.S.

<sup>(2)</sup> Electronic Warfare includes end-use applications comprising the offensive and defensive use of the electromagnetic spectrum.

<sup>(3)</sup> Other Sensor and Effector products include all Sensor and Effector end markets other than Radar and Electronic Warfare.

<sup>(4)</sup> C4I includes rugged secure rackmount servers that are designed to drive the most powerful military processing applications.

<sup>(5)</sup> Other products include all component and other sales where the end use is not specified.

The following table presents the Company's net revenue by product grouping for the periods presented:

	Fiscal Years Ended							
	Ju	ne 28, 2024	Ju	ne 30, 2023	July 1, 2022			
Components (1)	\$	192,758	\$	197,180	\$	167,333		
Modules and Sub-assemblies (2)		181,881		200,281		167,242		
Integrated Solutions (3)		460,636		576,421		653,622		
Total Net Revenues	\$	835,275	\$	973,882	\$	988,197		

(1) Components represent the basic building blocks of an electronic system. They generally perform a single function such as switching, storing or converting electronic signals. Some examples include power amplifiers and limiters, switches, oscillators, filters, equalizers, digital and analog converters, chips, MMICs (monolithic microwave integrated circuits) and memory and storage devices.

(2) Modules and sub-assemblies combine multiple components to serve a range of complex functions, including processing, networking and graphics display. Typically delivered as computer boards or other packaging, modules and sub-assemblies are usually designed using open standards to provide interoperability when integrated in a subsystem. Examples of modules and sub-assemblies include embedded processing boards, switched fabrics and boards for high-speed input/output, digital receivers, graphics and video, along with multi-chip modules. Additional examples include integrated radio frequency and microwave multi-function assemblies and radio frequency tuners and transceivers.

(3) Integrated solutions bring components, modules and/or sub-assemblies into one system, enabled with software. Subsystems are typically, but not always, integrated within an open standards-based chassis and often feature interconnect technologies to enable communication between disparate systems. Spares and replacement modules and sub-assemblies are provided for use with subsystems sold by the Company's subsystems are deployed in sensor processing, aviation and mission computing and C4I applications.

The following table presents the Company's net revenue by platform for the periods presented:

	Fiscal Years Ended					
	Ju	ne 28, 2024	Ju	ne 30, 2023	J	ıly 2, 2021
Airborne (1)	\$	445,330	\$	506,264	\$	506,549
Land (2)		107,249		157,505		158,782
Naval (3)		100,984		136,954		155,588
Other (4)		181,712		173,159		167,278
Total Net Revenues	\$	835,275	\$	973,882	\$	988,197

(1) Airborne platform includes products that relate to personnel, equipment or pieces of equipment designed for airborne applications.

(2) Land platform includes products that relate to fixed or mobile equipment, or pieces of equipment for personnel, weapon systems, vehicles and support elements operating on land.

(3) Naval platform includes products that relate to personnel, equipment or pieces of equipment designed for naval operations.

(4) All platforms other than Airborne, Land or Naval.

Customers comprising 10% or more of the Company's revenues for the periods shown below are as follows:

	Fi	iscal Years Ended	
	June 28, 2024	June 30, 2023	July 1, 2022
L3Harris	12 %	*	*
Lockheed Martin Corporation	11 %	13 %	10 %
RTX Corporation	10 %	14 %	14 %
Northrop Grumman	*	11 %	*
U.S. Navy	*	*	14 %
	33 %	38 %	38 %

\* Indicates that the amount is less than 10% of the Company's revenue for the respective period.

While the Company typically has customers from which it derives 10% or more of its revenue, the sales to each of these customers are spread across multiple programs and platforms. There were no programs comprising 10% or more of the Company's revenues for the years ended June 28, 2024, June 30, 2023 and July 1, 2022.

#### Q. Derivatives

The Company utilizes interest rate derivatives to mitigate interest rate exposure with respect to its financing arrangements. On September 7, 2022, the Company entered into an interest rate Swap (the "initial Swap") with JP Morgan Chase Bank, N.A. ("JPMorgan") for a notional amount of 300,000 in order to fix the interest rate associated with a portion of the total \$511,500 existing borrowings on the Revolver. The initial Swap agreement was designated and qualified for hedge accounting treatment as a cash flow hedge. The initial Swap matured on February 28, 2027, coterminous with the maturity of the Revolver. The initial Swap established a fixed interest rate on the first 300,000 of the Company's outstanding borrowings against the Revolver obligation at 3.25%.

On September 29, 2022, the Company terminated the initial Swap. At the time of termination, the fair value of the Swap was an asset of \$5,995. The Company received the cash settlement of \$5,995 and these proceeds are classified within Operating Activities of the Consolidated Statements of Cash Flows for the year ended June 30, 2023.

Following the termination of the initial Swap, the Company entered into the Swap agreement with JPMorgan on September 29, 2022. The Swap fixes \$300,000 of total \$511,500 existing borrowings on the Revolver at the time of the Swap. The Swap agreement was designated and qualified for hedge accounting treatment as a cash flow hedge. The Swap was scheduled to mature on February 28, 2027, coterminous with the maturity of the Revolver. The Swap established a fixed interest rate on the first \$300,000 of 3.79%.

On September 28, 2023, the Company terminated the Swap. At the time of termination, the fair value of the Swap was an asset of \$7,403. The Company received the cash settlement of \$7,403 and these proceeds are classified within Operating Activities of the Consolidated Statements of Cash Flows for the year ended June 30, 2024.

Following the termination of the Swap, the Company entered into the September 2023 Swap agreement on September 28, 2023 with JPMorgan for a notional amount of \$300,000 in order to fix the interest rate associated with a portion of the total \$576,500 existing borrowings on Company's Revolver at the time of the Swap at 4.66%. The September 2023 Swap agreement was designated and qualified for hedge accounting treatment as a cash flow hedge. The September 2023 Swap matures on February 28, 2027, coterminous with the maturity of the Revolver.

As of June 28, 2024, the fair value of the September 2023 Swap was a liability of \$2,436 and is included within Other non-current liabilities in the Company's Consolidated Balance Sheets.

During fiscal year 2024, the Company amortized \$2,982 of the gains associated with the interest swaps terminated on September 29, 2022 and September 28, 2023, which is included within Accumulated other comprehensive income.

The market risk associated with the Company's derivative instrument is the result of interest rate movements that are expected to offset the market risk of the underlying arrangement. The counterparty to the Swap is JPMorgan. Based on the credit ratings of the Company's counterparty as of June 28, 2024, nonperformance is not perceived to be a material risk. Furthermore, none of the Company's derivatives are subject to collateral or other security arrangements and none contain provisions that are dependent on the Company's credit ratings from any credit rating agency. While the contract or notional amounts of derivative financial instruments provide one measure of the volume of these transactions, they do not represent the amount of the Company's exposure to credit risk. The amounts potentially subject to credit risk (arising from the possible inability of the counterparty to meet the terms of their contracts) are generally limited to the amounts, if any, by which the counterparty obligations under the contracts exceed the obligations of the Company to the counterparty. As a result of the above considerations, the Company does not consider the risk of counterparty default to be significant.

#### R. Subsequent Events

The Company has evaluated subsequent events from the date of the Consolidated Balance Sheet through the date the consolidated financial statements were issued and noted no items requiring adjustment of the financial statements or additional disclosures.

On August 13, 2024, the Company entered into a \$60,000 committed receivables purchase and servicing agreement ("RPSA") with a new party. The RPSA has an initial term of two years. Pursuant to the RPSA, the new party has committed to purchase receivables at a discount rate from a list of the Company's customers, maintaining a balance of purchased receivables at or below \$60,000.

On August 13, 2024, the Company executed Amendment No. 6 to the Revolver, decreasing the permanent borrowing capacity to \$900,000, with a temporary reduction in credit availability to \$750,000 until the Company meets a minimum consolidated EBITDA level, as defined in the Amendment No. 6 to the Revolver, of \$75,000 excluding (a) adjustments for cost savings, operating expense reductions and synergies, (b) EAC charges and other non-cash expenses, charges, and losses addbacks and (c) deducts to reverse EAC charges previously added back, in each case for a last twelve-month period. Refer to exhibit 10.7.6 included herein.

# ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

#### ITEM 9A. CONTROLS AND PROCEDURES

#### (a) EFFECTIVENESS OF DISCLOSURE CONTROLS AND PROCEDURES

We conducted an evaluation as of June 28, 2024 under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer (our principal executive officer and principal financial officer, respectively), and concluded that our disclosure controls and procedures (as defined in Rule 13a-15(e) or Rule 15d-15(e) under the Securities Exchange Act of 1934, as amended, the "Exchange Act") were effective as of June 28, 2024 and designed to ensure that the information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that it is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

#### (b) INHERENT LIMITATIONS ON EFFECTIVENESS OF CONTROLS

Our management, including the Chief Executive Officer and Chief Financial Officer, does not expect that our internal control over financial reporting or our internal controls will prevent or detect all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. The design of any system of controls is based in part on certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

#### (c) MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Under the supervision of the Chief Executive Officer and Chief Financial Officer, management conducted an assessment of the effectiveness of our internal control over financial reporting as of June 28, 2024 based on the framework in Internal Control - Integrated Framework (2013) published by the Committee of Sponsoring Organizations of the Treadway Commission. As a result of this assessment, management concluded that our internal control over financial reporting was effective as of June 28, 2024. The effectiveness of our internal control over financial reporting as of June 28, 2024 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in its report.

#### (d) CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fourth quarter of fiscal 2024 identified in connection with our Chief Executive Officer's and Chief Financial Officer's evaluation that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

#### ITEM 9B. OTHER INFORMATION

During the fourth quarter ended June 28, 2024, none of the Company's directors or executive officers adopted, modified or terminated a Rule 10b5-1 trading arrangement or non-Rule 10b5-1 trading arrangement as each term is defined in Section 408(a) of Regulation S-K.

#### ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

#### PART III

#### ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by this item is incorporated herein by reference to our Proxy Statement for our 2024 Annual Meeting of Shareholders (the "Shareholders Meeting"), except that information required by this item concerning our executive officers appears in Part I, Item 4.1. of this Annual Report on Form 10-K.

#### ITEM 11. EXECUTIVE COMPENSATION

The information required by this item is incorporated by reference to our Proxy Statement for the Shareholders Meeting.

# ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this item is incorporated herein by reference to our Proxy Statement for the Shareholders Meeting.

# ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this item is incorporated herein by reference to our Proxy Statement for the Shareholders Meeting.

#### ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Our independent registered public accounting firm is KPMG LLP, Boston, MA, Auditor Firm ID:185

The information required by this item is incorporated herein by reference to our Proxy Statement for the Shareholders Meeting.

#### **PART IV**

#### ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

#### (a) FINANCIAL STATEMENTS, SCHEDULES AND EXHIBITS

The financial statements, schedule, and exhibits listed below are included in or incorporated by reference as part of this report:

1. Financial statements:

Report of Independent Registered Public Accounting Firm

Consolidated Balance Sheets as of June 28, 2024 and June 30, 2023

Consolidated Statements of Operations and Comprehensive (Loss) Income for the fiscal years ended June 28, 2024, June 30, 2023, and July 1, 2022

Consolidated Statements of Shareholders' Equity for the fiscal years ended June 28, 2024, June 30, 2023, and July 1, 2022

Consolidated Statements of Cash Flows for the years ended June 28, 2024, June 30, 2023, and July 1, 2022

Notes to Consolidated Financial Statements

- 2. Financial Statement Schedule:
- II. Valuation and Qualifying Accounts

#### ITEM 16. FORM 10-K SUMMARY

None.
